The publication, intended for persons involved in educational activities, provides selected data on demographic, social, economic, and educational characteristics of Region V, United States Department of Education. Region V comprises Illinois, Indiana, Michigan, Minnesota, Ohio, and Wisconsin. The majority of the data was drawn from the 1976 Survey of Income and Education (SIE). Demographic data include total population and percent of change, land use, number of households, number of births and birth rate, and number of children under five per 1,000 women. Social statistics categorize population according to ethnic group and number and percent of population under 18, under 5, between 5 and 17, between 18 and 64, and 65 and older. The number of families with female head, no husband present, are also counted. Economic statistics reveal median family income, 1969 to 1975; per capita personal income; and median income by race and sex according to high school graduates and those with four or more years of college. The number of families below poverty level, labor force, unemployment, and major occupational groups are also included. Educational statistics depict total enrollment in public and private elementary and secondary schools and estimated number of high school graduates. Enrollment is categorized according to handicapped, sex, ethnicity, and English as a second language. Statistics for public and private institutions of higher education are also included. Regional maps present the descriptive data for each state and are accompanied by brief narratives that summarize and highlight the data. (Author/KC)

This booklet outlines specific competencies for social studies education in grades one through six in the Philadelphia school system. The focus of social studies education is seen to be the transmission of knowledge and inculcation of skills and attitudes essential for good citizenship in an interdependent world. Five important areas which contribute to good citizenship are self-realization, governing, producing and consuming, utilizing environments, and critical thinking and decision making. These areas form the basis for the competencies listed for each of six grade levels. For each grade level at least 10 competencies are listed. Each competency is followed by at least one behavioral objective which can be used to evaluate mastery of the competency. For example, a key competency for grade three is, "Students

will show awareness of the neighborhood as a geographic entity." A behavioral objective for this is "Identify or draw a map of the neighborhood." Other key competencies include understanding that people have feelings and emotions (grade one), recognizing the importance of city services (grade two), appreciating ethnic and cultural diversity (grade four), and understanding the importance of political and geographic boundaries (grade six). Some of the behavioral objectives involve activities related to the city of Philadelphia. (AV)

Specific competencies are outlined for social studies education in grades seven through 12 in the Philadelphia school system. The focus of social studies education is seen to be the transmission of knowledge and inculcation of skills and attitudes essential for good citizenship in an interdependent world. Five areas which contribute to good citizenship are self-realization, governing, producing and consuming, utilizing environments, and critical thinking and decision making. These areas form the basis for competencies listed for eight courses in the secondary social studies program. The courses are geography (grade seven), Pennsylvania and American history and government (grade eight), world history (grade nine), American history (grades 10 or 11), political science (grade 12), economics (grade 12), sociology (grade 12), and Philadelphia government (grades 10 through 12). For each course, between four and 13 competencies are identified. Each competency is followed by numerous behavioral objectives which can be used to evaluate mastery of the competency. For example, a competency in American history is, "Students will understand some of the political and social problems America faced between 1870-1920." A related behavioral objective is to identify some of the reasons for the great upsurge in immigration during that period. (AV)

Identifiers—Africa

Outlined in this booklet are key competencies for African and Afro-American studies courses in kindergarten through grade six in the Philadelphia school system. Afro-American studies are viewed as (1) developing students' ability to gain insights and destroy stereotypes and (2) providing a frame of reference for understanding the forces which have shaped social problems based on race and color. For each grade level, between two and eight competencies are identified. Each competency is followed by numerous behavioral objectives by which mastery of the competency can be evaluated. For example, one fifth grade competency is that students will learn a definition of cultural heritage and the con-

cept of tradition. One behavioral objective for this competency is identification of five characteristics of African cultural heritage brought to America by African people. Progressing from kindergarten through grade six, the competencies emphasize understanding differences among all living things, self-acceptance, concepts of family and community, geography of Africa, black history in Philadelphia, racism and the civil rights movement, and African influences on Western culture. This booklet outlines key competencies for art education in kindergarten through grade six in the Philadelphia school system. The goal of art education is to provide an understanding of elements and principles of composition and design such as color, line, shape, mass, and texture. Art education should involve students in creating, analyzing, and evaluating works of art in terms of art history and the contributions of various cultural groups. Art education activities are stressed as an interdisciplinary experience. The competencies listed in this document are specific to each grade level: grades one through six have 10 competencies each, and kindergarten has one. Each competency is followed by numerous behavioral objectives, or activities by which mastery can be evaluated. For example, a fourth grade competency is that students will explore the realms of fantasy and imagination in art. A related behavioral objective is to contrast the two painting styles of surrealism and realism. Other competencies include becoming familiar with art material (kindergarten); creating forms that are recognizable, sturdy, and attractive using self-hardening clay (grade two); and considering texture as an art element (grade five). Major competencies are presented for art education courses in grades seven through 12 in the Philadelphia school system. The goal of art education is to promote an understanding of elements and principles of composition and design such as color, line, shape, mass, and texture. Art education should involve students in evaluating, creating, and analyzing works of art in terms of art history and the contributions of various cultural groups. Art education activities are stressed as an interdisciplinary experience. This booklet outlines eight competencies for art courses to promote in each of grades seven through 12. Each competency is accompanied by numerous behavioral objectives, or activities by which mastery can be evaluated. For example, a tenth grade competency is that students will study a non-objective approach to design. A behavioral objective for this is to discuss uses of mass-produced surface design as in paper products, advertising, fabrics, and floor coverings. Other competencies include production of commercial art forms designed for use in the school and community (grade seven); learning one-point and two-point perspective (grade nine); and studying ways in which mass is used by artists and designers (grade 11). The grade 12 competencies include a list of portfolio requirements for seniors who apply to art schools and colleges. (AV)

Major competencies are presented for music education in kindergarten through grade six of the Philadelphia school system. Music is seen to be a mode of expression in responding to and interpreting life and nature. It promotes development of aesthetic judgment. The competencies outlined in this document are derived from a comprehensive music program reflecting the variety of ways people experience and participate in music. For each grade level, up to six competencies are identified. These include participation in singing and directed listening activities. Each competency is accompanied by numerous behavioral objectives by which mastery can be evaluated. For example, a fourth grade competency is that students will demonstrate musical perceptions through bodily movements. A related behavioral objective is to acquire individual and small group skills at choreographing favorite compositions. The booklet also identifies competencies and behavioral objectives for each of three levels (basic, intermediate, advanced) of instrumental instruction. These emphasize tone production, interpretation, and ensemble playing. (AV)

This booklet identifies major competencies for each course offered in the secondary music education program in the Philadelphia school system. Music is seen to be a mode of expression in responding to and interpreting life and nature. It promotes the development of aesthetic judgment. The booklet outlines up to eight competencies for each of nine elective music courses and three instrumental courses offered in grades seven through 12. The music courses include basic music, music literature, music theory, harmony, solfège, and sight singing. For each competency, numerous behavioral objectives are listed by which mastery can be evaluated. For example, a competency in harmony is that students will demonstrate a knowledge of secondary triads and their inversions. A behavioral objective for this is to construct and label triads in root position and inversions. Other competencies include demonstrating an understanding of meter signature (music theory); knowing periods in music history and their representative composers (music literature); and showing refined tone control and quality (advanced instrumental). This booklet outlines competencies for consumer education courses in grades seven through 12 in the Philadelphia school system. Consumer education is seen to develop students' abilities to cope with situations encountered daily in their roles in our economic system. It puts into practice the basic skills of reading, writing, speaking, listening, viewing, problem solving, interpersonal relations, and computation. For each grade level, the booklet identifies up to four major competencies. Each competency is accompanied by numerous behavioral objectives by which mastery can be evaluated. For example, a ninth grade competency is that students will show personal financial management skills. A behavioral objective for this is to plan realistic budgets for differing income levels and priorities. Other competencies include demonstrating ability to plan effectively (grade seven), interpreting issues in consumer affairs and financial management (grade 10), and understanding the importance of a value system in planning (grade 12). Descriptors—Adults, Educational Research, High School Students, *Interaction Process Analysis, *Interpersonal Relationship, Males, Observation, *Peer Relationship, *Personality Traits, Secondary Education, Social Behavior, Social Integration, *Student Teacher Relationship

A study to analyze individual differences in interpersonal styles of students and to identify behavioral differences in student interactions with adults and peers is reported. The sample consisted of 18 high school males who were observed during two normal school days. Students were observed according to interactions with other students, adults, males, or females; settings where interactions occur; and content and affective style of the interactions. Results reveal five interactive styles: Group One demonstrates an average amount of interaction; Group Two, a great deal of interaction with peers and little interaction with adults; Group Three, little interaction with peers and a great deal with adults; Group Four, extremely verbal and high participants; and Group Five, low participants. Group One individuals fit into the school because they are willing to maintain a "student role" at the expense of allowing a more authentic self to emerge. Groups Two and Three probably engage students in one fashion and adults in another; more research is needed to determine their methods of interaction. Group Four persons dominate interactions so totally that it is difficult for others to make an impact on their world view. Subjects included in Group Five demonstrate some possibilities for maladaptation. They view themselves as outsiders and appear anxious and unable to communicate. (Author/KC)

This report summarizes 1979 activities of the World Fertility Survey (WFS), an international population research program to assist interested countries carry out surveys of human fertility behavior. The document is organized into six major sections. Following an introduction, section two briefly describes participation of countries in Africa, Asia, Latin America, and the Middle East. Section three discusses developments in data processing such as technical assistance to countries, software development, and training in data processing. The fourth section, the major portion of the document, provides a detailed account of progress made in three major analyses of WFS: the publication of first country reports, initiation and implementation of second stage analysis, and cross-national comparative analysis. Research projects initiated or discussed in workshops are described according to individual countries. Section five outlines other program developments including special field studies (post-enumeration and husbands' surveys), technical monitoring, and publications. Sections six and seven list WFS committees with brief summaries of 1979 meetings and WFS personnel. Appendices provide information on participating countries, publications of WFS, addresses to obtain first country reports, and a bibliography of world fertility survey references in journals and conference papers. Descriptors—Attitude Change, Blacks, Change Agents, *College Faculty, Females, Higher Education, Males, *Racial Bias, Researchers, Research Problems, *Sex Bias, Social Action, Social Science Research, *Social Sciences, Whites

This review of research examines responses of women and black social scientists to discrimination within their disciplines. The attitudes of male social scientists toward these two groups are also examined. Although the difficulties experienced by women and blacks in the social sciences have been reduced in recent years, in actuality only a few have been able to cross long-standing barriers. Much of the change can be attributed to governmental policy concerning discrimination rather than originating from the discipline itself. Research indicates that many white males oppose government policies and try systematically to evade them or postpone compliance. Ironically, until quite recently women and blacks have been defined by the dominant white males in the social sciences. However, a mark of the elevated consciousness of these two underprivileged groups is their intense redefinition of themselves. These actions have several serious consequences. They raise misgivings about the way power and privilege are allocated, provide stimulus for social change, question social science wisdom concerning both sex and race differences and the methods employed in researching women and blacks. In short, actions by women and blacks in the social sciences have created reservations about the ability of white male social scientists to study in a detached and objective way groups about which they are likely to have strong subjective feelings. Descriptors—Administrator Attitudes, Administrator Characteristics, *Administrator Selection, Career Development, Comparative Analysis, *Employee Attitudes, *Females, Males, *Managerial Occupations, Occupational Aspiration, Professional Development, Research Methodology, Sex Fairness, *Sex Role, Sex Stereotypes, Social Science Research, Social Work, *Social Workers, Success

This paper discusses a study to determine attitudes among women in the field of social work regarding opportunities for professional advancement. Specifically, the study investigated whether female social workers noticed differences in opportunity among males and females to be recruited to management positions and to hold management positions once they were recruited. The study also compared perceptions of women who desire administrative positions and those who do not. A random sample of 1,000 female members of the National Association of Social Workers received a five-page questionnaire. Among other background statistics which were collected, a breakdown by administrative status and desire for administrative positions became the basis for analyzing responses. Questions covered sexist practices in hiring, personal/professional conflicts, need for aggressiveness, role models, and personal and organizational supports. A major finding was that women who are non-administrators with desire to be, perceive sexist practices at a higher level, see a need to be aggressive to get ahead, undergo more professional conflict, and desire more organizational support for their career goals. The author suggests that training programs be developed for women seeking management positions. These programs should teach women to be competitive, take and give criticism, develop role models, use language and code words, develop networks of contacts, take risks, develop stamina, and never expect praise. Identifiers—Illinois

This booklet offers a census of course offerings and enrollments in art, music, dance, theater, and literature in junior and senior high schools in Illinois. It is part of a series of reports surveying statewide basic curriculum data. Data were collected in 1977 and reflect the 1976-1977 school year. All public secondary schools in Illinois were surveyed and responses were received from 95% of all high schools and 97% of junior high schools. The objective was to produce a source of data on secondary school curriculum and enrollments. Information is presented in narrative and tabular form. In addition to information on course offerings, information is presented on school size and community type (central city, suburb, independent city, or rural). Highlights of the report are that almost all Illinois junior high school students take at least one course in art and music; virtually all high school arts courses are elective; rural high school students take more music courses than students in other regions; central city students enroll heavily in both high school art and music; male/female enrollments are relatively equal in junior high arts courses, females are more likely than males to take art and music courses in high school, and faculty cutbacks in the arts may substantially affect arts instruction. The document concludes with an appendix listing art, music, literature, theater, and dance courses offered in Illinois. (Author/DB)

Identifiers—Illinois

This booklet offers a census of course offerings and enrollments in social studies in junior and senior high schools in Illinois. It is part of a series of reports surveying statewide basic curriculum data. Data were collected in 1977 from 459 public junior high schools and 704 public high schools. The document is intended for use by school administrators, school board members, teachers, parents, legislators, and others who have a role in making decisions about public education in Illinois. Specifically, the data can help educational policy makers by providing background data on issues including modifying programs in light of declining enrollments, reallocating resources, and assessing the impact of federal regulations and state laws mandating equal access to all school programs for boys and girls. In addition to information on course offerings, information is presented on school size and community type (central city, suburb, independent city, or rural). Highlights of the report are that every Illinois secondary school offers social studies courses; United States history is required of all students for graduation from eighth grade and high school; there is no direct relationship between the frequency with which a course is offered at the high school level and the level of enrollment; over 50% of the high school social studies courses are electives; there are no sex differences in

enrollment in social studies courses; enrollment declines may induce schools to reduce the number of social studies courses; and competency testing in the social studies is becoming increasingly broadened. (Author/DB)

Myths & Realities of the Coming Decade.

Pub Date—16 Jun 80

Note—16p. Paper presented at Annual Marketing Conference of the American Marketing Association (Atlanta, GA, June 16, 1980).

Pub Type—Speeches/Meeting Papers (150) — Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Economic Change. *Economic Factors. *Futures (of Society). Income. *Life Style. Population Trends. Productivity. Quality of Life. *Social Indicators. Trend Analysis

Since the late 1970s Americans have adopted a more pessimistic outlook of the future than at any time since World War II. Reasons for this include inflation, unemployment, a low rate of productivity, the flow of U.S. funds to OPEC nations, an unfavorable balance of trade, and the unstable international environment. In view of these factors, some analysts predict that the 1980s will be a decade of weakness in real income for consumers and caution in family financial management. However, changing demographic statistics may indicate a more positive consumer climate in the future. During the next 20 years the 35-54 age group will increase dramatically. This age group traditionally is one of high earning capacity. Population growth will slow down. More wives will enter the work force, thereby making dual-earner families the norm and increasing household income. Senior citizens will comprise a lucrative and expanding market. The results of increased incomes will probably mean the expansion of affluence in the middle and working classes. Life styles will reflect themes of self-gratification, enhancement of personal health and well-being, smaller and more efficient housing, more cosmopolitan consumer tastes, and dependence on services and products that facilitate essential living activities. Descriptors—Change Strategies. Comparative Analysis. Decision Making. *Females. Group Dynamics. *Leadership Qualities. Males. *Organizational Climate. Organizations (Groups). Political Power. *Power Structure. Research Methodology. Role Conflict. Role Perception. *Sex Differences. Socialization. Social Science Research

This paper reports on a study of the components of political leadership and emphasizes problems of women in attaining positions of political leadership. The authors use the term political leadership to describe the decision-making mechanism within organizations. First they review their survey of the personnel of a large organization. Respondents were asked how they thought about their organization in terms of issues including politics, satisfaction and loyalty, organizational flexibility, and perceptions of elitism. Responses of men and women were compared. The more women saw the organization as being political, the more likely they were to view it in a negative (elite) rather than positive (flexible) way and the less likely they were to be satisfied and loyal to it. Men saw the organization as political and were more positive and satisfied at higher levels within it. A review of literature revealed that political behavior is predominant at high levels of decision making within organizations and that informal friendship and information-sharing coalitions are vital to successful leaders. Women are poorly prepared for high level leadership positions because of their early socialization to be nurturing, role conflicts between masculine and feminine behaviors, and tendency of male leaders to want to keep their power cliques homogeneous. The authors suggest that women seeking political leadership develop coalitions to generate support, operate

opportunistically, disclose positions strategically, always have an option when negotiating, use humor, and be clear on willingness to take risks. (AV)

Prejudice and Society.

B'nai B'rith, New York, N.Y. Anti-Defamation League.

Pub Date—68

Note—49p.

Pub Type—Opinion Papers (120)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Attitudes, Behavior. *Bias, Socialization. Social Problems, Stereotypes

This monograph consists of six chapters which discuss the problem of prejudice in our society. Chapter I looks at "Prejudice as a Social Problem." As a social problem prejudice can be defined exclusively in terms of human behavior which denies or attempts to deny equality of opportunity or status to certain racial, religious, or ethnic groups. Prejudiced behavior treats individuals as though they were not individuals at all but, rather, indistinguishable parts of a classified group. "The Shifting Nature of Prejudice" is discussed in Chapter II. Prejudiced attitudes do not predetermine prejudiced behavior. An individual's prejudiced behavior may be determined more by the social situation at any given moment than by his pre-existing attitudes. Chapter III "Learning Prejudice" points out that the learning of prejudice is effected primarily by the kinds of social situations in which people live. Chapter IV "The Prejudiced Community" discusses how the pattern of community practices is the fountainhead of prejudice. The growing child learns his social behavior primarily by following the modes and models of behavior around him. "Family and Group Influences in the Prejudiced Community" is the topic of Chapter V. The complex of prejudicial practices within a community provides the family and other traditional groups with the "frame of reference" which perpetuates these practices and sustains prejudice. "Some Implications for Action" is the topic of the concluding chapter. The custom of prejudice may be changed through remedial social action. Various channels of social action such as the law, direct action, mass media, the schools, and community groups may help to effect this change. In addition, the individual must examine and attempt to understand his own behavior and attitudes. (Author/RM)

How Do You Talk About People?

B'nai B'rith, New York, N.Y. Anti-Defamation League.

Pub Date—69

Note—33p.

Pub Type—Opinion Papers (120)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Bias, Evaluation. *Evaluative Thinking. *Semantics

This monograph discusses prejudice which exists when humans evaluate others. No one sees or hears a man evaluating. One hears or sees only what he says and does. An arbitrary sampling of recent research studies which indicate some of the varieties of mis-evaluation are cited. They reveal that sometimes people show antipathy to people they do not know and that some people say things about others which are just not so. It is one of the curiosities of everyday speech that a person can be making Inference Statements (statements which refer to factors and considerations which are outside the immediate acquaintance of the speaker) when he sounds as though he were talking about something observable. Sometimes people will speak with the force and assurance of the factual when the mood ought more properly reflect a certain tentativeness, an uncertainty. The sound of factuality does not establish the factuality of an utterance. Another evaluation oddity which must be noted because it so often shows the departure from the factual is the practice of paying more attention to what a person is called than to the person. It occurs whenever we neglect a man to focus on the way we have named or labelled him. It is one of the commonplaces of studies in semantics that a number of words may refer to the same thing though each may imply strikingly different attitudes to it. A story is told about the way a Greek communist newspaper reported some remarks of Paul Porter, made at a banquet in Macedonia while on an economic mission. He said, "It is indeed a pleasure to be here tonight with you good

citizens of Greece. You Greeks and we Americans have very much in common. We like to eat. We like to drink. And we like to sit around and talk." The newspaper said, "Ambassador Porter said that we are just like Americans, gluttons, drunkards, and gossips." (Author/RM)

This study, undertaken in 1963, analyzed the references made to religion in elementary social studies textbooks. The report was intended to inform authors, publishers, and teachers and enable them to correct errors, supply omissions, and omit irrelevant material. The textbooks used in the study consisted of 120 elementary (grades 1-6) public school social studies textbooks shelved in the Social Studies Division of the Teachers' Central Laboratory of Hunter College, New York City. Major findings included the following. The belief that nothing in the textbooks could violate the religious feelings of public school students was not true. Many books presented Protestantism in a more favorable light than Catholicism and Christianity more favorably than Judaism. There were definite sectarian tendencies in the textbooks. A numerical analysis of the subject matter revealed a disproportionate quantitative predominance of references to Christianity, even after the predominance of Christians in our population was taken into consideration. The texts portrayed present-day religion as no longer being a potent molding force in our society. This impression was conveyed by the tendency of the texts to discuss fully the role of religion in the past, but to give a sketchy, incomplete description of the part played by religion in contemporary culture. Christianity was depicted as being limited in its influence to moral and spiritual matters through church attendance, worship, and welfare work. Virtually nothing was said about Jewish life in America today. The historical facts about religious conflicts and persecutions were being presented in an inadequate fashion by the elementary social studies textbooks. (Author/RM)

Identifiers—*Israel

This pamphlet provides teachers with a brief overview of topics about Israel and suggests how they can be incorporated into the elementary and secondary social studies curriculum. There are five main sections. Section one describes geographical features of Israel including its principal cities, seaports, water resources, and the Negev. Section two reviews historical periods characterized by Zionism, formation of the state of Israel, and the Arab-Israeli conflict. Modern governmental structure is outlined in section three with descriptions of the presidential role, the legislature, executive and judicial branches, and political parties. Section four discusses two major aspects of Israel's economy: labor and the kibbutz. Section five explores elements of Israeli society including Arabs in Israel, Oriental and European Jews, non-Jews, religious life, and education. At the end of each section a note to the teacher suggests how the material can be related to specific social studies themes at certain grade levels or if it should be developed as a unit by itself. The pam-

phlet concludes with a bibliography of 76 books and seven films about Israel. (AV)

*Change Strategies, Classroom Environment, Community Cooperation, Conference Proceedings, Curriculum Development, Educational Policy, Elementary Secondary Education, *Ethnic Bias, Negative Attitudes, Problem Solving, *Public Schools, Racial Discrimination, *Social Bias, Social Problems, Social Science Research, Teacher Education

Proceedings are summarized of a national conference which explored the nature and consequences of prejudice in adolescents and developed strategies for its reduction in the schools. Held in 1976, the conference was sponsored by the Anti-Defamation League of B'nai B'rith and the University of California's School of Education. Participants included school superintendents, deans of schools of education, and representatives of professional associations and federal education agencies. The main address was a report of research conducted by the Survey Research Center of the University of California. It attempted to measure the phenomenon of prejudice, analyze its sources, and suggest interventions which might be undertaken by educational institutions. Three major reaction papers were delivered which addressed the research findings in terms of a systems perspective, an administrator's viewpoint, and instructional implications. The conference acknowledged that significant prejudice exists among adolescents and that new strategies are needed at many levels. These include policy formulation, analysis of structural constraints, preservice and inservice teacher education, curriculum, classroom, and community involvement. (Author/AV)

Activities and objectives for helping elementary school pupils develop a multiethnic and multicultural orientation toward American history and culture are presented in this teacher's guide. The major objective was to develop an interdisciplinary educational program which would influence young children in a positive way as they developed life-long attitudes. The document is presented in two major chapters, each of which represents one of the major goals of the project. Chapter I describes 85 activities which aim toward helping students recognize similarities and differences among families as major transmitters of cultural heritage. Chapter II outlines 154 activities directed toward helping children recognize that the nature and quality of American life is the result of contributions of his/her own and other cultural groups. More specific objectives are included in each chapter. For example, in chapter I, specific objectives are that children be able to describe values and traditions of families with different ethnic backgrounds. In chapter II, specific objectives are that children be able to define the concept of group, recognize celebrations that have special

significance to certain groups, and describe the importance of legends and folk tales. For each activity, information is presented on teacher background, materials, procedures, and specific learning objectives. Students are involved in a wide variety of activities including reading poetry, singing songs, working with various art media, analyzing filmstrips and slides, telling group stories, and comparing characteristics of their own families with families in other cultures. Obtaining Measures of Citizen Education Goals.

Research for Better Schools, Inc., Philadelphia, Pa. Pub Date—Sep 80

Note—55p.; For a related document, see ED 159 115.

Pub Type—Guides - Non-Classroom (055) — Reports - Evaluative (142)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*Achievement, Attitude Measures, Behavioral Objectives, *Citizenship Education, *Educational Objectives, Elementary Secondary Education, *Evaluation Methods, Guides, Higher Education, Knowledge Level, *Measurement, Measurement Objectives, Skill Development, Social Studies

This paper is a guide for determining how to measure the goals of citizen education programs. It presents a procedure by which educators or evaluators can identify program goals and determine what types of measures can best assess achievement of the goals. It does not suggest specific tests or measurement instruments; those can be developed or selected on the basis of the procedure outlined in this paper. The opening sections discuss four categories of possible program goals: knowledge, skills, attitudes, and behaviors. Each type of goal must be measured in a different way, based on clarification of the goal's content and determination of the appropriate measurement format. For example, skill goals should be measured with performance tests whereas behavioral goals should be assessed by observational procedures. A lengthy appendix presents 16 sample outlines for reviewing measurement criteria for various goals in each of the four areas of knowledge, skills, attitudes, and behaviors. Each sample outline states a goal, clarifies its content, relates it to citizenship, and explains its implications for the type of measurement best suited to it. (AV)

Law Related Education: Assessing Adolescents' Knowledge and Attitudes.

Pub Date—Apr 80

Note—14p.; Paper presented at the Annual Meeting of the American Educational Research Association (Boston, MA, April 7-11, 1980).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Data Analysis, High School Students, *Knowledge Level, *Legal Education, Research Methodology, Secondary Education, Sex Differences, Social Science Research, Social Studies, Statistical Analysis, *Student Attitudes, *Student Characteristics

A study is described which examined the relationships between law-related knowledge, attitudes, and demographic characteristics of high school students. Participants were 457 students in grades nine through 12 from four high schools near Phoenix, Arizona. Three questionnaires were administered: (1) a 65-item social attitude questionnaire on attitude variables including liberalism, authoritarianism, belief in a just world, and legal-social responsibility; (2) a 50-item criminal justice knowledge survey covering law, police, prisons, courts, and juvenile justice; and (3) self-reports of parental educational attainment and occupations and students' own expected level of educational attainment. Analysis of results showed that legal-social knowledge and attitudes are related, at least to a moderate degree. Low positive correlations were found between the knowledge measure and legal-social responsibility, educational expectations, socioeconomic status, and grade level. Significant sex differences appeared in attitudes of liberalism, legal-social responsibility, and authoritarianism. The authors suggest that a remaining research problem is the effect that attitudes of students entering law-related education programs have on knowledge acquisition. (AV)

Identifiers—*East Germany, *West Germany

This dissertation analyzed how political foundations, economic matters, and social problems of the United States are portrayed in selected English-language textbooks of East and West German publishers. For West Germany the research was based on nine leading stage-adopted textbooks at the upper level. The East Germans allow only one series of English-language textbooks to be used. This series was examined in the study. Discrepancies rather than similarities emerged in the comparison of East and West German textbooks. With references to the West German presentations, the book contents showed a high degree of differentiation in the selections and a critical but unbiased treatment of single aspects. East German contributions, on the contrary, consistently utilized the principle of partiality and bias so as to denounce so-called United States imperialism and to manifest Marxist-Leninist superiority. The western materials portrayed a well-balanced picture of the United States; the standardized East German textbooks divided the American society into a greedy capitalist minority opposing the exploited working class. West German publishers presented graded features of the country, its political foundations, economic problems, and social issues by a myriad of various American self-expressions. East German bookwriters confined their sources to a very few leftists who condemned the established misanthropic bourgeois system. Western schoolbook authors endeavored to portray their image of the United States more objectively through controversial contributions while East German books delineated a decadent ruling class so as to reinforce the call for revolution and takeover by the proletarians. Descriptors—Data Analysis, *Females, Feminism, Literature Reviews, *Participation, Political Affiliation, Political Attitudes, Political Issues, Political Socialization, *Politics, Sex Bias, Sex Role, Sex Stereotypes, Social Problems, *Social Science Research, Social Values, Trend Analysis

This paper reviews social science literature and trends indicated by poll data to examine the political participation of women and the extent of their political participation. It is presented in four major sections. Section I summarizes research and presents statistics concerning women's (1) participation in political activities such as voting, lobbying, attending conventions, and running for public office; (2) political skills; and (3) attainment of public office on national and local levels. Section II identifies an ideology of sexism which guides all social and political activity in the country. In terms of this concept, the author reviews women's nurturant role in society, their values as feminine citizens with greatest interest in moral issues, and the specialization of their functions as elected officials in Congress and state legislatures. Section III explores the consequences of sex-role stereotyping in politics for political democracy and social policy in the United States. Section IV reviews social policy issues which affect women's political behavior. The general issue

of women's liberation is emphasized in the discussion. (AV)

Descriptors—Educational Needs, Ethnic Stereotypes, Ethnic Studies, Information Needs, *Jews, Learning Activities, Secondary Education, Social Studies, Textbook Bias, *Textbook Content, *Textbook Evaluation, *World History

The paper discusses a study undertaken to evaluate how Jews and Jewish history are treated in three textbooks used in public high schools in Dallas. It also presents findings from the study, and recommends activities and supplementary materials which give a more realistic and comprehensive picture of Jewish history. Major objectives were to identify shortcomings of textbooks with regard to Jewish history and to offer suggestions to teachers on overcoming these shortcomings. Textbooks evaluated were "People and Our World," (Holt, Rinehart & Winston, 1977), "The Human Expression: A History of Peoples and Their Cultures," (J.B. Lippincott Co., 1977), and "The Ecumene: Story of Humanity," (Harper & Row, 1973). The document is presented in three sections. Section I introduces the study and summarizes criteria by which the textbooks were evaluated. Criteria included, Does the book recognize the Jewish roots of Christianity? Are Jews treated as an obsolete remnant of a past civilization? and Is the emphasis on persecution at the expense of intellectual and economic achievement? Section II presents evaluative information. For each book, a summary evaluation is given, followed by general comments and a unit by unit review of omissions and inaccuracies. Page numbers and quotations are given. Of the three textbooks reviewed, "People and Our World" scored the best on treatment of Jewish history. Section III presents a chronology of Jewish history, identifies major concepts in world and American Jewish history, and suggests specific materials and activities for improving the curriculum. A bibliography concludes the document. (DB)

Descriptors—Communications, *Communication Skills, Course Descriptions, *Course Organization, Educational Assessment, Educational Objectives, *Females, Higher Education, Interpersonal Relationship, *Males, Needs Assessment, Questionnaires, *Sex Role, Student Attitudes, Tables (Data), *Women's Studies

This paper discusses a needs assessment study undertaken to determine student attitudes toward women's studies. Specifically it proposes a male/female relations course and outlines a data-based approach for teaching a college level communication dynamics course based on the assessment. The needs assessment sample consisted of 481 students at Rutgers University. A 30-item questionnaire directed respondents to select up to nine high interest

topics from a list of 20. Findings indicated that students were most interested in male/female roles and stereotypes, practical exercises to improve communication with the opposite sex, sexuality as an influence on interpersonal communication, and nonverbal communication differences between men and women. They were least interested in an historical overview of male/female liberation movements and research strategies for studying sex roles and communication. Findings also indicated that 53% of respondents would probably register for the proposed course and that there were few differences according to gender and/or academic major. A course based on this needs assessment set the following objectives: to help students understand role theory, consider the advantages and disadvantages of roles affecting interpersonal relationships, become aware of gender role stereotyping in mass media, recognize verbal and nonverbal communication differences between men and women, and be able to use behavioral science approaches to studying gender role dynamics. Activities recommended to achieve these objectives included keeping a journal, preparing written answers to assigned reading, discussing issues in class, and writing research reports. The document concludes with a copy of the course survey, the assessment questionnaire, footnotes, and additional reference materials. (DB)

Moral Peers to the Rescue! A Critical Appraisal of the "Plus 1" Convention in Moral Education.

Pub Date—80

Note—12p.

Pub Type—Reports - Evaluative (142)—Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Discussion (Teaching Technique), Educational Assessment, Educational Needs, Elementary Secondary Education, *Ethical Instruction, Evaluation Methods, Literature Reviews, *Moral Development, *Peer Influence, Peer Teaching, *Teacher Role, *Theories Identifiers—Fraenkel (Jack), Kohlberg (Lawrence), Wilkins (R A)

A basic assumption regarding moral development and a critical corollary to this assumption are analyzed. The assumption, advanced by Lawrence Kohlberg, is that moral education requires a group discussion leader who can pitch moral arguments one stage above (plus 1) the majority of the class. The corollary to this assumption, based on critical studies by Jack Fraenkel and R.A. Wilkins, argues that most teachers are not developmentally advanced enough to consistently produce such plus 1 arguments. The paper states that the corollary is invalid because it is based on data referring to specific instances of reasoning rather than on a spontaneous capacity to reason. Further, by comparing some of his own data with data collected by other researchers, Wilkins followed an irregular and questionable procedure. Although these critiques lead one to question the empirical basis for the critique of the feasibility of the plus 1 moral convention, it does not mean that Kohlberg's initial assumption regarding the plus 1 convention is correct. In fact, one can question this convention from at least two standpoints: 1) Is the one stage discrepancy really the most appropriate indicator of successful classroom moral education?, and 2) Is a teacher-student discrepancy necessary for successful moral education? The conclusion, which rests on findings often overlooked in the moral education literature, is that moral development is closely related to the degree of heterogeneity of student moral reasoning in the classroom and that leaderless discussion groups are just as valuable for moral development as are teacher-led discussions. Solving, *Quality of Life, Secondary Education, Social Change, Social Indicators, Social Studies, Social Values, Sociocultural Patterns, Technological Advancement, Trend Analysis, Values, World Problems

This book presents background information and approximately 40 articles on various aspects of the future. It is intended for use as a textbook and/or reader in advanced high school or college level future studies courses. The objectives are to help students of the future examine major problems and issues and to encourage them to devise new models for living together in a single global system. The hypothesis is that social and technological changes have accelerated to the point where people will have to develop new problem solving strategies. The document is presented in five major sections: 1) The Dynamics of Change (comparison of past and future economics, society, and morality; perceptions and hazards of change), 2) The Quantity Quandaries (expansion versus conservation, scarcity versus plenty, the information explosion), 3) The Web of Complexity (global cooperation, adaptation of human systems to the environment), 4) The Magnitude of our Achievements (technological advancement, opportunity, power structures, terrorist control of power), and 5) The Expectations Explosion (changing values, global needs, social change). Each section is divided into chapters which contain an issues section (conceptual base and broad overview of the topic) and a case studies section (essays, newspaper clippings, journal articles, and excerpts from books). Examples of case studies are "What Has Posterity Ever Done for Me", Robert Heilbroner, "The Economics of the Coming Spaceship Earth," Kenneth E. Boulding, "Tokens of our 200th," Erma Bombeck, "Toward Global Interdependence," Kurt Waldheim, and "Skeptics Deluded by Myth of Abundant Resources," Anthony Lewis. (DB)

This monograph is a computer printout which presents findings from an analysis of data on cooperation among 29 regional groupings. Regional groupings are interpreted as geographic areas such as Africa and Latin America and international organizations such as The North Atlantic Treaty Organization (NATO) and the Organization of American States (OAS). Analysis was based on distance theory which implies that international relations systems can be analyzed with regard to scores on specific variables, compared with scores of other systems with regard to the same variables, and plotted a given distance above or below other systems on the basis of those scores. Variables included economic, political, cultural, and commercial interaction. The objectives were to provide information on whether cooperation within international relations systems varies across regional groupings, and to determine what significance, if any, such variation might have. The method was to apply distance theory to various regional groupings and compare the results with a world model. Findings indicated that groups with high mean economic development have members who tend to export high cooperation to other nations that are close to them with respect to the power base variable. Conversely, group members with low mean development tend to export to other nations that are distant from their own power base. The implication is that international policies relating to cooperation may have to consider high levels of variation among nations according to factors including power base and level of economic development. International Organizations. *International Relations. Models. National Norms. Political Attitudes. Regional Characteristics. *Regional Cooperation. Research Reports. Statistical Analysis. Summative Evaluation. Theories

This monograph is a computer printout which presents a final report from an analysis of data on cooperation among 29 regional groupings in over 16,000 dyadic relationships (interactions between two nations). Regional groupings included geographic areas such as Africa and Latin America and international organizations such as the North Atlantic Treaty Organization (NATO), the Organization of American States (OAS), and the Warsaw Pact. Analysis was based on application of distance theory to World Event Interaction Survey (WEIS) conflict data. Distance theory is an analytical approach to the study of international relations which implies that systems can be compared to each other with regard to scores on specific variables and that scores can be measured according to their distance above or below the scores for another system. The major objective of this report was to indicate how cooperation varies across regional groupings and to evaluate the significance that such variation might have. The method involved applying distance theory to various regional groupings and to evaluate the significance that such variation might have. The method involved applying distance theory to various regional groupings and dyadic relationships, generating a model for each nation in the system, and comparing each model to a world model. Variables included level of economic development, power base, mean economic development of nations within a regional group, number and type of cooperative interactions, and regional differences. Findings indicated that economic development is related to cooperation exportation (more developed nations tend to cooperate more often and in more ways), cooperative interactions among nations within a regional grouping tend to exceed chance expectations, the relevance of distance theory for each state varies, and a general world model can be developed from models of individual nations. Models. *National Norms. Political Attitudes. Statistical Analysis. Summative Evaluation. Theories. World Affairs

This monograph is a computer printout which presents a summary of a study in which distance theory was applied to World Event Interaction Survey (WEIS) conflict data to determine how conflict and cooperation flow in international relations systems. The specific focus of the study was on cooperative political, economic, cultural, and commercial interactions among 128 nations. Distance theory is an analytical approach to the study of international relations which implies that systems (nations, organizations, etc.) can be located in a multidimensional field and compared to other systems with regard to interaction and value variables. The comparison is measured in terms of distance above or below a given system with regard to scores on the same vari-

ables. In this study, distance theory was applied to a single index—the World Event Interaction Survey (WEIS) conflict data, which was created using the "New York Times" as a data source. Variables of particular interest were economic development, political stability, population density, duration of national independence, military power, power base, and health conditions. Models were created for all 128 states. Although there were marked differences among models with regard to economic, political, and cultural variables, findings indicated that some general statements could be made on the basis of additional statistical analysis. General conclusions included that (1) states that export conflict to states distant from them on the power base variable tend to be underdeveloped and small and to experience a high degree of domestic violence; (2) a high power base predicts high conflict exportation; and (3) lower economic development seems to reduce the tendency to export high conflict to other nations. Part of a large scale research project to test various theories with regard to their ability to analyze international relations, this computer printout presents data on the application of social field theory to patterns of conflict among nations. Social field theory implies that international relations is a field which consists of all the attributes and interactions of nations and their complex interrelationships, can be analytically divided into attributes and behavior, and exhibits dyad formations (interactions between two nations) in matters of behavior. In this monograph, social field theory was applied to a single index over a three year period—the World Event Interaction Survey (WEIS) conflict data, which was created using the "New York Times" as a data source. Variables of particular interest included domestic violence, economic development, political stability, population density, duration of national independence, colonial experience, military power, power base, and health conditions. All of the independent variables treated are factors—that is, composite indexes generated out of a number of related variables using the technique of factor analysis. The method involved when applying social field theory to WEIS conflict data included assigning a negative or positive parameter weight on each predictive factor (such as economic development) which indicates the kind of behavioral exportation engaged in by that state relative to other states and comparing positive type nation exporters with negative type nation exporters. Comparison was performed through two modes of analysis—a discriminant function analysis on positive versus negative weight subjects for each independent variable and a correlation of factor scores. The computer printout of statistical analysis is included in the document. (DB)

Part of a large scale research project to test various theories with regard to their ability to analyze international relations, this computer printout presents data on the application of social field theory to patterns of cooperation among nations. Social field theory implies that international relations can be interpreted as all the attributes and interactions of nations and their complex interrelationships, can be analytically divided into attributes and behavior, and exhibits dyad formations (interactions between two nations) in matters of behavior. The monograph is presented in four major sections. Section I provides a table of contents of all monographs included in the study. Section II explains the types of analysis presented in the monograph—discriminant function analysis of 'topdog' and 'underdog' behavior among nations in the international system (consideration of which variables best explain discrimination between scores of two nation groups on common variables) and correlation of independent variable scores among nations with the magnitude of positive ('topdog') versus the negative ('underdog') weight behavior. Potential policy implications of findings are also briefly discussed. Section III, the bulk of the document, presents an inventory of findings for cooperation among nations using social field theory. Findings included that nations that tend to export high cooperation to less economically developed nations are generally not very well developed economically themselves and tend to have few political elections, nations that have become recently independent and that exhibit a high degree of cooperation with other nations tend to exhibit characteristics of high economic development and a large population growth rate, and nations which have a high degree of cooperation with more economically developed nations tend to exhibit characteristics of relatively high economic development and many political elections. Section IV provides a bibliography of international relations and statistical analysis works. (DB)

This monograph is a computer printout which presents findings from an analysis of data on international cooperation over a three-year period. The document is part of a large scale research project to test various theories with regard to their ability to analyze international relations. In this monograph, data are analyzed according to relative status field theory. Field theory maintains that international relations consists of all the attributes and interactions of nations and their complex interrelationships, can be analytically divided into attributes and behavior, and exhibits dyad formations (interactions between two nations) in matters of behavior. Scores on variables are then compared for each nation to determine relative status. The analysis presented in this monograph indicates the results that occur when positive type behavior nation exporters are compared to negative type behavior nation exporters. Social field theory was applied to a single index for the three year period in question—World Event Interaction Survey (WEIS) conflict data which was created using the "New York Times" as a data source. The method involved when applying social field theory to WEIS conflict data included assigning a negative or positive parameter weight on each predictive factor (such as economic development) which indicates the kind of behavioral exportation engaged in by that state relative to other states. Variables of particular interest included domestic violence, economic development, political stability, population

density, duration of national independence, colonial experience, military power, power base, and health conditions. All of the independent variables treated are factors—that is, composite indexes generated out of a number of related variables using the technique of factor analysis. Findings are based on a significance level of .05 or less. Policy implications of each finding are discussed. (DB)

Part of a large scale research project to test various theories with regard to their ability to analyze international relations, this monograph presents data on the application of distance theory to patterns of cooperation among nations. Distance theory implies that international relations systems (nations, organizations, individuals, etc.) can be located in a multidimensional field and compared to other systems with regard to interaction and value variables. Comparison is measured in terms of distance above or below a given system with regard to scores on the same variables. In this monograph, distance theory was applied to a single index—World Event Information Survey (WEIS) conflict data, which was created using the "New York Times" as a data source. Variables of particular interest included domestic violence, economic development, political stability, population density, duration of national independence, colonial experience, military power, power base, and health conditions. All of the independent variables treated are factors—that is, composite indexes generated out of a number of related variables using the technique of factor analysis. The method involved when applying distance theory to cooperation/conflict data included assigning a negative or positive parameter weight to each nation on each predictive factor (economic development, etc.) which indicated the kind of behavioral exportation engaged in by that state relative to other states; comparing positive and negative type nations in terms of similarity of model and attribute type; and correlating various factor scores. The computer printout of the statistical analysis (second stage factor analysis) which is included in the document, shows characteristics of negative and positive weight nations and indicates how conflict export patterns cluster. This monograph is a computer printout which presents a study in which patterns of conflict among nations were analyzed according to social field theory. This theory maintains that international relations is a field which consists of all the attributes and interactions of nations, can be analytically divided into attributes and behavior, and exhibits dyad formations (interactions between two nations) in matters of behavior. The monograph is part of a large scale research project undertaken to test various theories (attribute theory, distance theory, and relative status-field theory, in addition to social field theory) with regard to their ability to analyze international relations. All theories are tested on the World Event Interaction Survey (WEIS) conflict data for 1966 to 1969, which was created using the "New York Times" as a data source. In this monograph, second stage factor analysis is applied to the parameter weights for conflictual behavior among more than 100 nations (and over 16,000 dyadic rela-

tionships) using social field theory. All of the independent variables treated (economic development, population density, political stability, military power, health conditions, domestic violence, etc.) are factors—that is, composite indexes generated out of a number of related variables, using the technique of factor analysis. When social field theory is applied, each nation receives a negative or positive parameter weight on each predictive factor. The objective is to determine whether behavioral tendencies toward conflict tend to cluster. For example, if a nation tends to export conflict to other nations close below it in respect to non-competitive political systems, does it also tend to do so in respect to population density? In addition to computer printout, the document includes a bibliography and a table of contents of all monographs in the research study. (DB)

Educational Objectives and brief course descriptions for the social studies program, grades K-8, Montgomery County Public School, Rockville, Maryland, are presented. The document is organized into two sections. Section one outlines the K-6 Social Studies Design approved by the Council on Instruction in April, 1977. The design should be

implemented in grades K-5 by the 1980-81 school year. It identifies themes, organizing concepts, organizing questions, instructional objectives, and suggested topics of study by grade level. Themes focus on self and others in the community, state, and nation. Schools meeting established requirements may use "Man: A Course of Study" or "People and Technology" in Grade 6. Section two describes existing social studies programs and outlines learning objectives by grade level. Themes in grades K-6 focus on family and school, immediate and world communities, American history and geography, and past cultures. In grade 7 students study world geography and the southern hemisphere and in grade 8, world geography and the northern hemisphere. A brief bibliography of instructional guides and materials is included. (KC)

Brief descriptions of course offerings in the social studies for grades 9-12, Montgomery County Public Schools, Rockville, Maryland, are presented. Courses are listed according to required or elective. Required courses are United States History I and II; National, State, and Local Government, and Contemporary Issues. In addition, over 45 courses are offered as electives. These courses include The Black Experience in America, Advanced Placement in United States and European History, Problems of the Twentieth Century, Economics, Psychology, Sociology, Modern Urban World, Cultural Anthropology, Law, Human Behavior, Comparative Religions, and an executive high school internship. The document points out that several of the courses have been added to the social studies program as response to a call for study of major social problems and issues and for more direct student participation in and observation of these problems. Educational Objectives and course descriptions for art education, grades K-8, Montgomery County Public Schools, Rockville, Maryland, are presented. The program consists of the integration of art production, art criticism, and art history. Objectives are intended to help students become sensitive to visual aspects of their environment, aware of art forms produced by various cultures, proficient in using art for personal expression, able to solve design problems, and informed about career opportunities in art. Grades K-2 stress learning about, talking about, and producing art works. In grades 3 and 4 students participate in group activities such as creating murals, dioramas, and puppet shows. In grades 5 and 6 students become more analytical and critical in their aesthetic judgments and refine their skills and techniques. The grade 7 course provides opportunities to explore natural forms and art reproduction through imitating styles of artists. Arts and crafts of other cultures are also considered. Separate courses which encompass both grade 7 and grade 8 include drawing and design, painting, sculpture, creative crafts, and printmaking/photography. A list of instructional guides is included. Educational objectives and brief course descriptions are presented for music instruction, grades K-8, Montgomery County Public Schools, Rockville, Maryland. The system recommends that students in grades K-6 receive 100 minutes of general music instruction weekly. Objectives for these grades include development of musical perception through a wide variety of activities. Instruction focuses on heightened musical responsiveness through singing, listening, moving, composing, conducting, playing instruments, and reading musical notation. General Music is required of all students in grade 7 and is elective in grade 8. Objectives include learning about melody, rhythm, harmony, form, and timbre through a hands-on experiential approach. Emphasis is on singing, playing instruments, listening critically to recorded and live music, and creating music. Guitar instruction, a choral program, and instrumental music programs are also provided. Criteria for level advancement for instrumental music courses are outlined. A list of instructional guides and an objectives grid are included. (Author/KC)

Descriptors—Aesthetic Education, Course Descriptions, *Curriculum Design, *Dance, *Drama, *Educational Objectives, Elementary Secondary Education, Inservice Teacher Education, Physical Education, Summer Programs

Educational objectives and brief course descriptions are provided for dance, drama/theatre, and interrelated ARTS (Arts Resource Teams in Schools), Montgomery County Public School System, Rockville, Maryland. In grades K-12 dance and movement are part of the physical education department. Instruction emphasizes the potential of body movement for expressing ideas and feelings. In addition, a summer program for the gifted is provided. Drama in grades K-8 is taught by trained classroom teachers. In the early grades a child develops awareness of drama as an art form and in the upper elementary grades the student uses dramatic elements in a more controlled way. In grades 6-8 drama education emphasizes development of mimetic and vocal expression skills. Courses in grades 9-12 include introductory dramatics, theatre, advanced acting, stage design, play direction, and dramatic form. The goal of interrelated ARTS is to provide K-8 teachers with training and support in the arts. Staff members conduct inservice courses, provide demonstration lessons and workshops, work with teachers on special projects, and operate a county-wide arts resource center. (KC)

Images of the American Revolution in Children's Fiction.

Pub Date—11 Apr 80

Note—70p. Paper presented at Annual Meeting of the American Educational Research Association (Boston, MA, April 11, 1980).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143) — Information Analyses (070)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Books, *Childrens Literature, *Content Analysis, *Fiction, *Revolutionary War (United States)

This paper reports the findings of a study which analyzed both the content and form of thirty-two recommended children's novels written about the American Revolution. The novels studied were published between 1899 and 1976. The analysis of content reconstructed the historiographic conception of the Revolution which is embedded in the various novels. The second part of the analysis—that of the form or narrative structure—attempts to see the changes found in children's Revolutionary War fiction in light of the changing socio-historical milieu. The content analysis revealed that the overwhelming majority of the books legitimate a view of the Revolution which virtually ignores the complex debate which has raged among historians since the time of the Revolution itself. The books ignore the most recent research on the Revolution and present it as a "white, Anglo-Saxon, Protestant pageant." The central concern of all the novels is the manner in which the hero or heroine becomes involved with, and contributes to, the Revolution. Weak, dependent protagonists are transformed into stronger more independent adults as a result of their involvement in the war. With regard to the analysis of form, the evidence shows that novels published during two time periods (1959-1961, 1967-1976) are marked by a steady decline in the role which values play in

determining the reasons why characters act as they do in regards to the Revolution. This decline in the importance of values also coincides with the fracture of the family and family relationships. The evidence also shows that, while passage to adulthood is still the central concern of these latter day novels, there is now a preoccupation with each individual's perception of reality and a rejection of the notion that the initiates must accept the dictates of their elders. Identifiers—*United Nations

This report is a succinct summary of action taken by the 34th General Assembly of the United Nations. It is intended for use by members of UN delegations, UN secretariat staff, policy makers, scholars, students, and members of the public interested in global problems and world issues. The report provides an accurate record of actions taken, including key phraseology of the resolutions and the nature of the vote or action taken, and also gives background and past history of the items discussed, sufficient for general understanding without reference to other sources. Some highlights of the Assembly follow. In his annual "state of the world" message, the Secretary General Kurt Waldheim stated that "the primary objective of the United Nations must remain the survival of the human race and its environment in the best possible conditions." The two most popular speakers of the Assembly were Pope John Paul III and Fidel Castro. On the disarmament issue the UN approved Salt II and the comprehensive test-ban treaty (CTB). The UN seated the representatives of the former Pol Pot regime of Cambodia, accused of the massacre of millions, in preference to one sponsored by invading Vietnamese. Appeals were addressed to Iran for the release of the U.S. hostages. The Assembly adopted a USSR-sponsored resolution condemning "Hegemonism" in violation of which the USSR itself was soon to stand condemned over Afghanistan. The session plans to continue negotiations on a New International Economic Order. Costa Rica's offer to establish a new University for Peace was accepted. International Youth Year was designated for 1958. The maneuvers of South Africa concerning Namibia were condemned and the Security Council was asked to prevent South Africa from gaining nuclear weapons. The UN welcomed the peace settlement in Rhodesia. (Author/RM)

Speak Out (K-8) [and] Election '80.

Illinois State Board of Education, Springfield.

Pub Date—Aug 80

Note—94p.

Pub Type—Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—*Elections, Elementary Secondary Education, Teaching Guides, Voter Registration, *Voting

Identifiers—Illinois

These two teaching guides contain step-by-step procedures for an election education program in which all Illinois school children vote for and elect a State animal. The program, mandated by the Illinois State Legislature, is intended to provide students with the unique opportunity to learn about the entire election process through actual voting experience. The two guides—"Speak Out" for elementary teachers and "Election '80" for secondary teachers—include background information for the teachers, procedures for conducting the election, classroom activities for students, and materials simulating actual forms necessary for conducting an election. The guides recommend that the election activity be conducted on the day of the General Election, November 4. The candidates for State animal are limited to the following: raccoon, fox squirrel, white-tailed

deer, opossum, and two other animals nominated by the Illinois State Museum. Students learn about the candidates through readings and campaign speeches. Students learn about voter qualifications, absentee voting, and voting procedures. They register to vote, put out a notice of election, and serve as judges of elections and as pollwatchers. Other activities in which students are involved include classroom discussions, crossword puzzles, and interviews with adults to learn why they think voting is important. Although written specifically for use in Illinois, the guides can easily be used by teachers in other states. (Author/RM)

Preparing Instructional Objectives: Agony or Ecstasy?

Pub Date—Apr 80

Note—17p. Paper presented at Annual Meeting of the American Educational Research Association (Boston, MA, April 7-11, 1980).

Pub Type—Speeches/Meeting Papers (150) — Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Behavioral Objectives, Course Objectives, *Curriculum Development, Educational Objectives, Educational Research, Elementary Secondary Education, *Objectives, Problems, Semantics

This paper 1) discusses the problems encountered in preparing objectives for instructional programs; 2) describes an informal research project in which seven instructional designers working on the same project attempted to determine agreement on an objective; and 3) suggests how to prepare objectives so that difficulties can be minimized. One source of confusion, from the outset, is the variety of terms that are used interchangeably in referring to such learning outcomes as instructional objectives, learner objectives, training objectives, and performance objectives. Even authors of texts who prescribe the use of objectives disagree on the components of objectives. Perhaps the most vehemently debated issue that arises in the preparation of objectives rests in the language used within them. Untold costs and delays are predictable on most instructional design and development projects at the acceptance or review phase because of language differences between the developers and the reviewers. An informal research project in which seven instructional designers worked on the same project illustrates the divergence of agreement on acceptable objective statements even when instructional designers are working together. Suggestions for preparing objectives so that difficulties are minimized include specifying a format and language in preparing objectives before projects begin, using a checklist to evaluate the suitability of objective statements, preparing a sample test item at the same time the objective is being prepared, and requiring that persons preparing objectives be thoroughly trained to write objectives. Descriptors—Community Cooperation, Community Organizations, *Community Programs, Community Resources, Consumer Education, *Consumer Protection, Energy, Food, Health, Housing, *Inflation (Economics), Models, Program Descriptions, Resource Materials

This publication describes what approximately 100 groups around the country are doing with regard to food, housing, energy, and health to beat inflation on the neighborhood level. The book is intended as a resource for citizens wishing to take the kind of consumer action that will save them and their neighbors money. Some of the programs featured are saving families hundreds of dollars annually. For instance, several groups are promoting community and backyard gardening. In 1979, backyard and community gardening projects nationwide produced \$13 billion worth of produce. Another example is a corporate-sponsored ridesharing program in California which saves commuters \$4 million in commuting costs and an estimated two million gallons of gasoline each year. Other groups have found less tangible ways to save while making life more enjoyable for those they serve. For example, some organizations are giving residents a new sense of pride by revitalizing their neighborhoods. In St. Louis, a dynamic innercity group has renovated \$15 million worth of housing, created jobs for 450 residents by luring a shoe factory into the area, and opened a low-cost medical clinic. Many groups are fighting inflation by finding alternatives to the traditional marketplace. They have developed programs to promote medical self-care, food co-ops, and self-help home repairs. In New York City, for example, a homelike childbearing center offers residents an alternative to traditional hospitals. Still other groups are using old-fashioned political methods to achieve their goals. For example, in Cape Cod, Massachusetts a citizens coalition successfully lobbied a local hospital to adhere to a Federal law and provide emergency care for poor people. In addition to the descriptions of group projects, the resource contains lists of organizations that are eager to help consumer groups nationwide by providing published materials, technical assistance, or in some cases, funding. Information on federal programs that will be of assistance is also provided. (Author/RM)

Reports are made of a meeting of ten Asian representatives to the United Nations Educational, Scientific, and Cultural Organization (UNESCO) at the Regional Office for Education in Asia and Oceania, in Bangkok in the fall of 1978. It was the responsibility of this group to explore the following topics: (1) To study and analyze the experiences of the participants related to training methodologies and new educational techniques; (2) To explore possibilities of adoption of new techniques; (3) To explore possibilities for adoption of new techniques for the promotion of functional education for out-of-school youth and adults; (4) To develop guidelines for use of educational innovations taking into account various sociocultural contexts; and (5) To develop proposed elements for country draft plans. The news series contained in this book describe educational practices that have worked well in six states. The schools studied include elementary and secondary programs in the rural North and Midwest, the urban East, and suburban and rural South. Each educational journalist selected a group of schools that were judged outstanding by scholastic or social standards and devoted several months to classroom observations, and interviews with school personnel, parents, and students. Their findings explore subjects ranging from community attitudes, to the effectiveness of teachers and principals. Together, these reports show that many schools do work well in diverse settings around the country. (Author/CJ)

Linkages between local schools and teacher education institutions are considered an essential factor in preventing isolation of these institutions from the realities of field situations. Participating directly in educational reform programs is an effective strategy that teacher education institutions can use in making their innovations relevant to the needs of the country. Since there is an increasing emphasis on teacher competence, techniques for evaluation of the minimum acceptable performance of teacher trainees are urgently needed. Educational materials are scarce and teacher trainees should be actively involved in the study, construction, and use of material aids. Developing countries may not be able to await detailed research findings before mass implementation of an innovation. Long term planning for mass implementation and active sharing of experiences are important. The nature of the role of the UNESCO field staff member has evolved from an executive to an advisory function in these countries. (JD)

Identifiers—India, Indonesia, Japan, Korea, Malaysia, Philippines, Singapore, Thailand

This publication is a compilation of twenty-four studies on Asian experiences with new educational techniques for preparing educational personnel in response to demands for the universalization of education. Ten of the studies were originally presented at a study group which met in Bangkok, Thailand, in the fall of 1978. These studies have been supplemented by case-study reports drawn from the national advanced-level workshops for teacher educators in member countries, inventories of educational innovations, and contributions by individual authors. These case-studies are grouped into three categories: (1) open learning and distance teaching; (2) programmed learning and microteaching; and (3) other new education techniques. The categories help to delineate some major trends as countries in the region explore ways and means to make their teacher education systems responsive to their particular ecology, socioeconomic status, and aspirations. This publication forms a part of a series by means of which the Asian Centre of Educational Innovation for Development is disseminating information about current educational innovations in countries in Asia and Oceania. Identifiers—*Florida

This bulletin contains the specifications for the reading, writing, and mathematics subtests of the Florida Teacher Certification Examination. The reading test uses the multiple-choice Cloze procedure and consists of ten passages of approximately 100 words selected from textbooks, journals, documents for teachers produced by the State Department of Education, and teachers' manuals for tests in common usage in Florida. A general description of the test is provided along with item specifications, domain of materials to be sampled, and references. Scoring for the writing test will be based on rhetorical quality, structural and mechanical quality, and observance of conventions in writing. Following a general description of the writing test, information is provided on criteria for topic selection and item specification. Examples of writing scored at various levels are presented and references are included. The mathematics test consists of multiple-choice items testing skills in basic computation, interpretation of data, solving measurement problems, and applying mathematics skills to solve real world

problems. Item specifications for the mathematics test are provided. (JD)

This bulletin contains the specifications for the Professional Education subtest of the Florida Teacher Certification Examination. The specifications presented are being used for the 1980-81 examinations. General information on the test includes an outline of the content base, a content base/competency matrix, and a blueprint of the test by content base and by competency. Item specifications are given for each competency tested. They provide a general descriptive rationale for the competency and also specific stimulus and response attributes generally accepted as good practice. A specification supplement is provided which outlines the content base of the examination. A bibliography of reading references for the test is provided. These references include: (1) writings on class management; (2) student development; (3) evaluating; (4) recording and reporting student progress; (5) instructional materials and objectives; and (6) learning and teaching. Identifiers—Sweden. United Kingdom. United States

A detailed conceptual framework describing curriculum development pursuits as they are actually carried out in a cross-section of developed countries is presented. The nations surveyed were Sweden, the United Kingdom, and the United States. The ultimate goal of the study is to make available to developing nations, facing profound social changes, a source text and guide to possible educational applications and decisions that these nations may make in working out their own educational destinies. Case studies of the surveyed nations were written using data based on questionnaires and interviews with a broad spectrum of education professionals engaged in teaching and administration at all levels from kindergarten through college. Common concerns and shared patterns of curriculum development are described. (JD)

The research on which this report is based has aimed at an assessment of the nature of reform of education content and associated processes in developed Western nations as well as in the Arab world. Chapter 1 is designed to clarify the concept of "education content" and to specify processes involved in "content reform," as these terms are used and understood in the educational literature of the modern world. Chapter 2 explores the relevance these concepts and processes have had in the development of education in several Western nations. Chapter 3 reviews the current status of education content change efforts in the Arab world, and Chapter 4 indicates some directions which future reform may take. (JD)

Arabia, Sweden, Tunisia, United Kingdom, United States

The intention of this report is to create a compact resource which may prove helpful to educators charged with the responsibility of reforming the educational systems and vitalizing the learning experiences for students in the Arab world. Educators in Sweden, the United Kingdom, and the United States were surveyed. Trends are noted for increased decentralization of the schools, development of comprehensive schools, more active participation of public and private constituencies in educational planning, and government support for educational reform in these Western nations. An overview is given of the reform of educational content in progress in the countries of Egypt, Iraq, Kuwait, Qatar, Saudi Arabia, and Tunisia. Critical elements in successful educational change are described and the role of the educational change agent in planning for future developments is discussed. (JD)

Identifiers—Egypt, Iraq, Kuwait, Qatar, Saudi Arabia, Tunisia

This study presents a formative evaluation of the curriculum development process in republics, states and kingdoms of the Arab world. It contains an overview of curriculum changes that have occurred in Arabian educational systems over the past two decades, the effects of these changes, and the attitudes toward the future of educators who have been involved in the changes. Educators in Egypt, Iraq, Kuwait, Qatar, and Tunisia responded to questionnaires and interviews. This research is divided into three parts: (1) tabulation and interpretation of the questionnaire, using inspection rather than statistical methods of analysis; (2) presentation of case studies for each individual country; and (3) a summary chapter, synthesizing the data from all sources and stating tentative conclusions and recommendations. (JD)

Perceptions of Educational Practices (PEP) as Viewed by Three Educational Populations: (1) Cooperating Teachers; (2) Student Teachers; and (3) Administrators.

Pub Date—Feb 80

Note—31p. Best copy available.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Administrators. *Attitudes. *Cooperating Teachers. *Curriculum Development. *Educational Practices. *Family Life Education. *Human Relations. *Individualized Instruction. *Inservice Teacher Education. *Interpersonal Competence. *Minimum Competencies. *Parent Teacher Cooperation. *Student Responsibility. *Student Teachers. *Year Round Schools

Perceptions of educational practices were compiled from three educational populations (cooperating teachers, student teachers, administrators). Six questions were asked: (1) What are the important goals of the school? (2) What practices should be implemented in the school curriculum? (3) What practices should be implemented in the school's total program? (4) What are the best features of the school? (5) What might be undertaken to improve the school? (6) What elements of the school's program might be eliminated? A rank ordering and statistical treatment are provided for the first four questions. Answers to the last two questions, which

are open-ended, are listed. (CJ)

Need and Proficiency of Teacher Competencies as Perceived by Student Teachers vs Practicing Professional Teachers.

Pub Date—80

Note—13p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Classroom Techniques. *Elementary Secondary Education. *Individual Instruction. *Needs Assessment. *Program Evaluation. *Self Evaluation (Individuals). *Student Evaluation. *Student Motivation. *Student Teacher Relationship. *Student Teachers. *Teacher Administrator Relationship. *Teacher Education. *Teacher Effectiveness. *Teachers

This study compares the perceptions of student teachers and veteran teachers toward a selected set of competencies. It determines the degree of need judged by teachers for each competency and the level of proficiency they feel they have attained. Fifteen competencies were listed on the questionnaire submitted to participants in the study. Student teachers responded to the questionnaire before and after their teaching experience. Practicing professionals responded once. A consistency of feelings as to the need for competency in classroom management, student motivation, individualizing instruction, and evaluation techniques was found at all levels of experience. The implications of these findings for teacher education programs are discussed. (JD)

Teacher centers serving teachers in Great Britain differ from those in the United States. London's University Centre for Teachers (UCT) provides a range of part-time inservice activities that result in various diplomas. The Philippa Fawcett Math Centre concentrates on improving mathematics understanding and instruction. Two other centers, the Gordon Teachers' Centre and one developed by the Lothian Regional Council in Edinburgh, Scotland, are multipurpose and provide support services, resources, and professional help. Feldhusen, John F.

Experimental Research on Teaching and the Evaluation of Teaching in Higher Education.

Pub Date—Apr 80

Note—17p. Paper presented at the American Educational Research Association conference (Boston, MA, April 1980).

Pub Type—Speeches/Meeting Papers (150) — Information Analyses (070)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Classroom Environment. *Componential Analysis. *Educational Research. *Experimental Programs. *Higher Education. *Instructional Materials. *Instructional Systems. *Student Evaluation of Teacher Performance. *Student Teacher Relationship. *Teacher Behavior. *Teacher Evaluation. *Teaching Methods

A review of the concept of complex instructional treatments demonstrates that componential analysis is needed to properly identify the effective elements of an instructional system. Research should focus on both the system and the effectiveness of its parts. Research on teaching also requires that the complex interaction of the teacher's behavior with student behavior, instructional materials, and classroom environment be controlled or assessed. This self-instructional manual offers knowledge and skills needed to make reliable and accurate perceptual evaluations about teacher candidates. The first chapter describes traditional approaches to the study of teacher effectiveness and the problems that necessitate the formulation of new approaches. Chapter Two describes the research and summarizes the perceptual view of effective teaching. The process and rationale for making perceptual inferences are discussed in Chapter Three. Chapter Four contains practice material to be used for skill improvement in making perceptual inferences. Chapter Five contains additional practice materials and the procedure for evaluating responses to human relations incidents. The final chapter discusses the methods for the selection of effective teachers. Instructions for asking teacher candidates to write human relations incidents and a bibliography on the perceptual approach to teacher effectiveness are appended. (Author/CJ)

*Evaluation Criteria, *Programmed Instructional
Materials, Role Perception, Self Concept, *Teacher
Attitudes, Teacher Characteristics, Teacher Effectiveness,
Teacher Selection

Research indicates that perceptual characteristics
(attitudes about oneself, students, and the task of
teaching) are indicators of teacher effectiveness. A
major problem that has limited the application of
this research to teacher selection has been the difficulty
involved in assessing perceptual orientation. This study
was designed to develop and test self-instructional
materials which could help to assess the attitudes of
teacher candidates. Results indicate that training with
the self-instructional materials may provide more
objective or uniform criteria by which to make
evaluations that traditionally have been ignored or
left solely to intuition. (Author/CJ)

Identifiers—Pennsylvania

By describing and defending six assumptions
about teacher education, the Pennsylvania Association
of Liberal Arts Colleges for the Advancement of
Teaching (PALACAT) defines the purposes, goals,
needs, and foundations of teacher education. The
role of research in teacher education and current
practices in teacher education are analyzed, and a
four stage sequence for teacher education that
meets the position statements of PALACAT is
proposed. The program includes: (1) a strong
undergraduate base of foundational studies blended
with field experiences; (2) a closely supervised one-
year period that initiates the beginning teacher into
the profession; (3) a period of continuing induction
that enables teachers to develop skills and attitudes
necessary for full professional status; and (4) an
ongoing program of inservice education and
professional development. (Author/CJ)

Commercialized approaches to public recreation
may solve the financial and budgetary problems that
many public recreation programs currently face. Case
studies document the success of some commercialized
approaches, including: (1) borrowing techniques from
business and commercial recreation programs; (2)
creating revenue producing facilities and programs; and
(3) creating a joint venture between public and
commercial agencies. The attitudes, service philosophies,
legislation, legal liability, political and social
environment, and the personnel involved with the
strategy should be considered before adopting it. (CJ)

Descriptors—Academic Achievement, *Grade
Prediction, Predictive Measurement, *Program
Evaluation, Research Methodology, Student
Teachers, *Student Teaching, Success, *Teacher
Education

The purpose of this study was to validate on a
second sample of student teachers, prediction equations
developed to predict performance in student teaching.
The study was part of a longitudinal project. Equations
tested in this study were produced in a previous study
by subjecting to multiple regression techniques six
biographical and 40 psychological test scores for the
141 subjects who completed their student teaching
between the spring of 1974 and the summer of 1975.
The prediction equations which were developed for
various groups of students in that group were then
applied to the data for the 200 students in a second
sample to calculate their predicted grades in student
teaching. The predicted grades were then compared with
the actual grades received by the student teachers. (Author)

**Efficacy and Experience: The Relationship Between
Locus of Control and Years of Teaching Experience.**

Note—9p.

Pub Type—Reports - Research (143) — Information
Analyses (070)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Academic Achievement, *Locus of
Control, *Self Concept, Student Behavior, *Teacher
Attitudes, Teacher Behavior, *Teacher Effectiveness,
*Teacher Morale, *Teaching Experience

Previous research has shown that teachers' sense
of efficacy is an important presage variable associated
with student achievement. Stereotypes evolving from
this research include both positive and negative
correlations between teacher perception of effectiveness
and teaching experience. This research examines the
relationship between years of teaching experience and
a sense of efficacy as measured by teacher perception
of external control (luck, fate, chance, etc.) and
internal control (behavior that does have an effect). A
low positive correlation was found between perception
of effectiveness and years of experience. Alternative
explanations are given for the findings and the need
for further research is indicated. (Author/CJ)

Menges, Robert J.
Incentives and Motivation in the Teaching-Learning Process: The Role of Teacher Intentions.

Pub Date—80

Note—10p.; Paper presented at the International Congress of Psychology (22nd, Leipzig, Germany, 1980).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Behavioral Objectives, Decision Making, *Individual Power, *Intentional Learning, Interaction, *Learning Motivation, *Learning Processes, Psychological Patterns, Social Behavior, Student Teacher Relationship, *Teacher Attitudes, Teacher Behavior

The theory of "reasoned action" is applied to the teaching-learning process. This theory asserts that people use the information available to them in a reasonable manner to arrive at their decisions and that a person's behavior follows logically and systematically from whatever information he has available. To illustrate application of the theory to instructional situations, data is used from teachers in two settings: (1) nurses teaching hospitalized patients; and (2) clinical instructors teaching nursing students. Results indicate that teacher reports of beliefs and attitudes are closely related to their stated behavioral intentions but only weakly related to independent observations of behavior. Because some intentions are more closely related to attitude and others to the subjective norm, the study of teacher intentions can be informative for teaching improvement programs. (Author/JD)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Classroom Techniques, *Educational Cooperation, Educational Research, *Feedback, Professional Recognition, Program Development, *Program Improvement, Social Sciences, Teacher Centers, *Teacher Education, Teacher Effectiveness, Teacher Influence, Teacher Participation

The reliance of teacher education programs on social science research as a knowledge base is inadequate to meet the full demands of the teaching profession. While courses in the educational social sciences such as human development, learning theory, and child psychology are to some extent valuable, this training does little to prepare teachers for the day-to-day demands of teaching. The nature of educational practice points to the need for a different body of knowledge to inform teaching practice, one that would accompany, and, in some ways, supplant that provided by social science. This body of knowledge should be drawn from experiences and skills closely tied to the actual demands of teaching and largely influenced by practice in the classroom. This new body of professional knowledge can be developed by increasing opportunities for teachers to analyze practice and to share knowledge with their colleagues. Innovations in teacher education programs should include more practitioners teaching in the university setting, more collaborative research in the classroom, and opportunities for sabbaticals for teachers so they may develop and reflect upon their practice. Descriptors—*Educational Anthropology, *Educational Change, *Educational History, Educational Needs, *Educational Philosophy, Educational Principles, Futures (of Society), Higher Education, Program Development, *Teacher Education, Teacher Educators

Historical essays examine the characteristics of the education professoriate and its quest for a science of education. The first paper shows how the expansion of public schooling in the early nineteenth century prompted school personnel to look for a science of education in order to improve their practice and schools, and to gain recognition for the evolving education professional group. The next paper outlines the work of Michael Vincent O'Shea, who worked diligently to gain respect for teacher education on the university campus. Charles Judd, who helped to build an outstanding School of Education at the University of Chicago, is the subject of the third paper. The last essay summarizes the underlying concepts and goals in the other papers and indicates future tasks for the education professoriate. Most important among these is an increased reliance on qualitative information, based on observation and experience. This sort of information can provide insight which is "scientific" and just as valuable as quantitative research. (CJ)

Leisure Studies: Discipline or Profession.

Pub Date—79

Note—9p.; Paper presented at the National Research Symposium for the Society of Park and Recreation Educators (New Orleans, LA, 1979). Pub Type—Speeches/Meeting Papers (150) — Reports - Evaluative (142)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Curriculum Design, *Educational Needs, *Educational Objectives, Higher Education, Intellectual Disciplines, *Interdisciplinary Approach, *Leisure Time

Certain basic characteristics of a discipline are a particular focus of attention, a unique body of knowledge, and a specific mode of inquiry. Although the field of leisure studies fails to measure up to the standards of a discipline, an interdisciplinary approach can be used to promote integration of knowledge, freedom of inquiry, and intellectual curiosity. The definition of an interdisciplinary approach proceeds in three steps: (1) the exploration and mapping of the minimal conceptual frameworks presupposed by the disciplines involved; (2) the application of different disciplines to particular problems that are considered beyond the proper territory of these disciplines; and (3) the comparison of the utility of the expanded disciplines with respect to problems that could present a common challenge. Problems inherent in interdisciplinary leisure studies are autonomy of established disciplines and administrative competition. To achieve the scope and depth required, the leisure studies field cannot develop without cross borrowing from other disciplines. (CJ)

McCalep, George O.
The Role of the Physical Educator in Youth Sports.

Note—7p.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Athletics, Citizen Participation, Educational Research, Elementary Secondary Education, *Physical Education, Positive Reinforcement, *Program Improvement, Teacher Participation, *Teacher Role, *Teachers, *Youth Programs

Professional physical educators can facilitate, encourage, and promote a significant contribution to the social institution of youth sports through the roles of positive acceptance, active participation, and research. A positive attitude of acceptance relative to the impact and influence of youth sports on the profession as well as on society in general will help the physical educator and nonprofessional community volunteers to work together in youth sports programs. Active participation involves the professional physical educator in seeking tangible ways to intervene and contribute to the welfare of youth sports. Physical educators can serve as coaches, officials, community leaders, information disseminators, and as members of central governing councils. The physical educator can also make a contribution to the institution of youth sports as a researcher, since an understanding of sports becomes important in the development of an understanding of society in general. The physical educator has a professional obligation to do his part to enhance the welfare of the participant and society in general as it relates to youth sports. (CJ)

Descriptors—Administrator Role, *Curriculum Development, *Decision Making, *Educational Innovation, Elementary Secondary Education, Instructional Improvement, *Instructional Innovation, Principals, School District Spending, Teacher Effectiveness, Teacher Influence, *Teacher Participation, *Teacher Role

Three major studies of the role of teachers and other school district professionals in educational

decision making and in initiating innovations, spanning the 1968-1973 time period, are reviewed and compared. A probable increase in the role of teachers as initiators of innovations is evident. Data on teachers and others as innovation initiators are shown to vary by: (1) the job position of the informant; (2) the size of the district; (3) the wealth of the district; (4) the grade level of the school; and (5) the level of professionalism of the instructional staff. Teacher participation in educational decision making is most evident in curriculum and instruction, but it is usually confined to advisory or collaborative roles except for areas under the teacher's direct control, such as methods of instruction and scheduling. There is evidence that school district size and wealth, and teacher professionalism, as well as the school's organizational structure affect levels and kinds of teacher participation. It is suggested that it may be a minority of teachers who are repeatedly involved in the initiation of educational innovations, and that major innovations tend to be initiated by and decided on by administrators. Descriptors—Communications. Cost Estimates. Delivery Systems. Higher Education. Information Dissemination. Outreach Programs. Policy Formation. Program Budgeting. Program Development. Program Evaluation. Program Validation

Identifiers—Teacher Corps

The Teacher Corps has been directed to put a greater focus on demonstration, documentation, institutionalization, and dissemination of the results of Teacher Corps projects. This report deals with program policy alternatives for improving the dissemination of project-developed products, practices, and processes to educational agencies and institutions. Resource requirements for maintaining efficient operation of an information sharing system over a five-year period are examined. Projections are made on the resources that would be necessary to support program outreach activities at minimum, middle, and maximum levels. An attempt is made to identify effective means for Teacher Corps projects to extend the impact of their school improvement programs beyond their local sites. Techniques for establishing an effective dissemination system are described and the feasibility of applying these practices in Teacher Corps projects is discussed. Detailed cost projections for implementing Teacher Corps information dissemination projects of varying size and efficacy are provided. (JD)

Identifiers—Ontario. Streaming (Education)

An overview is provided of streaming in the Toronto school system and a summary of studies presented from Toronto and other Ontario school systems which have examined the relationships between streaming and academic achievement, ethnic background, social origin and future placement of students. Streaming is defined as the placement of pupils in groupings according to a criterion such as ability, achievement, interest, need, or a combina-

tion of these factors. In this way, pupils can proceed toward appropriate educational goals at an appropriate rate. Detailed information is given on the relationship between streaming and the following variables: (1) literacy; (2) math and technical skills; (3) racial background; (4) language and country of origin; (5) social and economic status; (6) future school/job placement; (7) mental and physical disabilities; and (8) academic achievement. Data is provided on streaming at both elementary and secondary level public schools. (JD)

Information Dissemination. Inservice Teacher Education. Instructional Materials. Program Costs. Program Development. Program Evaluation. School Health Services. Trend Analysis

Identifiers—California. Nevada. Utah

A study designed to assess health education in public schools in California, Nevada, and Utah is reported. Results are compared to those of the School Health Education Study (SHES) which was conducted twenty years ago. Information is provided on the needs, goals, programs, participants, and materials of school health education in large, small, and medium sized school districts. Data was gathered through interviews with key state personnel and questionnaires sent to school district personnel. While many concerns mentioned in both this study and the SHES overlap, changes have occurred in health education in the past 20 years. The introduction of education concerning abused substances at a much earlier age has recently been considered crucial. A trend is seen towards teaching health education as a separate subject beginning in the fourth grade. More required and elective health education courses are now offered in secondary schools. Findings suggest that while inservice opportunities for health educators are limited because of lack of funds, there is a more extensive use of existing health resources in the community. Greater cooperation between schools and the local community medical establishment is recommended. It is pointed out that improved local, state, and national level communication networks are needed. Descriptors—Attribution Theory. Classroom Environment. Classroom Research. Classroom Techniques. Cognitive Development. Cognitive Processes. Educational Sociology. Elementary Secondary Education. Outcomes of Education. Socialization. Student Behavior. Teacher Behavior

Different research traditions on social cognition are reviewed to determine how they can be used in the study of classroom life. A structural-developmental perspective is more applicable to the study of the social cognitive outcomes of schooling than to the explanation of student behavior in the classroom. The information processing approach should be applicable to research on teachers' thinking and

the knowledge structures that students construct from their social experiences at school. Attribution theory research provides a promising, new perspective for analyzing how classroom processes influence the motivation of students. Ethnomethodology, a sociological approach that examines social interactions to determine social structures, offers interesting hypotheses but must find ways to draw convincing inferences about the social cognitive processes. A good theory for directing research on this issue is both social and cognitive, and should consider the contextual, environmental factors that influence students' thinking. (CJ)

Descriptors—Classroom Techniques. Curriculum Design. Educational Assessment. Educational Change. Field Experience Programs. Higher Education. Institutional Evaluation. Instruction. Policy Formation. Preservice Teacher Education. Professional Development. Program Design. Program Improvement. Teacher Certification

A perspective is given and recommendations are made for restructuring education personnel development with major emphasis on preservice teacher education. Issues facing teacher education are put in a socio-historical context. It is stated that teacher training has been largely separated from the public school system, and that training has been overloaded with pedagogical theory before the prospective teacher's experience is broad enough to absorb it. The potential institutional arrangements required for a professional school of pedagogy are examined. A proposed program in pedagogical education is presented, with its focus on the ability to do the job for which training is given. This program is mainly field-based with the campus serving for basic field preparation. Types of knowledge are identified and their characteristics discussed by showing how each type functions in teaching behavior. What is known about how to teach skills and concepts to teachers is delineated. The final section presents ways to bring about the proposed changes. The role and responsibilities of college faculty and what sort of coalitions will be necessary to effect new policies and programs of pedagogical education are discussed. (JD)

Descriptors—Educational Administration. Education Majors. Higher Education. High Schools. Instructional Development. Interpersonal Competence. Physical Education. Preservice Teacher Education. Role Perception. Socialization. Teacher Attitudes. Teacher Educators. Teacher Responsibility

Future teachers' attitudes about the role of teacher changes over time. At the teacher preparation level, two of the key positions defining the role are the faculty members and the prospective teachers. Studies relating to the socialization process in teacher preparation indicate that the views of prospective teachers changed throughout the professional program and grew to be similar to those of the professors. A study of teacher educators and future teachers in the secondary physical education field shows that both groups defined the subroles of the teacher as instructor, interpersonal interactant, planner, professional member of a school staff, and program manager. Differences in the way prospective teachers and faculty members view the role were that teacher educators showed more consensus than the students, the students also had a tendency to view all competencies as of great and equal importance, and the faculty rated the subrole of instructor as more important than interpersonal

interactant while students ranked interpersonal competence as slightly more important. Teacher educators and teacher education programs need to formally assist the student in developing the teacher role definition by describing the best role of the physical education teacher and teaching according to this model. Identifiers—*Caribbean

The changing patterns of Caribbean society have affected and will continue to influence the concept of professionalism as it is applied to teaching. Teachers' organizations should promote the professional development of their members, as implied through acceptance of standards of personal conduct, competence on the job, and commitment to student and national needs and goals. This workshop identified future goals for teacher professionalism in the 1980's pertaining to: (1) education for the teaching profession; (2) the public image and the status of the teacher; and (3) teacher organizations and the professional development of their members. Recommendations for professional actions to be taken toward each of these topics emerged from beliefs that the goals of teacher organizations should be based on professional considerations, having in mind overall educational needs, and that the scope of action to achieve these goals should depend on national circumstances. The extreme variability of the 50 projects under the NIE Program to Increase the Participation of Minorities and Women in Educational Research and Development necessitates an evaluation design that is flexible enough to accommodate significant differences in project characteristics, yet comprehensive enough to allow meaningful aggregation of cross-project data for evaluation at the program level. This report of a program evaluation method that meets these two objectives is divided into two parts. Part I includes descriptive overview data on major project dimensions that clearly illustrate the wide diversity of the characteristics among the 50 projects. Two key variables, project orientation and targeted participant population, emerged as a basis for logical sub-grouping of projects into a classification matrix. In Part II, possible methods and timing of data collection approaches are outlined in depth and potential data sources are reviewed. The section also outlines a conceptual framework that focuses on the context and process factors influencing project activities and potential outcomes. A final section details a series of recommendations directed to NIE policy makers, program-related personnel, and others interested in the problem of increasing the participation of women and minorities in educational research and development. Descriptors—*Civil Liberties, Developing Nations, Elementary Secondary Education, Global Approach, *Labor Education, Labor Legislation, Postsecondary Education, Program Design, *Responsibility, Rural Development, *Teacher Associations, Teacher Education, *Union Members, *Unions

It is vitally important for workers in all regions of the world to form unions and to exercise the rights and discharge the responsibilities which membership involves. The right to organize or join a union is essential not only for the welfare of the individual worker, or for all of those belonging to the union, but also for the welfare of society at large. The World Confederation of Organizations of the Teaching Profession believes that education for rights and responsibilities of trade union membership should be a major component of trade union education programs and of all educational institutions. The young people who will enter the work force are potential trade union members and need to be aware of the rights and obligations involved. Recommendations for trade union education at all levels and institutions of education (including goals for teacher education programs) evolve from discussions on: (1) rights and obligations of trade union membership; (2) the role of teacher unions as trade unions; (3) democracy in trade unions; (4) the role of trade unions in developing nations; (5) the role of trade unions in rural development; and (6) the need for trade union education. Descriptors—Conflict Resolution, *Cooperative Planning, *Curriculum Design, *Educational Planning, *Educational Responsibility, Environmental Education, Forestry, Higher Education, *Interdisciplinary Approach, Landscaping, Physical Education, Recreation, Wildlife Management
Identifiers—*Leisure Studies

Many universities have several administrative and departmental units interested in teaching some portion of leisure science. Competition for responsibility, or turf, and duplication need to be kept at a minimum. At the Ohio State University, agreements as to respective roles were reached between the program in Parks and Recreation Administration and the programs in Health, Physical Education and Recreation, Forestry, Environmental Education, Fisheries and Wildlife Management, and Landscape Architecture. Steps in defining the areas of responsibility included a self-evaluation and long range plan, discussion with each of the other programs, compromise, and agreement as to responsibility. Each of the administrative units concerned with recreation separately defined its objectives, faculty strengths, and capabilities. Departmental faculty: (1) interpreted its role as assigned by the original mission of their school; (2) determined areas of competency; and (3) selected subject areas as being within its mission and competency. "Turf conflicts" between each of the departments were worked out with compromise. Communication, both internal and external, enabled all parties to keep working at the problem until a solution was reached. (CJ)

Lujan, Jaime

How Teacher Behavior Relates to Student Effort in Classrooms for Low and High Status Students.

Note—14p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Academic Achievement, *Academic Persistence, *Classroom Environment, Elementary Secondary Education, Positive Reinforcement, Socioeconomic Status, Student Attitudes, *Student Motivation, *Student Teacher Relationship, Teacher Attitudes, *Teacher Behavior

Differential treatment of students by teachers (degree of warmth and friendliness) is helping to account for the failure of low-achieving students. Warm, friendly teacher behavior does not affect student academic achievement directly. Achievement requires effort-engagement on the part of the student as a necessary but not a sufficient condition for successful performance. Teacher warmth influences primarily effort-engagement behaviors which in turn affect achievement. Nineteen teachers were observed in 109 high school class sessions in a suburban school, and 24 racially integrated elementary classes were observed with race as a status characteristic to compare behavior towards low-achieving and high-achieving students. Praise was recorded whenever a teacher made positive encouraging remarks about student effort or academic work either individually, in small groups, or to the entire class. Data reveal that low-achieving and low status students who are unable to do grade level work perceive that the teacher is warm and friendly. Students who are high in academic skill level perceive teachers as less warm. There is some evidence that teacher praise is not seen as a reward for work well done but as part of a diffuse reinforcing of the individual. Further study of teacher warmth is needed. (CJ)

Descriptors—*Cooperative Planning, Delivery Systems, *Educational Cooperation, *Educational Research, Elementary Secondary Education, Higher Education, Information Dissemination, *Interaction, *Program Design, Program Implementation, Research Utilization, *Teacher Participation

There is clearly a need to develop strategies that will increase the likelihood that research on teaching will produce results that can and will be applied in the classroom. Problems resulting from the traditional theoretical structure for implementation of educational research arise from the isolation of its components and participants (research, development, dissemination, and adoption), lack of cost effectiveness, lack of communication, and time lags. Criteria for a new approach to educational research and its applications include: (1) Educational research should be available for widespread classroom application in a reasonably short time; (2) Research results should move directly to the classroom with minimal reliance on intermediate (training) products; (3) The research and development process should be interactive, with daily communication between participants; (4) Research on teaching and the corollary training of teachers should be concerned with the multiple dimensions of teaching; and (5) Research on teaching should emphasize the most effective forms of teaching. An Interactive Research and Development Model, proposed by the Far West Lab, brings together the teacher, researcher, developer, and the teacher trainer as an educational research and development consortium. This approach both researches the teaching-learning process and provides a process for the development of its constituents. (CJ)

This document reports on the second year of a project developed to improve the cardiovascular health of elementary school children. The project objectives in the second year were to refine and expand the curriculum which included components on cardiovascular health, nutrition, and physical fitness. Increased family awareness and involvement were also sought. One responsibility assumed by the project was collection of baseline data to establish norms for children ages 6-12 years. Participants were randomly selected for the test and control groups, but children who had participated in the first year of the project were placed in a maintenance group to monitor their progress on a longitudinal basis. Program activities included vigorous physical exercise, classes on nutrition and a health lifestyle, and periodic monitoring of heart rate and lung capacity. Informational packets and a newsletter

were sent to parents. Data on the project are presented in both narrative and tabular form and requirements are set forth for implementing a similar program in the public schools. Results indicated a significant improvement in the children's physical fitness, nutritional status, and health knowledge. (JD)

The emphasis of this book is on means to meet teacher inservice needs more adequately in a teacher center setting. Process steps for planning and developing inservice programs based in teacher centers are outlined. The role of the central planning committee is crucial to the establishment of a successful teacher center. The responsibilities of this committee include setting policy, securing operating funds, selecting client groups, monitoring programs, and providing direction for the program in general. In identifying needs for a center, the teachers themselves are an integral element in and should be well represented on the central committee. Cooperative planning for a teacher center involves not only the assessment of needs, but the identification of problems, and use of educational resources and research results in solving the problems. These activities should be collectively addressed by all center personnel working together in teams or on committees. Planning sequences are provided in this publication with sample worksheets that may be used to establish priorities, plan actual workshops, select materials, and evaluate and review procedures. (JD)

Descriptors—Adult Development, *Change Agents, College Faculty, *Educational Change, Educational Innovation, Elementary Secondary Education, Higher Education, *Inservice Teacher Education, Interaction, Needs Assessment, *Organizational Change, *Program Development, Self Actualization, *Staff Development, Teacher Participation

The contents of this volume are directed to designers and managers of staff development programs. It is designed to provide a systemic consideration of all factors involved, including the long-range goals of staff development, the behaviors of the people involved, the interface of existing organizational structures, and the mechanisms for program planning and development. The potential for systemic educational programs is described, models of programs are presented, and implications for teacher education are discussed. The dimensions of educational systems and change are outlined in the first two chapters. Chapters 3 and 4 focus on changing people. The attitudes, aptitudes, perspectives, and values of the professional staff to be

trained, the trainers of the staff, and the community as a composite of individuals, are considered as interacting elements in the change process. The fifth and sixth chapters examine inservice education from the communication/organizational perspective. The structures for staff development programs are described in rural and urban settings. The last section considers programs and their development. Emphasis is placed on the importance of needs assessment in developing an inservice program. An approach to planning that has proved effective in a number of workshops is provided. (JD)

Teacher Education Institutions: Cooperative Arrangements Survey, 1980.

Pennsylvania State Dept. of Education, Harrisburg.

Pub Date—80

Note—16p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*College School Cooperation, Cooperative Programs, Curriculum Development, Educational Resources, Higher Education, Information Dissemination, Inservice Teacher Education, *Institutional Cooperation, Needs Assessment, *Program Evaluation, *School Districts, *Schools of Education, Trend Analysis

The primary purpose of the reported survey was to identify the extent of cooperative arrangements between local school districts and institutions of higher education (IHE's) with approved teacher education programs. The survey also sought information on current service activities that IHE's are engaged in with school districts and the potential need areas in their future relationship with school districts. The survey population consisted of teacher education contact persons working at the IHE's. These individuals act as liaison between the IHE and the Pennsylvania State Department of Education. Results indicate that although there is widespread activity on many program levels, there does not seem to be a significant difference in the organizational activity level. Both individual professors and the institutions, as a whole, are equally engaged in cooperative activities with local school districts. There appears to be a slight movement towards a greater sharing of resources through information dissemination, exchange of materials, formalized referral systems, and personnel exchange. This movement reflects a need felt by both the school system and the IHE's. Other needs identified were: (1) more information available on educational innovations; (2) consortial arrangements for developing and providing cooperative programs; (3) information about resources and technical assistance; and (4) maintaining a data base for and about education. Results of the survey questionnaire are appended to this report. (JD)

Descriptors—*Ability Grouping, *Academic Achievement, Elementary Education, Evaluation Criteria, *Individualized Instruction, Self Concept, Small Group Instruction, Social Behavior, Student Attitudes, *Student Characteristics, *Teacher Attitudes, Teaching Methods, Time Factors (Learning)

This study examined ability grouping of students in relationship to the amount of time they received from teachers, the effects of grouping on students' self concept, and grouping students according to their social behavior as perceived by the teacher. Information was obtained on the criteria teachers used for placing students in various groups, with an estimate of the percentage of instructional time allocated to the groups, teachers' perception of students' personal behavior, students' self concept, use of instructional time, and students' academic progress. A difference was found in students' ability

group level and the amount of instructional time received from the teacher. Low-ability students received more instructional time. Social behavior characteristics influenced the placement of students in groups. No difference was found between students' group placement and their self concept scores. Instructional time allotted to a student had no effect on social behavior or self concept. Students in the higher ability groups spent more time working independently than those in lower groups. No relationship was found between the amount of time students were on-task and affiliation with the teacher. Implications for practitioners and future researchers are suggested. (JD)

Descriptors—Art Education, *Class Activities, *Curriculum Development, *Educational Resources, Elementary Secondary Education, Health Education, Home Economics, Language Arts, Mathematics Instruction, Music Appreciation, *Newspapers, *Program Development, Science Instruction, Social Studies, Textbooks. Daily newspapers may be used to broaden and enrich the curriculum in both elementary and secondary schools in a variety of ways. The newspaper can be useful in strengthening skills in the language arts and in the social studies and contains information relevant to students of all ages and levels of ability. The variety of topics a newspaper covers makes it possible to individualize learning assignments. Activities for elementary students include developing language arts, social studies, art activities, music, health, science, and mathematics. Secondary level students can benefit from practical application of information obtained from the newspaper as well as from learning possibilities offered by the coverage of current topics in the world, historical perspectives, and world problems. Descriptors—Communications, Educational Resources, Elementary Secondary Education, *Enrichment Activities, Higher Education, *Information Networks, *Inservice Teacher Education, Needs Assessment, Program Budgeting, Program Costs, *Program Development, Program Evaluation, School Community Relationship, *Teacher Centers

This directory lists those American teacher centers that are in touch with the Teachers' Centers Exchange. All 116 entries in the directory are written in a common format. This is intended to help readers make comparisons and select individual ideas rather than to adopt whole models. Each listing is headed by the name, address, and phone number of the center, the name of its current director, and the hours it is normally in operation. A description of the program offered by the center is provided, presenting a profile of the center's activities, response to particular needs in the school and community, and in some cases a brief history of the founding of the center. Methods of needs assessment and evaluation used by the center are described, as well as the resources used and/or generated by the center. A description is given of the setting in which the center operates. Other information includes the characteristics of the participants, the center's decision-making process and governance, and the center's financial base and operation. (JD)

Descriptors—Academic Achievement, Behavior Patterns, Class Organization, Classroom Environment, Classroom Techniques, *Course Content, *Curriculum Design, *Curriculum Development, Lesson Plans, *Mathematics Instruction, Social Background, Student Motivation, *Teacher Behavior, Teaching Methods

The intent of this theoretical paper is to recast our ideas about teaching mathematics as a result of an extensive research review on teaching behaviors. The product of this review is an explanatory curricular model which takes into account the content being taught. The purpose of studying teaching from a curricular perspective and the constructs and experience which the literature review was based on is outlined in the initial chapter. The next six chapters examine the contemporary literature with respect to some basic categories assumed to relate to teaching mathematics. These categories include content, motivation, planning, classroom events, pupil outcomes and pursuits, and teacher and pupil background. Finally, in the concluding chapter we summarize the information and present a model based upon the review. The model of pedagogy presented in that last chapter should provide researchers a set of constructs which can be used to study the teaching of mathematics. (Author)

Descriptors—Academic Achievement, Average Daily Attendance, Community Colleges, *Cost Estimates, Counselor Attitudes, *Equivalency Tests, *Graduation Requirements, High Schools, Institutional Characteristics, Sampling, School Funds, Scores, State Programs, State Surveys, Student Attitudes, Student Characteristics, *Student Participation

Identifiers—California, *California High School Proficiency Examination, Early Graduation

The first of three self-contained studies in this report characterizes those who chose to take the California High School Proficiency Examination and those who passed. Characteristics of examinees' families, schools, and communities were also identified. In the second report, a school financial simulation model calculated district revenues which in California are linked to attendance; loss of students who passed the test and left school early would reduce revenues. Financial impact was low. Its effect on community college attendance was also examined and judged as small but measurable. Finally, juniors, seniors, and counselors were surveyed about knowledge of and participation in the four statewide options for early or partial exit from high school. These are the proficiency examination, work experience for credit, early graduation, and concurrent enrollment in college courses. These three studies were prompted by an unexpectedly low participation rate (5%) and passing rate (less

than half), during the first four years (1975-1979) of this statewide equivalency exam. (CP)

A Checklist for Evaluating Materials.

Women on Words and Images, Princeton, N. J.

Spons Agency—Office of Education (DHEW), Washington, D.C.

Pub Date—79

Contract—300-76-0460

Note—9p.

Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Audiovisual Aids, *Evaluation Criteria, Females, Guidelines, Instructional Materials, *Sex Bias, Sex Fairness, *Sex Stereotypes, *Textbook Evaluation

Each section of the checklist lists questions which may be used to determine whether or not females are portrayed fairly in instructional materials. The sections, and some sample questions, are: (1) language—are non-parallel titles given for men and women? (Dr. Jones and Ellen); (2) occupational and social roles—is irrelevant information about a woman's family included in describing her role at work?; (3) omissions—are both male and female examples of achievement cited?; and (4) physical appearance—are females often described in terms of physical appearance, while men are described in terms of accomplishments or character? Sixteen questions are included which pertain specifically to audiovisual materials—illustrations, narrators' voices, and graphs and charts. (GDC)

Determining Cut-Off Scores Using Rasch Ability Estimates.

Pub Date—Mar 80

Note—15p.; Paper presented at the Annual Meeting of the National Council on Measurement in Education (Boston, MA, April 8-10, 1980).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Academic Achievement, Algebra, Basic Skills, College Freshmen, *College Mathematics, *Cutting Scores, Difficulty Level, Goodness of Fit, Grades (Scholastic), *Latent Trait Theory, State Programs, *Student Placement, Testing Programs, Test Items, *Test Validity, Two Year Colleges

Identifiers—New Jersey College Basic Skills Placement Test, *Rasch Model

The validity of cut-off scores, used to place students into English and mathematics courses, and a dichotomized success variable, representing student abilities related to success in three sequential mathematics courses, were investigated. This study examined the cutting scores of students entering Mercer County Community College in Fall, 1978, on the state-mandated New Jersey College Basic Skills Placement Test, identified the success variable in a three course algebra sequence as an earned grade of C or above. Because the success variable for each course yielded the minimum ability required for success in that course, the raw score equivalent in each case was interpreted as a cut-off score. The Rasch model was used to link student success in a course with a particular ability on the latent trait. Items were calibrated using the BICAL program and adjusted. Results suggested that the abilities required for success in the three courses were extremely close to one another. Content and grading practices of the three course sequence should thus be redesigned. (RL)

Test Results

Identifiers—*North Carolina

Factors influencing the performance of handicapped students on the North Carolina Minimum Competency Test (Fall, 1978 administration) were analyzed. Educably mentally handicapped (EMH) and learning disabled (LD) students represented 83% of the 3,043 handicapped students who took the Fall, 1978 test. A questionnaire was designed to collect the following data from random samples of the EMH and LD groups: (1) test modifications employed; (2) history of special education services; and (3) remediation efforts in the Spring for those students who failed the test in the Fall. Only the section on test modifications was used for all other handicaps (i.e., hearing impaired, visually impaired, multiple handicap, and other) in order to determine their relationship to the passage rate. Data on student handicap, race, parent education level, and local school district were obtained from State Department of Public Instruction data tapes. The following conclusions were made: (1) procedures used to classify students as handicapped by local schools were inadequate; (2) better guidelines for the use of test modifications were required; and (3) the student characteristics of ability level, current performance level in reading and math, race, and parent education were related to successful performance on the test. Identifiers—*California

California Assembly Bill 3408 requires school districts to adopt their own standards in basic skills, including reading comprehension, writing, and computation. Students must be tested at least once in grades 7-9 and twice in grades 10-11. After June, 1980, students who do not meet standards will not receive a high school diploma. Assembly Bill 65, the comprehensive school finance legislation, extended the requirements to elementary schools, requiring assessment at least once in grades 4-6. Districts are required to provide additional instruction for pupils who do not meet standards. The legislation emphasizes student, teacher, and community involvement and awareness. To comply legally, districts must: (1) establish a budget; (2) review curriculum for relevance; (3) set written standards; (4) adopt alternative means of completing the prescribed course of study such as work experience, college credit, or independent study; and (5) inform the public about graduation requirements and alternatives. Districts may adopt other standards for students with diagnosed learning disabilities. Individual schools must test students, remediate those who fail, and confer with their parents. (CP)

Descriptors—Academic Ability, *Annotated Bibliographies, Careers, *Data Analysis, *Data Bases, *Educational Research, *National Surveys, Outcomes of Education, Social Background, Statistical Studies

Identifiers—*Project TALENT

This annotated bibliography was prepared to improve the ability of Project TALENT to respond to inquiries from potential users of the data base. The intended audience includes researchers using the data base, and staff interested in TALENT data bank studies. The period of time covered by the publications listed is 1959 through November 1978. Most of the studies using Project TALENT data focus on educational/occupational development, and in particular: academic ability, school output, career choice, career guidance, career stability, college attendance, high school dropouts, race interaction with other variables, and science careers. The bibliography is divided into two main sections: (1) 137 annotated references for final reports of analytic studies using TALENT data; and (2) 111 unannotated references for TALENT-related publications that are not main reports of analytic studies. Each abstract gives the bibliographic reference, sponsor, sample and variables, and analytic procedures/findings. Abstracts are numbered consecutively and include project numbers; references not abstracted are listed separately. (Author/GK)

Twenty-two papers and discussions presented at the 1979 annual meeting of the American Statistical Association are reproduced. Papers dealing with student evaluation of instruction include "An Analysis of Student Evaluation of Instruction and Relationships Among Salary, Chairman's Ratings, and Student Ratings of Faculty," by Alvin C. Rencher; "Administrative Use of Student Surveys: One

View," by Paul D. Minton; and "Students' Evaluations: Their Antecedents and Aftermath," by W. F. Seibert and A. R. Starr. A "Report of the Committee on Training of Statisticians for Industry," is included, as well as remarks amplifying the report by Paul D. Minton. The topic of teaching service courses on statistics is covered by the following papers: "A Modular Self-Paced Statistics Course: Five Years' Experience," by Donald A. Anderson and William P. Cooke; "Student's Choice: Self-Pacing and/or the Lecture Method for Introductory Statistics," by Howard B. Christensen; and "The Elementary Statistics Course: Fact or Fiction," by J. Leroy Folks. "Teaching Statistics to Medical Specialists: Cardiologists," by James H. Ware, and a discussion following it by Dennis B. Gillings complete the theme papers. Thirteen additional papers are provided. Descriptors—*Classification, Latent Trait Theory,

*Measurement Objectives, Program Evaluation,

*Psychometrics, Test Construction, Testing Programs, *Work Sample Tests

Identifiers—Content Referenced Tests, Generalizability Theory

Challenges to classical psychometric theory are examined in the context of a broader range of fundamental, derived, and intuitive measurements in psychology; the challenges include content-referenced testing, latent trait theory, and generalizability theory. A taxonomy of psychological measurement is developed, based on: (1) purposes of measurement including evaluation, organizational trouble shooting, individual diagnosis, certification, prediction, and evaluation of other measurement; (2) settings in which measurements are obtained including the laboratory, institutional control, and field settings; (3) variables or attributes to be measured, including attributes of people (physiological processes, motor skills, performance variables, job knowledge, cognitive variables, aspects of personality, and attitudes), and attributes of tasks (duration or intensity of attention, hazards, degree of task structure, organizational involvement, task complexity, intrinsic feedback, skill demands, significance, and autonomy); and (4) the methods of measurement in psychology including instrumentation, direct observation and recording, records and biographical data, testing, and ratings. The challenges and the classifications are examined for special implications for work sample testing. The point is stressed that the evaluation of work sample measurement depends primarily on its acceptability as a direct description of the performance of interest. (RL)

Descriptors—*Cognitive Style, Higher Education, *Lateral Dominance, *Perception Tests, *Sex Differences, *Spatial Perception
Identifiers—*Spatial Ability, Spatial Tests, *Spatial Visualization

The extent to which sex differences on a mental rotation test were related to ocular dominance, handedness, and familial handedness was explored. The Vandenberg revision of the Shepard-Metzler mental rotation test was administered to 206 college students. The test consisted of 20 criterion figures, each followed by two correct and two incorrect alternative figures. The correct alternatives were identical to the criterion sample but were presented in a rotated position. Immediately after finishing the rotation test, subjects answered a questionnaire designed to assess their perceived cognitive strategy used in solving the spatial task. Ocular dominance, handedness, and familial handedness were also assessed by questionnaire. The superior performance of males on the mental rotation test was highly significant ($p = .0001$). The most common strategy employed by both sexes in solving the spatial task was mental picturing; however, females used significantly more verbal strategies than males. Handedness, per se, was unrelated to spatial performance, but right handed females with familial sinistrality had lower spatial scores than those with no familial sinistrality. More females than males were found to be left eye dominant; left eye dominance in females, but not in males, was associated with lower spatial scores. (Author/RL)

Descriptors—Basic Skills, *Profiles, Report Cards, Secondary Education, *Student Evaluation, *Student Records

Identifiers—Scottish Council for Research in Education, *SCRE Profile Assessment System

Detailed instructions on how to use the Scottish Council for Research in Education (SCRE) Profile Assessment System are presented in a manual intended for use by individual teachers. The system, consisting of a set of materials composed of a large Class Assessment Sheet and 30 individual-pupil records, is used for recording pupil assessments in the basic skills (oral and written; visual understanding and expression; number; physical co-ordination; and manual dexterity), specific subject area, and the work-related skills of enterprise and perseverance. Instructions are given on how to collate the assessments for each pupil, as well as suggestions for using the profiles in various ways, including curricular and vocational guidance. Examples of completed school-leaving report forms are included, and examples of teacher guides which may be used as models for the assessment of basic skills are provided for use in preparing the subject achievement section of the profile. An appendix contains samples of teachers'

guides in English and physical education. (RL)

Identifiers—Scotland, Scottish Council for Research in Education

Six papers presented at the Scottish Council for Research in Education's 50th anniversary conference in 1978 are included. "Are Standards Rising?" by W. Bryan Dockrell, examines the use of national performance assessment surveys in Scottish schools. "Better Reports," by Patricia M. Broadfoot, describes the need for a comprehensive assessment instrument for Scottish students, and how the Pupil Profiles Project can satisfy this need by providing for existing certification requirements, as well as making positive statements for less able students. "Testing as Teaching," by Harry D. Black, describes a case study dealing with the creation of diagnostic assessment instruments, and emphasizes the need to move away from the idea that assessment is a judgment. "Do People Get What They Want or Want What They Get in Terms of Pre-School Provision?" by Jenny Haystead, discusses the different ways of transmitting information to mothers about facilities for pre-school children. "Choice and A Core Curriculum," by A.C. Ryrie, examines the process by which young people from the age of 12 move up through the Scottish 6-year comprehensives. "Home and School Influences on Getting a Job," by A. Douglas Weir, discusses factors which influence job seeking behavior. (RL)

Development of Simple Ways for Using State Assessment Results.

Pub Date—Jun 80

Note—43p. Paper presented at the Annual Conference on Large Scale Assessment (10th, Boulder, CO, June 9-12, 1980).

Pub Type—Speeches/Meeting Papers (150) — Guides - Non-Classroom (055)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Curriculum Evaluation, Elementary Secondary Education, *Information Utilization, Parent Teacher Conferences, Principals, *State Programs, *State School District Relationship, *Student Evaluation, *Testing Programs, *Test Results, Training Methods, Use Studies

Identifiers—*Michigan Educational Assessment Program

The Michigan Educational Assessment Program (MEAP) staff developed strategies to train teachers and principals to use state assessment results for improving academic achievement in their schools. Two local uses of the state assessment results are (1) using the results of grades 4, 7, and 10 with the students tested, and (2) using the results to review curricula in the previous grade levels. Samples of materials developed for each type of use are appended, and include instructional support materials for mathematics, pamphlets for preparing school staffs to provide individual student results to provide individual student results to parents, plans for preparing for a utilization of MEAP test results workshop, and a model for utilization of MEAP test results. Presentation of the utilization model is planned for three sessions: Session I examines the test results and identifies present needs; Session II deals with curriculum and instructional planning; and Session III is devoted to decision making and setting goals. Because these methods were developed by observation of what does work in schools and because the techniques were geared to the resource restraints of local schools, they can be applied in a variety of settings. Identifiers—American Educational Research Association, American Psychological Association, National Council on Measurement in Education, *Standards for Educational and Psychological Tests

This monograph serves as a nontechnical guide to teachers, counselors, school psychologists, administrators, parents, and others who use the 1974 Standards for Educational and Psychological Tests. The Standards are a concise summary of standards and guidelines for the development, evaluation, interpretation, use, and reporting of information on psychological and educational tests and assessment methods. These guidelines focus on standardized and published assessment methods and, like the Standards, do not cover teacher-made tests. An introductory chapter identifies some of the basic considerations in educational and psychological assessment and provides a framework for the material discussed in following chapters. Chapter 2 considers the qualifications of test users, the process of selecting a test, and the standards relating to administration and scoring of the instrument. Chapter 3 focuses on the psychometric properties of the instrument, its reliability and validity. Chapter 4 discusses interpretation of test scores, and Chapter 5 covers several issues in test use, including test fairness and ethical issues. (RL)

Descriptors—Elementary Secondary Education, *Program Development, Program Evaluation, *School Districts, Scoring, Standardized Tests, Teacher Evaluation, Teacher Made Tests, *Testing, Testing Problems, *Testing Programs, Test Interpretation, Test Results

Identifiers—*Test Directors

Basically, test directors have four systemwide and building level responsibilities: (1) planning, administration and evaluation of standardized testing programs; (2) application of measurement and evaluation to school problems; (3) classroom testing and evaluation; and (4) external testing programs. In a series of brief memos, measurement and evaluation professionals give advice to the test director on: professional training; advisory committees; test planning; administration; scoring; and applications of test results to guidance and instruction, program evaluation, and teacher evaluation. Other chapters discuss the director's role in training teachers to develop their own tests and administering tests sponsored externally. A final chapter describes and evaluates common methods for reporting individual test results (percentile rank, expectancy tables); and group results (national norms, grade equivalents, criterion referenced tests, matrix sampling). Contributors are: Annie W. Ward; Joseph L. Mazur; Joan K. Bollenbacher; Albert H. Rouse; Gerald S. Hanna; Richard L. Poole; Jack Menner; Margaret E. Beckman; and James H. Lawson. (CP)

Communicating Research Results to Practitioners.

Pub Date—Apr 80

Note—11p; Paper presented at the Annual Meeting of the American Educational Research Association (64th, Boston, MA, April 7-11, 1980).
 Pub Type—Speeches/Meeting Papers (150)—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Basic Skills, *Educational Research, Elementary Education, *Elementary Schools, *Instructional Improvement, Problem Solving, Research and Instruction Units, *Research Utilization

Identifiers—*Research and Development

A report is presented of a year-long period of furnishing information to elementary schools on research findings and products related to the improvement of basic skills. Particular empirical findings are not analyzed; rather, an integrated impression of the success or failure of research utilization by schools is conveyed. The outcomes of research are discussed in three forms: conclusion-oriented (primary implications are for continuation of research); decision-oriented (the solving of a practical problem through an investigation); and the developed product (designed for immediate application and use). The properties which make the process work are local school problem-solving, training in problem-solving methodology, and interpretation of research findings. It is concluded that the best way to "get research into the schools" is to put it there, and the following are described as characteristics of school-based research and development: (1) it is decision-oriented; (2) it does not require large specialized resources; (3) it seldom employs a true experimental design; (4) it should aim towards constructing teacher procedures, not products; (5) novel ideas would have to be accepted; and (6) dissemination would become utilization. EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Change Agents, *Change Strategies, *Evaluation Methods, Futures (of Society), *Models, *Social Change, Values

Identifiers—Comparability, Efficacy, Ideology

Through consideration of a conceptual framework, this paper proposes that a comprehensive evaluation can be made that accounts for a project's ability to accomplish social change. The concepts are: (1) ideological development—permits the evaluator to predict the probability of the ultimate change a project can accomplish based on the change agents' consideration of social justice; (2) legacy of change—permits evaluators to determine the potential for continued change after a project's funding ends; (3) comparability—contrasts one project with another to determine the relative merit of each; and (4) social efficacy—includes the determination of the effect of a project and the use of resources used by the project. This framework provides a better standard of judgment than can be made from a single evaluation methodology, because the concepts are not discrete; consideration of each provides a triangulation of data and perspectives to evaluate outcomes of social intervention. A major benefit of this framework is that it offers a procedure for considering effects of social change projects that incorporates multiple perspectives in the analysis. Also considered, however, are which social elements must be changed to effect social change ultimately. (Author/GK)

Ethics in Fieldwork Research: A Case Study.

Pub Date—Apr 80

Note—27p; Paper presented at the Annual Meeting of the American Educational Research Association (64th, Boston, MA, April 7-11, 1980).
 Pub Type—Speeches/Meeting Papers (150)—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Educational Researchers, *Ethics, *Field Studies, Higher Education, Integrity, *Research Methodology, *Research Problems, Student Teachers, Student Teacher Supervisors, *Student Teaching

Four ethical problems resulting from a fieldwork study of elementary education student teachers are explored. The problems include: acquiring permission to execute the study; how far to dig into personal lives to extract necessary information; the pitfalls of doing collaborative research; and how much information can be revealed without endangering the participant's positive image. Three purposes that guided the study were: (1) quality assessment of the elementary education student teaching experience from multiple perspectives; (2) measurement of the effects of prerequisite experiences for successful student teaching preparation; and (3) compilation of information about student teachers to be used in longitudinal studies. Most importantly, however, was the exposure of the complexities of the student teaching experience previously found to be resistant to documentation. A major implication is that ethical problems, given the bureaucratic and interpersonal climate in urban institutions, may be unresolvable rather than simply a hindrance to the researchers and participants. Identifiers—*Field Dependence Independence

The field dependency/independency construct (FDI) was measured using tests of perception of the upright such as the Rod and Frame Test (RFT) and tests of cognitive restructuring such as the Hidden Figures Test (HFT); relationships between cognitive restructuring and perception of the upright were investigated. High school seniors received 34 tests including 12 measures of FDI. Analysis of the data using multidimensional scaling, cluster analysis, and factor analysis resulted in five dimensions including two associated with the FDI measures. One of the FDI dimensions measured cognitive restructuring which involved unfamiliar geometric shapes (e.g., Find a Shape Puzzle, Raven Progressive Matrices) and generation of novel representations of the material (e.g., Paper Folding, Paper Form Block, Block Design). The other FDI dimension, related to perception of the upright, was labeled familiar field and was postulated to measure strategy selection in familiar situations. (Author/RL)

Identifiers—*Rehabilitation Task Performance Evaluation Scale

Intended for the training and use of state divisions of vocational rehabilitation (DVR) line supervisors, a "Rehabilitation Task Performance Evaluation Scale" is included along with instructions for its administration and uses. The Scale, constructed from an inventory of 294 rehabilitation job tasks, is used for periodic evaluations of the quality and extent of staff performance. Quality is defined as the accuracy, thoroughness, effectiveness, and efficiency of tasks performance. The following two fundamental ways of increasing personnel utilization are suggested: (1) the selective assignment of tasks according to the worker's present level and types of competency; and (2) the systematic development of the worker's value to the organization by increasing task-qualifications. Information is provided on how to obtain individualized performance profiles for counselors, supervisors, paraprofessional workers and aides, as well as on the education needed to perform each of the many basic tasks. Identifiers—Elementary Secondary Education Act Title I, *RMC Models, Technical Assistance Centers, Title I Evaluation and Reporting System

The assertion that Model C is feasible for Elementary Secondary Education Act Title I evaluation, why it is feasible, and reasons why it is so seldom used are explained. Two assumptions must be made to use the special regression model. First, a strict cut-off must be used on the pretest to assign students to Title I and comparison groups. Second, the functional relationship between pretest and posttest must be assumed in order to fit a regression line for use in determining the performance level of students without Title I. A single composite measure that combines test scores, teacher ratings, and past academic performance can be used to select Title I students, and as the pretest. Model C needs only a district-wide assessment of all students and access to a computer to match the data. Six reasons given for not choosing Model C include: (1) Model C requires more work than does Model A; (2) local programmers lack expertise in manipulating scientific data; (3) large districts lack experience in matching pretest and posttest scores; (4) data analysis is necessary; (5) selection process must be open; and (6) normal curve equivalent gains are lower than when using Model A. Validity

Three basic areas of definition, measurement, and research, voiced as concerns by members of the National Council of Measurement in Education (NCME) to its Task Force on Measurement Problems in Competency-Based Programs, are used as an organizer for a sponsored symposium and the papers in this monograph. The problem of the definition of competency is addressed in two different ways. Chapter IV presents several different perspectives about how standards of performance may be set, while Chapter II addresses itself solely to the definition of the word "competency." Just as the authors of the seven papers differ in their positions concerning the efficacy of competency-based programs, they also use the word "competence" in different ways, which has real consequences for the way in which research and development efforts will be structured. If the construct definition is selected, then the process of validation of the instrumentation must take into account the framework in which the construct is operationalized, as argued in Chapter V. However, if the definition is considered to be that of setting standards of behavior, then different techniques would be used to validate the cut-off point for an instrument. (RL)

Descriptors—Classroom Environment, Cost Effectiveness, *Educational Assessment, Educational Environment, *Educational Improvement, Elementary Secondary Education, *Foreign Countries, Individualized Instruction, Instructional Innovation, Programmed Instruction, Student Behavior, Teacher Attitudes, Teacher Made Tests, Textbook Evaluation

Identifiers—*New Zealand, Teacher Expectations
 Topics and issues relating to educational research are presented in the form of separate news sheets or essays. A case study of the merits and deficiencies of Penrose High School's "Whanau House," is included as an example of curriculum innovation. An exploratory study describing expectations of New Zealand teachers demonstrates how teacher expectations cause certain students to be stereotyped and treated differently. An economist looks at what it costs society to invest in children's education, and what it pays. Some of the effects of school size on the behavior of pupils are reviewed. Two very different techniques to fit the work to the child (student team learning and self-paced instruction) are described. One article describes research findings on how successful Internal Assessment has been in Queensland's secondary school program. A summary of the techniques, theoretical basis, and changing nature of programmed learning is presented, as well as its impact on teaching. Other miscellaneous items of information include a guide to making up classroom tests, an analysis of textbook English, and a guide to class nomenclature. (RL)

Descriptors—Educational Improvement, *Educational Testing, Elementary Secondary Education, Minimum Competency Testing, *National Surveys, *Standardized Tests, *Teacher Attitudes, Teacher Qualifications, Testing Programs
 Identifiers—*American Federation of Teachers, *Test Use

Part of the plan by the American Federation of Teachers (AFT) to prepare training materials and conduct conferences on improving teachers' use of standardized tests was to survey a representative sample of elementary/secondary teachers. This survey ascertains teacher preparation and knowledge in testing, teacher assessment of the importance of testing to teaching, and teacher attitudes toward various testing issues. Findings indicate that teachers seem to be generally supportive of standardized tests, and understand the need for quality standards in education. Specifically, it was found that teachers want useful information in three areas: (1) diagnosing individual student needs; (2) planning instructional activities and programs, and (3) placing and grouping students. Results of the survey support the notion of testing as an integral part of instructional programs. Teachers appear to be somewhat supportive of minimum competency testing, but see many serious flaws in most current programs in this area. (Author/GK)

Descriptors—Educational Improvement, *Educational Testing, Elementary Secondary Education, National Surveys, Public Education, *Standardized Tests, *Teacher Attitudes, Testing Problems, *Testing Programs, Unions

Identifiers—*American Federation of Teachers, Test Use

Members (elementary and secondary teachers) of the American Federation of Teachers (AFT) were surveyed in preparation for a series of workshops to improve teachers' use and understanding of tests. Results showed generally positive attitudes towards tests, and a specific interest in using tests for diagnostic and prescriptive planning purposes. Standardized tests were seen as least useful for course content modification and instructional program modification. A negative side appeared also: teachers identified a variety of factors inhibiting their use of standardized tests. These include: (1) results do not provide enough prescriptive information; (2) results do not provide adequate profiles of student strengths/weaknesses; (3) results are returned too late (or not at all) to be useful; (4) test content does not match curriculum; and (5) test materials are inappropriate for students. Results also indicated, however, that teachers desire maintenance of quality standards in schools and view competency testing as a useful method. Additional research is discussed, supporting the findings that teachers see tests as reliable sources to be used as part of a total educational program. The AFT resolution on testing, and how the AFT training program is designed are summarized. (GK)

Identifiers—Arizona

This resource guide was designed for teachers and administrators in Arizona school districts to assist them in preparing functional and meaningful programs of student achievement testing. The format of the guide is based on fundamental questions often posed by educators regarding norm-referenced and criterion-referenced testing. Particular emphasis is placed upon practical guidelines for implementing both types of testing in terms of accountability. The resource guide is divided into two sections. The first section discusses norm-referenced testing, and is applicable to educators desiring this type of test in addition to those mandated by Arizona's accountability legislation. The second section discusses criterion-referenced tests, and provides a rationale for their use. Terminology is nontechnical, information is presented in a readily accessible format, and resources/references are listed. (Author/GK)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Administrator Responsibility, *Basic Skills, Educational Environment, Educational Improvement, *Educational Research, Elementary Secondary Education, *Instructional Development, Parent Participation, *Program Development, Student Teacher Relationship, *Success

Identifiers—New Jersey

Information on basic skills improvement programs is provided through a review of research findings concerned with the factors determining quality education. These factors fall into four key areas: (1) the classroom—use of time, classroom climate/control, teacher behaviors, student behavior, organization of instruction; (2) administration—administrators' priorities, expectations, behaviors, responsibilities; (3) school climate—goal orientation, positive relationships, administrative support, leadership, commitment to basic skills mastery; and (4) parent/community involvement—adult volunteer or parent participation in basic skills classes. Five basic success elements common to all four areas are identified: leadership, high expectations, willingness to assume responsibility, two-way communication/interaction, and goal-oriented systematic approaches. A summary of research and extensive bibliography are appended. (Author/GK)

Note—172p.

Pub Type—Information Analyses (070)

EDRS Price - MF01/PC07 Plus Postage.

Descriptors—Behavior Rating Scales, Faculty Development, Higher Education, *Reliability, *Student Evaluation of Teacher Performance, *Testing Problems, *Test Validity, *Use Studies

A review of the research literature considers the following questions: (1) what is the general quality of the information resulting from systematic student evaluation of faculty effectiveness?; and (2) what are the consequences of soliciting this information and making it available to those people who may utilize it in their decision making procedures? The internal consistency of most ratings scales, and many subscales, often exceed .9, and when lower, often can be increased by increasing the number of ratings items in a particular scale. However, this indicator of reliability produces a considerable overestimation of ratings stability when independent measures of teachers and/or courses are desired. Generalizability theory has begun to be employed to supplement and to extend the more traditional approaches to reliability. Factors such as expected grades, class size, and the students' pre-enrollment attitudes are likely to influence student ratings. Much of the instability and potential invalidity may be reduced through the standardization of administrative procedures and the use of global rating items for normative or personnel purposes. There appears, however, to be little evidence that student ratings are weighted very heavily in the decision-making processes of personnel committees at the college level. (RL)

Descriptors—Achievement Tests, Diagnostic Tests, *Educational Assessment, Educational Objectives, Elementary Education, *Elementary School Mathematics, *Reading Skills, *Scores, *State Programs, Testing Programs, Test Reliability, Test Validity

Identifiers—Alaska. *Alaska Instructional Diagnostic System

Key findings of a pilot study of the Alaska Instructional Diagnostic System (AIDS) are summarized. The AIDS pilot test served to verify the appropriateness of the skills survey as well as the validity and reliability of the items. The AIDS testing system includes three components: (1) upper level skills surveys (grades 3-8); (2) lower level skill surveys (grades 1-3); and (3) reading and mathematics skill sheets (grades 1-8). Objectives and test items correspond to content taught in grades 1-8, but there are no specific levels. All pilot test levels include items

covering reading and mathematics. The lower level skills are divided into levels one and two of the pilot test. The upper level skills are divided into three levels; in levels three through five, all items in the upper level skill survey are included. Objectives and subtests covered include: phonetic analysis, structural analysis; vocabulary building, reading comprehension, math computation, and math application. The difficulty of the five levels increase within each subtest area. The pilot study included 1658 students; generally a favorable response to the pilot test was indicated. Tabular data suggest high reliability and validity. Detailed tables and appendices are included. (Author/GK)

Identifiers—*Test Appropriateness, *Test Content

Indices of appropriateness of a test for an individual are discussed, and two data sets are evaluated. With the first data set, three indices of test appropriateness are obtained for response patterns on achievement tests from an experimental study of the effects of test anxiety and time pressure with 173 3rd and 4th grade students. Relationships of these three indices to student background characteristics and measures of anxiety are of special interest in this first data set. With the second data set, two indices of test appropriateness are obtained for the math and reading test given to 6300 students from a random sample of approximately 110 schools at 4th, 8th, and 11th grade levels. Relationships of these indices to student sociocultural background and measures of student anxiety and motivation are examined at the individual student level and school level. The test appropriateness measures have potential utility in the identification of students for whom the test is inappropriate or schools with curricula not matching test content. (Author/GK)

Applying Latent Trait Theory to a Course Examination System: Administration, Maintenance, and Training.

Michigan State Univ., East Lansing. Dept. of Communication.

Pub Date—[80]

Note—24p.; For related document see ED 189 105.

Pub Type—Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Achievement Tests, Course Content, Equated Scores, Goodness of Fit, Group Testing, Heterogeneous Grouping, Higher Education, *Introductory Courses, *Item Banks, *Latent Trait Theory, *Test Construction, Testing Programs

Guidelines are described for setting up an item bank under latent trait theory which may be applied to the achievement testing system of multi-section, large-enrollment, college survey courses. The enrollment for the course is typically heterogeneous: students may be majors or non-majors, any one section may contain honors college students and disadvantaged learners, and students may be of differing class levels. The advantage is that test scores can be standardized without legislating a common examination for all sections. Unique findings of this study were: (1) the computer file containing serial positions of items on examinations proved extremely useful; (2) obvious violations of unidimensionality and asking questions based on trivial, unevenly taught information led to items which did not fit the model well; (3) less stability in the equating procedure may result when large differences occur in an examination system; (4) more than one training session for instructors is recommended; and (5) latent trait models can work in a large, multi-section course examination which surveys a variety of extensively different topics. Descriptors—Case Studies, Content Analysis, *Educational Research, Evaluation Criteria, *Experiential Learning, *Nontraditional Education, *Research Methodology, Secondary Education, Surveys

Identifiers—Conceptual Analysis, Northwest Regional Educational Laboratory

Four strategies that are useful in conducting research on experiential education programs are discussed and illustrated. These include: case studies, content analysis, use of a focused survey, and concept analysis. Each strategy addresses an issue particular to experiential education. Case studies allow data collection on a large number of variables related to an individual learner, and are useful in describing the diversity of a program's treatment in assessing individualized student outcomes. Content analysis involves the systematic classification and analysis of existing documentation. This methodology is also useful in experiential education research because it is unobtrusive. A focused survey is a questionnaire based on a theoretical framework that explores people's attitudes and experiences related to one or a few constructs. Concept analysis clarifies abstract concepts, determines their meanings, and identifies how concepts work during thought processes. Also included in the paper is an explanation of the proposed essential elements within nine dimensions of experiential education. The dimensions are as follows: purpose, setting, participants' characteristics, learning strategies, student roles, instructor roles, outcomes of learning activities, management and support factors, and program outcomes. Identifiers—*College Entrance Examination Board

Set in the context of shifting economic and social demands, the educational scene during the last part of the 20th century is discussed. Increasing numbers of people of all ages will be involved in different kinds of learning for varying purposes. Some will want to learn for personal satisfaction and improvement, others will need to learn to meet changes in technology and job requirements. Many learners will want and seek appraisal and assessment of their achievement. To this end, present instruments and procedures may need to be modified and improved. Learning opportunities will continue to expand and diversify, enabling prospective students to continue their education in schools, colleges and universities, on the job, at learning centers, or at home via correspondence, television, newspapers, and satellites. Descriptors—*Committees, Elementary Secondary Education, *Evaluation Methods, *Hearings, Higher Education, *Investigations, *Models
Identifiers—*Congress

The use of a committee hearing format for educational evaluation is considered. The paper is divided into three sections: (1) a description of the concept of investigative committees as practiced by the United States Congress; (2) a review of recent implementation of a committee hearing format in educational evaluation; and (3) an outline of a committee hearing approach with comments directed at the application of the format. Section one is concerned with the areas of the parent body, authorization, committee membership and staffing, investigation and hearing activities, and committee reports. Section two begins with a developmental perspective, and discusses the application of procedure, and two examinations of the committee hearing. The final section, presented in outline format, displays the committee concept along with comments suggesting the potential of the analogy for educational evaluation. (Author/GK)

Identifiers—*New Jersey Minimum Basic Skills Program

The Comprehensive Basic Skills Program Review (CBSPR) is an essential part of the New Jersey public school evaluation and improvement process. This group of handbooks describes a process for analyzing existing school programs and practices in relation to those factors which have been identified through research to be associated with successful achievement in basic skills. Districts have the responsibility to use the results of the CBSPR to develop and implement basic skills improvement plans which appropriately fit their needs and resources. A school is selected to undergo a CBSPR if: (1) less than 65 percent of its students have met the statewide minimum standards on the Minimum Basic Skills (MBS) test in either reading, computation, or both; (2) there has not been a significantly increasing trend in the percent of students meeting the statewide standard; or (3) acceptable other evidence of pupil achievement has not been submitted by the district. Four groups involved in the CBSPR include the comprehensive review team, the local review team, the county office, and the school administrators and staff. The CBSPR handbooks deal specifically with each group's role and responsibilities, and provide guidelines for implementation at elementary and secondary levels. (RL)

Descriptors—*Criterion Referenced Tests, Group Testing, *Item Sampling, Models, Norm Referenced Tests, *Program Evaluation, Sampling, *Test Construction, Test Interpretation, Test Items, *Test Reliability, Test Validity

Technical considerations associated with item selection and reliability assessment are considered in relation to criterion-referenced tests constructed to provide group information. The purpose is to emphasize test building and the evaluation of test

scores in program evaluation studies. It is stressed that an evaluator employ a performance or achievement instrument sensitive enough to reflect group/individual ability in terms of the specific goals of the program. Criterion-referenced tests are designed for this purpose. Two steps in criterion referenced test development are considered: the approach to item selection, and the assessment of score reliability. Methods for handling them in preparing and using criterion-referenced tests in program evaluation studies are offered. Norm-referenced and criterion-referenced testing within a program evaluation context are compared, and a model for developing/validating criterion-referenced tests is introduced. (Author/GK)

Descriptors—Achievement Tests, Computer Assisted Testing, *Criterion Referenced Tests, Diagnostic Tests, Elementary Secondary Education, *Norm Referenced Tests, Program Evaluation, *Testing Programs, Test Results
Identifiers—Test Use, *Title I Evaluation and Reporting System

The potential use of criterion referenced tests (CRT) and norm referenced tests (NRT) in the same testing program is discussed. The advantages and disadvantages of each are listed, and the best solution, a merging, is proposed. To merge CRTs and NRTs into an overall testing program, meaningful and useful to all levels, consideration must be given to the role of both survey tests and diagnostic tests, including when and why they are administered. The possibility of having norms for a CRT is discussed. Methods of equating CRTs to NRTs are mentioned; for example, Model A from the Title I system recommends a shortened version of the equipercentile approach. A list of key recommendations for this procedure is offered. A futuristic look is taken at the proposed single evaluation process, its merging accomplished through both modern measurement and computer technology. (Author/GK)

Identifiers—Illinois, *Sarason Test Anxiety Scale for Children

The focus of this paper is on improving the measurement of test anxiety. Background information is given about the role of motivation and the importance of testing. The present research is directed at developing a shorter, more reliable and valid measure of test anxiety, thus furthering the predictive, diagnostic, and test program uses of test anxiety with students of different sociocultural backgrounds. Twelve items from the relaxed Test Anxiety Scale for Children (TASC) were administered to 6300 students in grades 4, 8, and 11 in a statewide achievement survey. Statewide and local district results suggest a new 7-item relaxed form of the TASC that can be used to measure negative test motivation. Implications of the development of shorter, reliable, and valid motivational scales are discussed as they pertain to statewide and district testing and to diagnosis by teachers and other school personnel. Identifiers—Annuities, *Uniform Methodology Model

This report, concerned with an equitable procedure to determine student financial aid eligibility, argues for adoption of an annuity income measure of parents' ability to pay, and against continuation of the consensus measure developed by the Keppel Task Force-National Task Force on Student Aid Problems (the UM measure). The new Uniform Methodology (UM) measure could be implemented in two stages. In the first stage, four changes to the UM measure would be introduced. None of these changes would require the collection or analysis of additional data; they should be introduced as a package. In the second stage, the UM should be made more comprehensive by expanding the list of assets included in the resource base. The values of many of these assets will have to be estimated by calculating the discounted present value of current and projected future income from each asset. In addition, the allowances against income-living, tax, retirement—should be converted to a negative asset value by calculating the discounted present value of current and projected future allowances. Only after both stages have been implemented will the annuity income approach be complete, internally consistent, and equitable. (Author/RL)

A broad review of educational assessment during the past 40 years (1930's to 1970's) is presented. The review begins with the birth of the term "evaluation", when the depression made educators aware of the need for new programs and ways to appraise them, and continues into an explanation of the Eight-Year Study (1933-41), which gave attention to the assessment of educational objectives and techniques of appraisal. The next milestone discussed is the changed role of public education after World War II. Instruction and the grading system, originally developed to sort students, was modified to encourage as many students as possible to further their education. The final section of the review is a consideration of various checkpoints for program assessment. These points include: (1) assessing what students have learned; (2) comparing ideas of an educational activity with realities to which they refer; (3) checking implementation; (4) monitoring program operations after implementation; and (5) appraising program outcomes according to what the students have learned. Descriptors—Agency Role, *Educational Assessment, *Educational Research, Educational Trends, Lobbying, *Prediction, *Role Perception, *State Departments of Education

Viewpoints on the role of educational research and evaluation in the 1980's is presented. Remarks focus on four major themes: (1) state level research and evaluation has progressed from a passive, primarily reporting role to an active, occasionally advocacy role; (2) the educational questions and the question askers have become more sophisticated and will increase in sophistication; (3) primary consumers of state level research and evaluation have changed from other researchers and evaluators to include diverse publics (e.g., legislators, state budget analysts, lobbyists from special interest groups, TV and newspaper reporters, professional organizations, and other state government agencies); and (4) the state education agency has a unique role to play in producing and consuming research and evaluation. It is forecasted that as the decade of the 1980's disappears, state education agencies will have enhanced their current capabilities in research and evaluation to guide action of state policy makers, to provide better bases for decisions and to improve educational programs for children. Descriptors—Cognitive Style, *Difficulty Level,

*Paired Associate Learning, Recall (Psychology),

*Time Factors (Learning), *Verbal Learning,

Word Lists, *Word Recognition

In simultaneous learning two verbal lists are interlaced for study, with each tested separately. In the present experiments simultaneous learning was used as a means of determining the conditions under which study time or learning resources might be reallocated between lists. One of the lists was called the standard list and remained constant across the conditions of each experiment. The other list, the variable list, was manipulated to produce differences in its difficulty. If performance on the standard task varied as a function of the difficulty of the variable list a shift in study time was inferred. In one experiment the variable task difficulty was changed by manipulating word frequency, stimulus similarity, concreteness, and meaningfulness. These manipulations had little influence on performance on the standard task. However, in another experiment when words were repeated in the variable task, more time was given to the standard. When subjects knew that the variable task was to be tested for recognition they gave less study time to it than when a recall test was to be given. It was concluded that subjects reallocate study time between two tasks being learned simultaneously only when there are obvious differences in difficulty. (Author/RL)

Identifiers—*New Jersey, *New Jersey Minimum Basic Skills Program

An overview is presented of the New Jersey Department of Education's activities in response to the following mandates: (1) statewide minimum stand-

ards be established for communication/computation skills; (2) students be tested annually in these areas to determine progress; and (3) remediation be provided to all students whose performance is below state standards. Also included are the results of the Minimum Basic Skills tests administered. Results from the first three years of Minimum Basic Skills testing show a significantly larger percentage of students (all grades, subjects) met the statewide standards in 1979-80 than in the previous years of testing; increases were most dramatic in elementary grade reading and mathematics; gains for secondary school students (grades 9-11) were less pronounced than the elementary grades, but also significant; generally, students obtained higher Minimum Basic Skills test scores in 1980; and a smaller percentage of students in urban centers and low socioeconomic status groups scored at or above state standards than in suburban and affluent areas. Detailed indexes and appendices are included. (Author/GK)

Evaluating Composition Skills: A Method and Example.

Pub Date—Sep 80

Note—22p. Paper presented at the Annual Meeting of the Evaluation Network (6th, Memphis, TN, September 29-October 1, 1980).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143) — Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Elementary Secondary Education, *Evaluation Methods, Informal Assessment, *Reliability, *Scoring, *Writing (Composition), *Writing Skills

Identifiers—*Holistic Evaluation

Holistic evaluation is a reliable, valid, and cost-effective alternative to the usual mechanical assessment of writing. Writing samples are scored on a five-point scale against an overall impression of development, organization, and coherency. The method was applied to the Communication Activities Skills Project (CASP) for grades 3-12. Writing samples were collected before and after the Project from experimental and control groups, using a stimulus question. Three or four teachers rated each sample, after three days of holistic evaluation training. To eliminate possible bias, raters were not aware of the research group origin of the sample, and scoring was anonymous. Reliability coefficients were measured for the pre-Project and post-Project samples, the difference between them, and choice of

best sample. Coefficients ranged from .62 to .95; most were above .75. Results on the relative performance of control and experimental groups conflicted, depending on the method of comparison: analysis of variance vs proportion. Detailed information concerning the holistic method and the rating categories is appended. (GK)

Descriptors—*Data Bases, Data Processing, Educational Research, *Information Dissemination, *Information Utilization, *Researchers, Social Sciences, Surveys, *User Satisfaction (Information), *Use Studies

Identifiers—*Project TALENT

To assess the potential user population for Project TALENT data and to identify barriers to usage of the data for secondary analysis, a small telephone survey of leading large-scale survey researchers was undertaken. The survey was designed to elicit suggestions for strategies for reducing barriers to use of the data. Four levels of barrier were considered: unawareness of the existence of the data base, negative attitudes about secondary analysis, specific difficulties or deficiencies of the data base, and cost of data processing. In the case of Project TALENT, most researchers were aware of its existence, but not of the scope of information contained in the data base; half expressed negative feelings about secondary analysis in general. Most respondents felt that useful data were present and expressed interest in future use. For established researchers, costs at the level required for use of Project TALENT data were not perceived as a barrier. Recommendations obtained from the respondents for improving usage matched the steps taken by the TALENT staff, although some areas were identified where additional effort was needed. (Author/GK)

Descriptors—*College Admission, *College Entrance Examinations, *Culture Fair Tests, Higher Education, *Predictive Validity, *Selection, *Test Bias, Testing Problems, Test Validity

Certain conditions are investigated as to whether they are necessary or sufficient to indicate the fairness of a test, or predictor, in its role in the college admissions procedure. Eight general positions are considered that have claimed to provide sufficient conditions for the unbiasedness of a standardized test or predictor: (1) equal test score means for the relevant groups; (2) equality of prediction systems; (3) equal risk (Einhorn and Bass); (4) constant ratio of acceptance for different groups (Thorndike); (5) equal conditional probability of selection (Cole); (6) equal probability of selection; (7) a culture-modified criterion (Darlington); and (8) equal expected utility (Petersen and Novick). These positions are described, and it is argued that none of the positions provides a sufficient condition for fairness; that only two provide conditions which are necessary for fairness in special situations; and that current selection policies using standardized tests are only fair in the grossest sense. A policy is recommended that uses the "best available predictors," but in a way which is reasonably efficient and more fair than current practices. (Author/GK)

Descriptors—*Achievement Tests, *Anxiety, *Higher Education, *Humor, *Scores, *Test Anxiety, *Testing Problems, *Test Items
Identifiers—State Trait Anxiety Inventory (Spielberger)

The roles of humor and anxiety in test performance were investigated. Measures of trait anxiety, state anxiety and achievement were obtained on a sample of undergraduate students; the A-Trait and A-State scales of the State-Trait Anxiety Inventory were used. Half of the students received additional humorous items in the achievement test. The purpose of the study was to examine the assumption that the introduction of humor into the academic test situation would facilitate achievement test performance for highly anxious students. Results of the study did not support this thesis; this finding conflicts with two previous investigations of the interaction of humor and anxiety in test performance. The major difference between the studies involves the method of humor presentation. The inclusion of humorous items as a pedagogical device may, however, be detrimental to high anxiety students, who displayed lower achievement than the low anxiety students on the humorous version of the test. Descriptors—Cognitive Development, Educational History, *Intelligence, Intelligence Quotient, *Intelligence Tests, *Nature Nurture Controversy, *Testing Problems, Test Reliability

Attention is drawn to the ways in which current conceptions of intelligence and its measurement differ from those which were generally accepted in 1928. The following principles underlying intelligence testing were generally agreed upon in 1928: (1) the assumption of intelligence as a recognizable attribute, responsible for differences among children and adults in learning, reasoning, and other cognitive capacities; (2) the principle that sampling appropriate mental tasks and norming scores against distribution in the population yields IQs acceptable as quantitative measures of level of intelligence; and (3) essentially innate and genetically determined, intelligence develops with age, regardless of the environment. These statements are contrasted to 1978 thinking, and the following common criticisms of intelligence testing are highlighted: most item types are developed haphazardly without clear rationale; group tests are often given by untrained lay people under poorly controlled conditions; test results depend on practice and motivation; the tests are unreliable, and, the public feels threatened by tests. The remainder of the paper is a look at recent investigations supporting genetic/environmental factors on intellectual growth. (GK)

Descriptors—*Educational Assessment, Ethnography, *Evaluation Methods, Models, *Perspective Taking, *Program Evaluation
Identifiers—*Multiple Realities, Objectivity, *Phenomenological Evaluation, Subjectivity

The phenomenological point of view is described, particularly the use of multiple realities as employed by sociologists to increase phenomenological understanding. Examples of applying the multiple reality approach to education are discussed. Part One is an introduction to the theme, "Phenomenology, Multiple Realities and Educational Evaluation." In this section, a concept (multiple realities) and a technique (analyzing data via different perspectives), used by phenomenologists—which may have value for educational evaluators—are identified and illustrated. The presentation of this section is nontechnical. Part II is a clarification of issues which have developed as a result of critical comments and reflection on the theme by the author. Additional questions for reflection are posed for such areas as paradigms, objectivity/subjectivity, methodology of phenomenology, and the relationship of phenomenology as an evaluation model with other models which are supportive of a subjective approach. Descriptors—Data, *Measurement Techniques, Number Concepts, *Physical Sciences, Program Evaluation, *Social Sciences
Identifiers—Counting, *Qualitative Data, *Quantitative Data, Ranking

Significant questions are addressed in an extensive discussion of the differences between qualitative and quantitative concepts and measurement strategies in the physical sciences. Also included is a discussion of number-generating activities often grouped in the social sciences under the term of measurement. Implications for the redirection of evaluation practice are considered. Specifically, Part I of the report distinguishes between the different types of concepts and the data associated with them. One conclusion is that the initial understanding of a phenomenon must be through qualitative concepts, and from them quantitative concepts may evolve. Part II examines various ways in which numbers are assigned; concluding that neither assignment nor measurement is synonymous with quantification. Part III examines the history of both the qualitative and quantitative in the physical sciences, and the implications for evaluation. The main idea of Part III is that much qualitative work has been prerequisite to fruitful quantification in the physical sciences. Because evaluation draws on the social sciences, which are in early developmental stages, quantification in evaluation may not be as fruitful as qualitative methodology. (Author/GK)

Identifiers—Canada, United States

The overview of the research and evaluation activities sponsored or conducted by the larger school systems in the United States and Canada provides references to studies in areas of concern to educators today. As an index to research and evaluation efforts, this annotated bibliography will facilitate the exchange of information by local school systems. The 216-item bibliography is based on a search of the material announced in Resources in Education (RIE) and Current Index to Journals in Education (CIJE) from January to December 1979. The citations are arranged in numerical order by ED (RIE) and EJ (CIJE) accession numbers. Each entry provides the following information: ERIC accession number (ED or EJ plus six digits), author, title, source, date of publication, and brief abstract of the material. Subject, author, and institution indexes appear at the end of the bibliography. The institution index includes the full address of each school district and the name and telephone number of a contact person. ERIC documents, material cited with ED accession numbers, may be purchased in paper copy or in microfiche from the ERIC Document Reproduction Service (EDRS). An EDRS order form follows the indexes at the back of the book. (Author)

Identifiers—*Netherlands, Teacher Referenced Tests

A "teacher referenced" test system is discussed in terms of its development, evaluation of implementation, and final validation. This diagnostic test system for problems in primary mathematics in Holland provides reliable, applicable information about both the learning process for the classroom teacher, and diagnostic instruments and materials used in remediation. One of the early large scale studies involved 29,000 primary school children: findings based on a 10 percent sample revealed that 75 percent of the problems could be diagnosed as a lack of understanding of mathematical concepts; only 25 percent were due to a lack of training. Steps in the test development process included an extensive qualitative orientation phase, and a total of five research and development revision cycles, each including evaluation of the actual school situation and the curriculum content being taught. The test system puts the teacher in charge of setting standards by "pin-pointing" white spots in the curriculum and remediation of pupil problems. (RL)

Competency Test in Reading

How the reference point for the Reading Test for New York State Elementary Schools was set is described. A sampling plan was used to define de facto reading standards in grades 5 and 6. Textbooks in English-Language Arts, science, social studies, health, and safety most used in those grades were determined by mailing a questionnaire to the superintendents of 41 randomly selected school districts in New York. Passages from the texts were analyzed using the Bornumth readability formula, and then converted to Degrees of Reading Power (DRP) units. Results indicated that the readability of textbooks was about the same for grades 5 and 6, and was relatively homogeneous across subjects and within subjects for grade 6. Administered at the beginning of grade 6, the standard reference point for the test was based upon the mean readability in DRP units of grades 5 and 6 textbooks combined. Remediation is required for students scoring below the reference point. (RL)

Descriptors—*Age. *Cognitive Measurement. Error of Measurement. *Factor Analysis. *Intelligence Tests. *Preschool Education. *Preschool Tests. Sampling. Young Children

Identifiers—Wechsler Preschool Primary Scale of Intelligence

Factor analyses of the Wechsler Preschool and Primary Scale of Intelligence (WPPSI) was conducted. The random sample included 100 boys and 100 girls beginning at age four with increments of 6 months up to age 6 1/2. The intercorrelation matrix of the 11 WPPSI subtests at each of the age levels was factor analyzed, and the percent of common, specific, and error variance was calculated for each subtest. The two-factor solution, closely approximating Wechsler's a priori grouping into Verbal and Performance scales, was retained at each age level as the most psychologically and psychometrically sound solution to describe the 11 WPPSI subtests. Calculation of the coefficients of congruence confirmed the stability of the factor structure across all age levels. With the exception of subtests Information and Comprehension, there appears to be adequate test specificity to allow for individual interpretation in the determination of a child's cognitive strengths and weaknesses prior to developing and implementing an individual educational program. Descriptors—*Evaluation. *Evaluators. Professional Education. *Professional Occupations. *Professional Services. *Standards

Identifiers—Professional Autonomy. Professional Role

Basic ways in which standards are generated and/or applied in developing professions are identified. Analysis of six sociologically defined characteristics of professions yields six generalized roles standards play in the establishment, development and maintenance of occupations as professions. The six central characteristics are: (1) definite, essential social service; (2) special, elaborate conceptual base; (3) extended special training; (4) autonomy and personal responsibility in practice; (5) dedication to clients over personal gain; and (6) identity, protection, and enforcement through a specialized organization. In turn, standards operate in legitimizing the social value of occupations; establishing the credibility and authority of conceptual bases of practice; determining the adequacy of training programs and the qualifications of trainees; defining the boundaries of

expert authority and professional responsibility; defining the conditions of faithful service to clients; and defining common values which underlie organizational identity, protection, and enforcement. These generalized roles are applied to practices in educational evaluation to raise fundamental questions about the possibility and desirability of professionalizing educational evaluation. Descriptors—Attitude Measures, Elementary Secondary Education, Psychometrics. *Researchers. *Standardized Tests. *Student Attitudes. *Teacher Attitudes. Testing

Identifiers—National Council on Measurement in Education

Data presented relate to the attitudes of elementary/secondary school teachers and students concerning standardized testing. Additional data provide a comparison of the attitudes of these groups with those predicted or expected of them by members of the National Council on Measurement in Education. The data are based on previous surveys, and provide an encouraging look at the reality of test interpretation in the schools. Overall, it is concluded that both students and teachers view standardized tests as one component of the ongoing instructional program—sometimes useful, sometimes not. They view test results with limited respect and healthy skepticism. A related conclusion is that measurement specialists generally do not have a good understanding of the opinions about standardized testing held by the users of such instruments. The attitudes predicted of teachers by test specialists are closer to the generalizations made by opponents of testing in the popular media than they are to reality. (GK)

Descriptors—Aptitude Treatment Interaction. Course Evaluation. *Generalization, Higher Education. *Measurement Techniques. Research Design. *Research Problems. Sampling. *Student Evaluation of Teacher Performance. *Test Validity

Identifiers—*Generalizability Theory

The generalizability issue is reviewed through previously published results and by presenting new data. When classes (teacher-course combinations) are used as the object of measurement, studies show very consistent results. However, when either the teacher or the course is treated as the object of measurement, with the other being a facet over which generalization is desired, results are highly inconsistent, especially with regard to the effects of discipline and item content. The hypothesis that discrepancies are largely due to sampling fluctuations in variance component estimates is presented. For teachers and courses as objects of measurement, a closer look at item content and discipline is needed; also necessary, however, is an investigation of course, teacher, and student characteristics, and teaching/learning styles. The pooling of institutional data is one possible way of moving closer to definitiveness. (Author/GK)

Descriptors—Accountability. *Evaluation Methods. *Evaluative Thinking. Evaluators, Models. *Program Evaluation

Identifiers—*Explanations

Three types of explanation in evaluation are discussed: causal explanations, explanations of actions, and explanations of value judgments. The role and importance of each form is addressed, as are alternate approaches to providing such explanation. The concept of explanation is defined as anything said or done to help someone understand something. The classification of explanation is based on a distinction between types and methods. Methods are identified and defined: descriptive, narrative, genetic, experimental, and theoretical. Two of these types of explanation—action and value explanation—have generally been neglected in evaluation. Causal explanation has been interpreted in a narrow fashion, and causal claims not satisfying its requirements have been regarded as unsound. Action and value explanations have objective significance which is capable of being spelled out empirically, and they are therefore susceptible to public testing. It is concluded that, in spite of imperfect circumstances, there are ways of responsibly arriving at intellectually and morally sound explanations; although the available means are demanding on the judgment and conscience of the evaluator. Identifiers—*Composite Scores. Elementary Secondary Education Act Title I. Evaluation Problems. RMC Models. *Title I Evaluation and Reporting System

Three principal uses of composite variables in the Title I Evaluation and Reporting System (TIERS) are examined in light of four basic methodological issues: (1) the criterion used in constructing the composite; (2) the likely reliability of both component and criterion variables; (3) the form of the relationship between components and criterion; and (4) the weighting schemes used to combine the component variables to form the composite. The first usage of composite requires "expert" judgment to assemble, weight, and combine information from several variables. Methods used to select students typically do not have well-defined, measurable criteria, and require a linear approach with a simple weighting scheme. A second usage of composite requires that a set of predictors be weighted and combined to predict a single outcome variable. A prediction framework typically includes a measured criterion variable and permits consideration of a variety of alternative models and weighting schemes. A composite predictor of student achievement gains may even uncover these aspects of the program relating to student gains. A third usage of composites which weights and combines multiple outcomes measures may incorporate such relevant constructs as students' self-concept or attitudes toward school. (RL)

dition. *Word Study Skills
Identifiers—*Emory Word Analysis Skill Inventory. *Rasch Model

The Rasch Model was used to define the word, analysis skill variable and to develop, field test, and calibrate a corresponding test for grades 2-12: the Emory Word Analysis Skill Inventory (EWASI). Word analysis objectives focusing on content and hierarchical levels of difficulty were identified and field tested with 78 students, grades 2-12, enrolled in a clinical reading program. The original 431 items in 22 subscales were then calibrated to parallel forms A and B. Each form contained 137 items in 13 subscales and three subgroups labelled: consonants, vowels, and word structure; 134 items clearly fit the test. Each form has the same item difficulty, width, and precision. (RL)

Issues of Test Bias and Validity.
Pub Date—Sep 79

Note—17p. Paper presented at the Annual Meeting of the American Psychological Association (New York, NY, September 3, 1979).

Pub Type—Speeches/Meeting Papers (150) — Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Evaluation Criteria, Psychometrics, *Test Bias, Test Construction, *Testing Problems, *Test Reliability, Test Selection, *Test Validity
Identifiers—*Standards for Educational and Psychological Tests

Three areas of concern related to test bias and validity should be considered during the revision of the Standards for Educational and Psychological Tests. The first area concerns the sources and consequences of test bias. Five sources of bias have been identified: numerical bias, role bias, status bias, stereotypic bias, and familiarity bias. The revised Standards should address each of these types of bias. Another set of problems to be considered are those related to the choice of a criterion in validity studies. Such problems include evaluation of criteria in aptitude test development, an evaluation of predictors in selection procedures, and the appropriateness of techniques based upon person matching. The third main area of concern is that of construct validity and problems related to the use of factors as criteria. Psychologists should focus on the inferences that must be made in a selection situation, rather than on rigid validity categories, and then to plan an appropriate validation strategy. (Author/GK)

Descriptors—*Educational Assessment, Elementary Secondary Education, *Evaluation Methods, *Program Evaluation, State School District Relationship, *Test Interpretation, Test Norms, Test Results, *Test Validity

Identifiers—Elementary Secondary Education Act Title I, *Normal Curve Equivalent Scores, *Title I Evaluation and Reporting System

The Normal Curve Equivalent (NCE) gain statistic is examined, and considerations for its interpretation are highlighted. The NCE gain is made up of an observed and an expected part. The observed score is the posttest result. The expected score can never be observed nor verified for any of the Title I Evaluation and Reporting System (TIERS) models; it depends on a theory of growth to estimate expected performance, and each of the TIERS models assumes a different theory of growth. Therefore, NCE gains will vary according to the methodology employed. Five distinct considerations educators need to keep in mind when trying to interpret NCE gains include: (1) no matter what the NCE gain turns out to be, it could have come out differently; (2) evaluation results are valid to the extent that the achievement tests used are valid; (3) different methodologies will yield different results; (4) individual NCE gains must be treated with extreme caution; and (5) group results become more valid as the size of the group increases. Identifiers—*Cuyahoga Community College Cleveland OH, Ohio (Cuyahoga County)

A developmental education evaluation model designed to be used at a multi-unit urban community college is described. The purpose of the design was to determine the cost effectiveness/worth of programs in order to initiate self-improvement. A needs assessment was conducted by interviewing and tapping the responses of students, faculty, staff, and administrators at the institution. Six components identified to be evaluated in the college's developmental education program included: (1) direct instructional program; (2) individualized self-paced learning program; (3) instructional support services; (4) instructional delivery systems; (5) cost of instructional and support services; and (6) such components as facilities, personnel attitude, qualifications of instructors, logistics, etc. For each of the components, the evaluation model took into consideration the following factors: criteria; properties; methodology; instrumentation; sample; variables; references; resources needed; estimated cost; and planned sequence of activities. The importance of the model is that the evaluation provides documented data of the quality needed to make educated decisions having major impact on students. (Author/RL)

Descriptors—*Achievement Tests, Discriminant Analysis, *Equated Scores, Goodness of Fit, Grade 7, Grade 9, *Intelligence Tests, Item Analysis, Junior High Schools, *Latent Trait Theory, Least Squares Statistics, *Mathematical Models, *Measures (Individuals)

Identifiers—*Optimal Scaling
This study develops a weighted least squares method for transforming a logistic scale in such a way that the estimates of ability parameters on the transformed scale are as comparable as possible with those on another scale. This scale transformation process is referred to as equating of scales. Equating is an important procedure in studies involving the logistic model and the latent trait model in general; the equating method presented deals with situations in which there are two separately scaled tests that have only some items in common (vertical equating or horizontal equating) or all items in common (horizontal equating). The necessity for equating in the later case arises when two scales have been derived by using two different groups of examinees which may have different characteristics pertinent to the results of scaling. In the former case (only some items common), the groups of examinees may or may not be overlapped. As one of the optimum estimation procedures, a weighted least squares method is introduced and applied to an achievement scale and an intelligence test. An advantage of the method over previously proposed methods is that highly discriminating items tend to affect equating more strongly than less discriminating items. (Author/RL)

Descriptors—Attitude Measures, Error of Measurement, *Factor Analysis, *Measures (Individuals), *Test Reliability, Weighted Scores
Identifiers—*Alpha Coefficient, Dressel (P L), *Estimation (Mathematics)

A procedure for estimating reliability in a factor analytic context, when reliability of the extracted factors is not an emphasis, is identified. The procedure is an extension of Dressel's work and might be applied in attitude measurement. It assesses how homogeneous the weighted original item responses are, when they are scored for pattern congruity. Four data sets generated to simulate different sample sizes, numbers of variables, numbers of variables per factor, and proportions of randomly generated error, were analyzed with alpha factor analysis followed by rotation to the varimax criterion. Subsequently, both types of consistency estimates were calculated. Results indicate that the two indices are sensitive to different data characteristics. The alpha coefficients are primarily sensitive to the variance each factor explains, as reflected by the number and magnitude of the salient pattern coefficients associated with each factor. The Dressel coefficients, however, are sensitive to the proportion of error embedded in the original data, and are less sensitive to the number of salient items associated with each factor. (RL)

Descriptors—*Achievement Tests, *Least Squares Statistics, Mathematical Models, *Test Reliability
Identifiers—*Estimation (Mathematics), Reliability Formulas

A least squares approach to estimating the reliability of a measure consisting of more than three content homogeneous or congeneric parts is proposed. The advantages of this method over a more indirect approach in which certain parts of a measure are combined to use Kristof's or Feldt's coefficients are examined. One hundred four-part tests were created by randomly assigning certain items from a 48-item mathematics achievement test to each of the four parts. Data on 400 examinees who took the test were divided into five subsets. Seven estimates of reliability were computed for 100 random splits for each subset of data. Some of the main results included: (1) there is a consistent order in the magnitudes of the means of the coefficients, regardless of sample size; (2) values of the average of the Kristof coefficients are greater than unity when sample size is small; (3) the proposed coefficient has smaller standard deviation and range than the Kristof coefficient; and (4) the Feldt coefficient tends to have smaller standard deviation and range than the proposed coefficient, and depends on the assumption that the error variance of a part is proportional to its length. Identifiers—*Polynomial Regression Models

Many combinations of a method and an approach for estimating the operating characteristics of the graded item responses, without assuming any mathematical forms, have been produced. In these methods, a set of items whose characteristics are known,

or Old Test, is used, which has a large, constant amount of test information throughout the interval of the latent trait of interest. The rationale is presented to generalize these methods so that they are made applicable when the test information of the Old Test is not constant. Both the transformation-free character of the maximum likelihood estimator and the method of moments for fitting a polynomial as the least squares solution play important roles in this rationale. Comparison of results using different types of test information functions are presented. The procedures presented in this paper will be applied in a simulation study, and published as separate papers, in order to investigate how the theory works in practice. (Author/RL)

Identifiers—*Decoding Skills Test, *Test Manuals
The Decoding Skills Test (DST) was developed to provide a detailed measurement of decoding skills which could be used in research on developmental dyslexia. Another purpose of the test is to provide a diagnostic-prescriptive instrument to be used in the evaluation of, and program planning for, children needing remedial reading. The test is criterion referenced, and consists of three subtests: Basal Word Recognition—11 lists of 10 words each (Subtest I); Phonics Decoding—lists of real/nonsense words (Subtest II); and Oral Passage Reading—11 passages corresponding to Subtest I (Subtest III). Although it does not emphasize comprehension ability, a "simple recall" comprehension supplement is included for detection of gross comprehension deficiencies. The manual explains test instructions, administration, and scoring procedures. Diagnostic scoring information and current uses of the DST for research and evaluation are also included; a copy of the DST is appended. (GK)

Is Bayesian Estimation Proper for Estimating the Individual's Ability? Research Report 80-3.

Tennessee Univ., Knoxville. Dept. of Psychology.
Spons Agency—Office of Naval Research, Arlington, Va. Personnel and Training Research Programs Office.

Pub Date—Jul 80

Contract—N00014-77-C-0360

Note—155p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC07 Plus Postage.

Descriptors—*Bayesian Statistics, Computer Assisted Testing, Information Utilization, *Latent Trait Theory, *Maximum Likelihood Statistics, *Measurement Techniques, Statistical Analysis, *Statistical Bias

The effect of prior information in Bayesian estimation is considered, mainly from the standpoint of objective testing. In the estimation of a parameter belonging to an individual, the prior information is, in most cases, the density function of the population to which the individual belongs. Bayesian estimation was compared with maximum likelihood estimation, a population-free estimation. Using several different types of tests, including both paper-and-pencil tests and computerized adaptive tests, the effect of priors on the resultant estimate was observed. It was pointed out that the use of priors in Bayesian estimation results in biases which favor certain individuals over certain other individuals, even though they are exactly equal with respect to their ability levels. An alternative method of using the maximum likelihood estimation with the replacement of positive and negative infinities for the two extreme response patterns, by a pair of new estimates, was proposed, and the resulting regression shows less bias than that of the Bayes modal estimate. (RL)

Kogan's Attitudes Toward Old People Scale: An Assessment of the Effects of Acquiescence Response Set.

Alabama Univ., Birmingham. School of Medicine.
Spons Agency—Administration on Aging (DHEW), Washington, D.C.

Pub Date—Nov 79

Grant—90-A-1401(01)

Note—16p; Paper presented at the Annual Conference of the Mid-South Educational Research Association (8th, Little Rock, AR, November, 1979).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Attitude Measures, *Gerontology, Graduate Medical Students, Higher Education, *Medical Services, *Older Adults, *Response Style (Tests), Social Attitudes, Testing Problems
Identifiers—*Acquiescence, Agreement Response Scale (Couch and Keniston), Attitudes Toward Old People Scale, Kogan, Likert Scales, Social Desirability

A correlational study was done on the effect of acquiescence response set upon Kogan's Attitudes Toward Old People (OP) scale. Couch and Keniston's Agreement Response (AR) scale was used as the measure of acquiescence tendency. Both scales were administered to 61 second year medical students and 44 individuals who were undergoing training in gerontology. No differences emerged for either sample group on the OP or AR scale, but both had consistently more positive than negative sentiments concerning old people. OP total scores and a subset of negatively worded OP items were found to correlate significantly in the negative direction with AR. However, acquiescence accounted for only 18% and 7%, respectively, of the score variance on OP total and OP negatively worded item subtest scores. The effect of AR was also examined by individual OP item-AR total score correlations. It was concluded that although acquiescence has a minor effect upon responses to the OP scale it appears that the item content of Kogan's scale is a more powerful influence upon respondents. Descriptors—*Criterion Referenced Tests, *Educational Assessment, Elementary Secondary Education, Experimenter Characteristics, *National Surveys, Sampling, *Scoring, Situational Tests, Testing Problems, *Test Reliability

Identifiers—*Interrater Reliability, *National Assessment of Educational Progress

The scoring scheme of the National Assessment of Educational Progress (NAEP) is studied, as well as techniques for estimating its reliability. NAEP data are collected on students of age 13 in the fall, age 9 in the winter, and age 17 in the spring. The scoring task, involving hand scoring of open-ended items, may vary between 25,000 responses to 10 items and 1,000,000 responses to 400 items. The size of the scoring staff may vary between two and 20 scorers, and their work is subject to 10 percent quality control over the entire scoring period. The general scoring scheme requires that responses be divided into two overall evaluative categories: acceptable and unacceptable. Acceptable responses provide some evidence that the respondent meets the relevant educational objective; unacceptable responses are not adequate to provide evidence. A discussion of techniques for estimating reliability of the scoring scheme involves: (1) determining the percent of observed agreement among scorers and comparing it to the agreement one would expect on the basis of chance alone; and (2) examining the patterns of disagreement in the scoring of individuals. The test statistics for measuring disagreement are applied to data from multi-way tables. (RL)

Identifiers—Frequency Analysis, Frequency Data, *Log Linear Models, Netherlands, *Rasch Model

Data are summarized in Scheuneman's Score x Group x Response frequency table in order to investigate item bias. The data can arise from two different sampling models: (1) multinomial sampling in which a fixed sample size is used and the responses are cross-classified according to score, group, and response; and (2) product-multinomial sampling in which for each group a fixed sample size is used and the responses are cross-classified according to score and response; Data for both sampling models were analyzed using two logit models, i.e. special cases of log linear models, and results of the procedure were applied to Scheuneman's data using the program ECTA. The item was uniformly biased as shown by whites performing better than blacks in all score categories. Using a frequency table derived from Table 2 of Perlone, Wright, and Wainer's nine-item scale for parole decision data, the linear logit model and the Rasch Model were found to be equivalent. Consequently, the estimates for the parameters in the log linear model yield unconditional maximum likelihood estimates for the parameters in the Rasch Model. (RL)

The Negligible Effects of Process-Product Distinctions on Evaluation Quality.

Pub Date—Oct 79

Note—8p; Paper presented at the Annual Meeting of the Military Testing Association (21st, San Diego, CA, October 15-19, 1979).

Pub Type—Speeches/Meeting Papers (150) — Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Evaluation Methods, *Formative Evaluation, *Measurement, Measurement Objectives, *Summative Evaluation

Sources of confusion about the distinction between process and product measurement are identified, and the effect of the distinction on evaluation quality is shown. Process measurement involves the measure of behavior, performance of a task which generates no products, an independent variable or treatment, use in diagnosing performance, and means. Product measurement involves the measure of a trace ("product") of behavior, performance of a task which generates products, a dependent variable or outcome, use in certifying performance, and ends. Four kinds of evaluation may result from various combinations of precision and imprecision in standards on the one hand, and measurement or estimation of behavior or products on the other. Evaluation improves with the extent to which it consists of comparing measured characteristics of behavior or products with well defined standards, and its quality does not depend on whether process (behavior) or product (trace of behavior) has been measured. Descriptors—*Evaluation Criteria, *Expectation, Higher Education, *Q Methodology, *Student Evaluation of Teacher Performance, *Teacher Effectiveness, Test Construction, Test Validity

A 24-item Q-sort faculty evaluation instrument based on Spady's model of teacher competency was constructed and piloted. Following the second pilot

and factor analysis of the data, the items were reduced to 16. Test-retest reliability was .81. High correlations between items and their subscale total and low interitem correlations indicate independence of items. The instrument is administered at the beginning of the semester according to students' perceptions of an ideal professor for the course and at the end as a measure of the students' perception of the professor of the course. Comparison of pre-post results indicates professor's performance in relation to students' expectancies. Since these are known at the beginning of the course, the instructor may modify his/her approach early in the semester or explain to students why they are going to get something different from their anticipations. Evidence in the literature of the importance of expectancy in evaluation and results of this investigation suggest that current instruments may be invalid as measures of instructor performance because the variable is expectancy and is not controlled for. Identifiers—*Affective Perception Inventory (Soares and Soares), *Multitrait Multimethod Techniques

The varying perspectives of self, as determined by distinct or discrete situations and individual perceptions within a multitrait-multimethod framework, were tested, and evidence for the validity of the measures was found. Six hundred ninety-eight students in grades 1-12 were randomly selected from suburban classrooms in the Northeast and administered the Affective Perception Inventory (API). The API consists of nine scales which measure self concept as a person and student, in six specific classroom disciplines (English, mathematics, science, social studies, the arts, and physical education), and in school and toward important figures in school. There were two peer-raters for each self-rater analyzed, in addition to teacher-raters at every grade level. A multitrait-multimethod matrix was obtained for determining reliability, and discriminant and convergent validity. The pattern that emerged from the results can be summarized as follows: (1) internal consistency on all scales; (2) respectable convergent validity between self and peers, with less agreement between peers and teachers; (3) differential discriminant validity; and (4) varying self-pictures developing from individualized configurations of the encoding process in the brain. Descriptors—*Behavior, *Cultural Context, Ethnography, *Evaluation Methods, *Observation
Identifiers—Ecological Psychology

Observational approaches used by ecological psychologists can focus on the behavior of persons or on their settings. The options for subject-centered observation are diary methods, specimen records, time sampling, and event sampling or critical incident recording. Serious limitations correlated to the time interval method, as it is often applied, include the use of precodes, creation of behavior fragments, and lack of information from the channel of the behavior stream. Consequently, ecological psychologists lean toward specimen records as their chief instrument for describing individual behaviors. Assessing settings by use of specimen records (or

any other subject-centered observation) has certain clear limitations, such as (1) emphasis on psychological variables such as nurturance, rejection, generality, etc.; (2) dependence upon the subject's motives and capacities; and (3) dependence upon the subject's experience. Therefore, ecological psychologists depend on the behavior setting as their major unit for analysis of context description. The unit is a combination of physical milieu and behavioral program with both temporal and spatial boundaries. (RL)

Identifiers—*Distractors (Tests), Japan, K Index (Samejima), Tailor Made Test, Three Parameter Model

Research related to the multiple choice test item is reported, as it is conducted by educational technologists in Japan. Sato's number of hypothetical equivalent alternatives is introduced. The based idea behind this index is that the expected uncertainty of the m events, or alternatives, be large and the number of hypothetical, equivalent alternatives be close to m. A new index, K*, is proposed as a modification of m; it is a means of invalidating the three-parameter logistic model for the multiple choice item. Shiba's research on the measurement of vocabulary, which is based upon latent trait theory, is introduced; this includes an eventual tailored test on vocabulary, utilizing information obtained from distractors as well as correct answers. A new family of models for the multiple choice item is proposed, formulating both the operating characteristics of distractors and the effect of random guessing. (Author/GK)

Identifiers—National Assessment of Educational Progress

The National Assessment of Educational Progress reports data about levels of educational achievement of 9-, 13-, and 17-year-olds in several learning areas, including art, music, literature, reading, mathematics and science. Within each age group, females' and males' levels of art achievement were compared, and sex differences were contrasted with results from the other assessment areas. In the 1974 art assessment items fell into four categories: (1) affective involvement with art; (2) cognitive activities involved with art; (3) drawing and design skills; and (4) art participation background information. Conclusions show art as not having strong female or male dominance. Males and females' drawing skills in particular show mixed percentages of success. Neither sex at any age level was very knowledgeable about art. Attitudes toward art differ with age. Sex related patterns of achievement in art are unlike those from literature and music; females conform to popular expectations in literature and music while they do not always in art. Achievement patterns vary across ages and topics with respect to male-female dominance and the science results show consistent male dominance throughout. (GK)

Identifiers—*Future World Perspective Values Scale

The purposes of the study were to design a Future World Perspective Values Scale, test the validity and reliability of the scale, and collect data on teachers' and students' values. The scale was designed to measure the four value constructs of selective economic growth, adaptive technology, international cooperation, and world economic justice. Factor analysis indicated that 28 scale items were valid measures of the four value constructs. Additionally, all four factors were found to be reliable. Descriptive data was collected on a sample of pre-service and in-service teachers, and high school students. Results showed that the teachers and students accepted future world perspective values, but students to a lesser degree than teachers. There was a significant difference between scale scores of the teachers and students. Further analysis of responses revealed that teachers and students are generally supportive of selective economic growth, international cooperation and world economic equity values. Both groups expressed mixed views with respect to adaptive technological values. (Author/GK)

Descriptors—Academic Achievement, *Affective Behavior, *Affective Objectives, *Classification, Cognitive Processes, Elementary Secondary Education, *School Attitudes, Self Concept, Theories, Values Clarification
Identifiers—Learning Hierarchies

Several categories of the affective domain are important to the schooling process. Schools are delegated the responsibility of helping students to clarify their esthetic, instrumental, and moral values. Three areas of affect are related to student achievement: subject-related affect, school-related affect, and academic self concept. In addition, positive self concept is likely to be developed if a student has successful experiences in school. Since the term affect has multiple components, researchers have attempted to describe the affective domain by creating taxonomies or classification schemes. Such taxonomies have been developed by Krathwohl, Brandhorst, Gephart and Ingle, Hoepfner, and Nunally, among others. Based on an analysis of these taxonomies, three major categories of affective goals can be identified as significant components of schooling: (1) goals related to positive attitudes toward subject areas or disciplines; (2) goals related to the development of a rational basis for attitudes and values; and (3) goals related to affective processes. Based on these goals, learning hierarchies can be developed for the affective domain, and hierarchies can be developed which integrate the affective and cognitive domains. (BW)

Identifiers—*Likert Scales, *Paired Comparisons

The traditional vehicle for collection of information from parents about a school's goals is a questionnaire that provides alternative goal statements. Two problems are frequently associated with such questionnaires: the goal lists suggest that a school can achieve all desired goals simultaneously; and many surveys use stimulus questions that are short, abstract, and laden with educational jargon. Based on these general problems, an experiment was designed to compare responses of parents to four types of stimulus materials: three sets of materials in paired-choice format, varying in their level of specificity; and one set of materials in a Likert rating scale, at a broad level of specificity. Each of 224 respondents was asked to express his or her preferences for eleven curriculum areas. In the paired-choice format, reading was ranked highest; in the Likert format, reading and mathematics tied for the highest ranking. Music and art were ranked lowest. Rankings from the two formats were found to be substantially different. All paired-choice formats were more effective than the Likert format in allowing respondents to discriminate among their preferences. More concrete stimulus materials enhanced respondent discrimination among preferences, but did not result in substantial differences among preference orderings. (BW)

Identifiers—*Bloom (Benjamin S), Canada, *Normalization Regression Estimation, Ridge Regression Analysis

Advantages of normalization regression estimation over ridge regression estimation are demonstrated by reference to Bloom's model of school learning. Theoretical concern centered on the structure of scholastic achievement at grade 10 in Canadian high schools. Data on 886 students were randomly sampled from the Carnegie Human Resources Data Bank. The 41 variable model formulated by Bloom demonstrated transmission of school performance and school-related attitudes from grades 9-10, as well as selected student background factors. Because school learning models call for reciprocal effects relationships at both entry behavior and learning outcomes stages, two stage least squares (2SLS) estimates were performed. Although incorporation of feedback linkages in structural equation models aggravated the multicollinearity problem to the extent that the 2SLS procedure was inadequate, normalization regression was able to cope satisfactorily with each of six harmful effects. The substantive results did not particularly support current theories of school learning, especially those concerned with the effects of socioeconomic status on schooling success, and the impact of sex differences on schooling outcomes. The Use of Standardized Achievement Test Batteries in the Evaluation of Curriculum Changes in Junior High School Earth Science.

Pub Date—[80]

Note—13p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Achievement Tests, *Curriculum Evaluation, *Earth Science, Junior High Schools, Science Curriculum, *Secondary School Science, *Standardized Tests, *Test Interpretation, Test Items

Identifiers—Comprehensive Tests of Basic Skills, Metropolitan Achievement Tests, Sequential Tests of Educational Progress, SRA Achievement Series, Stanford Achievement Tests

The sampling of test items found within the Science portion of selected standardized achievement test batteries is examined. The lack of sensitivity of such items to the curriculum changes often attempted in Earth Science is demonstrated. The following five standardized achievement test batteries commonly administered to pupils in grades 7-9 were selected for use in this study: Comprehensive Tests of Basic Skills, Metropolitan Achievement Tests, SRA Achievement Tests, Sequential Tests of Educational Progress (STEP), and Stanford Achievement Tests. Individual test items were classified into the general categories of Earth Science, Life Science, and Physical Science. Test items within general categories were further subdivided into content areas. With the exception of STEP, the three sciences were not represented within a given achievement test battery by equal numbers of test items. In addition, some of the achievement test batteries omitted or undersampled items in one or more of the content areas within the Earth Sciences. It is imperative to convince decision makers that standardized achievement test batteries should not be used to evaluate curriculum changes. (RL)

Identifiers—*Comprehensive Employment and Training Act

Because CETA and vocational education programs have the potential of serving the important social goals of reducing unemployment and providing the benefit of training, evaluation control at the top is essential. This control can be exerted in a manner that avoids some of the pitfalls of overcontrol through providing more alternatives and facilitating decentralized choice and sampling within this range of options. Providing more options at the national level to facilitate local choice may seem like too much work. However, a steep price for evaluations of these programs is already being paid. So, the question of what it takes to make evaluation results truly useful and used is very important. It is shortsighted to assume that evaluation data can influence national policy without being perceived as relevant, accurate, and useful at the local level. Since human resource development programs are locally implemented, federal initiatives can be fairly easily blocked or side stepped at the local level. Consequently, the issue of creating an acceptable balance between federal and local control of evaluations is critical to the long range survival, improvement, and success of human resource development programs in meeting significant national problems. Education, Reading Achievement, Screening Tests, *Spanish Speaking, Test Reliability, *Test Validity, Writing (Composition)

Identifiers—Connecticut, *Language Assessment Battery

Questions are addressed pertaining to the Language Assessment Battery (LAB), currently the only single battery that meets all of the state of Connecticut criteria for an instrument to determine which pupils must be offered bilingual education. Normed on an English dominant population, the primary purpose was to obtain its psychometric characteristics for pupils of limited English proficiency. Other purposes were to determine its selection accuracy, and to examine it as a measure of English achievement within a bilingual program. Validity was also reviewed. The psychometric portion of the study used .95 K-2 Hispanics in a bilingual program. Scale structure, internal consistency reliability, and item statistics were analyzed. The other investigations used the publisher's information. The problems encountered were instructive for the makers of this type of test. Psychometrically the test is sound except for the low reliabilities and poor item statistics of the reading and writing subscales in K and grade 1. Those scales at those grades also have little content validity. Standard error of measurement is very poor in terms of percentile rank near the cut scores used for selection. Establishment of standards of construct validity for this new type of test are recommended. (Author/GK)

The evolution of the structure and ideology of a post-doctoral training program for women and minorities in educational research is described. The program was originally designed following the mentoring model current in social science and feminist literature in the mid-1970s. With experience, however, the program co-directors found that the mentor relationship did not allow for the mutual teaching and learning essential in a new field and that the relationship too often simply replicated the hierarchy characteristic of the traditional and patriarchal research university. Proposed in its place is a program modeled on the collective work and cooperative ideals of feminist theory. (Author/GK)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Computer Assisted Testing. Computer Programs. *Data Bases. Data Collection. Higher Education. Information Storage. Item Analysis. *Item Banks. *Self Evaluation (Individuals). *Student Evaluation. *Test Construction. Vertical Organization

Identifiers—*RIBYT Data Base System

The function and structure of a data base system called RIBYT (Review It Before You Test) is described. RIBYT simultaneously controls and associates questions in question pools for many courses of instruction. The data base stores questions created by both faculty and students and is used for formal testing and student self-assessment. The structure of the data base allows rapid retrieval of multiple types of sets based on predetermined logical associations. The data base also provides for the collection and association of feedback information not only on student performance, but also on the quality of the questions in the data base. This quality is assessed through students' subjective comments about the questions they receive and through statistical item analysis. Feedback is also provided to students on how they are able to improve the quality of their question input. The structure of the data base is easily transferable to many data base systems which currently exist. (Author/RL)

Descriptors—Career Choice. *Career Development. *Child Caregivers. *Competence. *Credentials. Day Care. *Personnel Evaluation. *Validity

Identifiers—California. *CDA, Child Development Associate, Minnesota. Professionalism

A credential called the Child Development Associate (CDA) was the focus of this study. Based on the competence of child care staff, it offers two benefits: it may be fair and accurate without resorting to impractical requirements of education and experience, and its recognition may benefit workers' careers. Credentialed and noncredentialed groups of staff were compared on interview responses, test scores, and job supervisor ratings. Also included was a review of related occupations and of the relationship of state child care regulations to the CDA credential. Results of the study indicated that accurate judgments about staff qualification are feasible with a competence assessment like the CDA, but also suggested ways in which the accuracy of the credential procedure might be improved. Given the absence of more differences between the groups, the CDA cannot be used as the sole indicator of ability. Few findings suggested career development benefits from the CDA, perhaps due to limited opportunities within child care. The results suggested possible future career opportunities for CDAs. As a policy to enhance child care quality, the CDA must be viewed as one among many policy alternatives. (Author/GK)

Prekindergarten Program Product Evaluation Report: 1979-80.

Saginaw Public Schools, Mich.

Pub Date—Jul 80

Note—68p.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Affective Objectives. Cognitive Objectives. *Disadvantaged Youth. *Formative Evaluation. Language Acquisition. Parent Participation. *Preschool Education. *Program Effectiveness. *Program Evaluation. Psychomotor Objectives

Identifiers—Elementary Secondary Education Act

Title I, Michigan (Saginaw). *Piagetian Theory. Process Product Research

Evaluation of a Title I Prekindergarten Program serving thirteen elementary schools is presented. Through a screening test, children most needing prekindergarten experience were chosen for participation. The program followed the Piagetian theory of child development concentrating on the cognitive, psychomotor, and affective domains. Both process and product evaluations were conducted. The former concentrated on determining whether classroom activities matched those stated in the proposal, the roles of parents/aides in the classroom, and what efforts were made to remedy screening problems observed in the previous year. The product evaluation employed the Prekindergarten S.O.R.T. instrument to measure thirteen of the program's sixteen objectives. The Prekindergarten Program proved to be successful; in addition, the following recommendations are offered: (1) attention should be paid to the building level achievement data; (2) the Department of Evaluation, Testing and Research should monitor the screening process; (3) recruitment publicity should be increased; (4) a plan for a bilingual prekindergarten experience should be formulated; (5) the Title I Prekindergarten Supervisor Monitoring Instrument should continue to be used; and (6) the inservice program should be expanded. (GK)

Reconstructive Memory: A Non-Traditional Approach to Assessing Young Children's Intelligence.

Pub Date—Apr 80

Note—23p. Paper presented at the American Educational Research Association (64th. Boston, MA, April 7-11, 1980).

Pub Type—Speeches/Meeting Papers (150)—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Cognitive Measurement. Concept Formation. *Developmental Stages. Intelligence. *Intelligence Tests. Kinesthetic Perception. Learning Theories. *Memory. Pattern Recognition. *Preschool Children. Preschool Education. Test Construction

Identifiers—*Piagetian Tasks. Piagetian Theory. *Reconstructive Memory

Implications are discussed for new instrument development by way of a methodological study which used a task allowing one to focus upon: (1) a non-verbal approach; (2) memory functions; (3) a variety of mnemonics that children use in information retrieval; and (4) a non-traditional procedure supported by psychological and developmental research. A Piagetian memory task (Static Imagery) was adapted to study the respective roles of color, form, and spatial cues in preschoolers' memory. A seven-element array of variously colored geometric forms was shown to each of 69 four- and five-year olds for 30 seconds, after which an experimenter destroyed the arrangement, mixed the forms, and asked the child to rebuild the pattern. The task allowed for an analysis of the child's (1) search and selection strategies; (2) approach to pattern reconstruction; (3) correctness of patterns, with the possibility for partial correctness; (4) classification skills based on the error pattern analysis, and (5) relative use of memory aids of color, form, or spatial arrangement. Results indicated that all children performed better than chance and that their reconstructions were not mere chains of blocks, sequenced randomly one after another. (Author/RL)

Adams, Kay A.

Using Needs Sensing Information to Set R & D Priorities.

Pub Date—Apr 80

Note—9p. Paper presented at the Annual Meeting of the American Educational Research Association (64th. Boston, MA, April 7-11, 1980).

Pub Type—Speeches/Meeting Papers (150)—Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Data Collection. *Educational Research. National Surveys. *Needs Assessment. Research and Development Centers. *Research Needs. School Surveys

Identifiers—*Needs Sensing

Needs sensing is any type of systematic assessment of needs ranging from formal data collection through surveys to a more informal use of expert opinion through advisory groups. It is especially dif-

ficult to use systematically collected, data-based needs in research and development (R & D) organizations because they typically: (1) have the features of temporary organizations; (2) have multiple target audiences; and (3) operate on the cutting edge of changing problems. In a 1979 survey of 12 R & D organizations conducted collaboratively by the Council for Educational Development and Research and the National Center for Research in Vocational Education, the most predominant needs sensing technique was group process, including meetings, conferences, convening advisory groups and consultation; the second most frequent technique was content analysis of policy and research reports, followed closely by analysis of existing data. The majority of the information was collected from national and state education leaders. Although needs sensing appeared to influence priorities across all the R & D organizations surveyed, the most influential factors appeared to be the political process and funding opportunities. (RL)

A Need Assessment Measurement Model and Illustrative Findings Based on Two Statewide Surveys.

Pub Date—Sep 80

Note—31p. Paper presented at the Annual Meeting of the American Psychological Association (Montreal, Canada, September 3, 1980).

Available from—Urban Studies Center, University of Louisville, Louisville, Kentucky, 40205.

Pub Type—Speeches/Meeting Papers (150)—Reports - Evaluative (142)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Adults. *Measurement Techniques. Mental Health. *Models. *Needs Assessment. Older Adults. *Social Services. *State Surveys. Validity

Identifiers—*Kentucky Elderly Need Assessment. *Kentucky Social Services Need Assessment Project

A measurement model was developed and refined in two successive need assessment surveys of samples representative of statewide populations. The first was the Kentucky Elderly Need Assessment (KENA) which was administered to 570 persons, age 60 and older, across Kentucky. The second was the Kentucky Social Services Need Assessment Project (SNAP), which was administered to over 1800 Kentucky adults. Both surveys were administered face-to-face in the respondent's home. The measurement model included: (1) a prioritizing of need by the respondent from a long list of possible needs; (2) a conceptualization of need as being multifaceted and, therefore, use of different types of measures of need (in SNAP: descriptive, evaluative, service difficulties, service barriers, and adequacy of services in the community); (3) measurement of need across a wide variety of topics or areas in which people might have needs (in SNAP: mental health, financial, social activity, employment, physical health, transportation nutrition, and environment); and (4) inclusion of a criterion variable, a measure of Quality of Life which was used to assess the validity of the need measures. Self-Perceptions on Sex-Typed Attributes and the Occupational Aspirations and Expectations of High School Females.

Pub Date—Apr 80

Note—32p. Paper presented at the Annual Meeting of the American Educational Research Association (64th. Boston, MA, April 7-11, 1980).

Pub Type—Speeches/Meeting Papers (150)—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Career Choice. Expectation. *Females. *Grade 12. High Schools. Occupational Aspiration. Questionnaires. Self Concept Measures. *Self Esteem. *Sex Stereotypes. Identifiers—Masculinity Femininity Variable. Occupational Status. Personal Attributes Questionnaire

Relationships among high school females' self-perceptions on sex-stereotypic attributes and their occupational aspirations and expectations were investigated. Two measures were administered to, and data were collected from, 200 randomly selected females in grade 12 from a large urban school district. Occupational choice was measured by two open-ended questions: (1) what job would you like to have?; and (2) what job do you think you will

probably have? Four possible levels of sex-type included male-dominated aspiration and male-dominated expectation (MAE), male-dominated aspiration and female-dominated expectation (MAFE), female-dominated aspiration and female-dominated expectation (FAE), and female-dominated aspiration and male-dominated expectation (FAME). Sex-typed attributes were measured by means of six factors (emotionality; empathy; involvement; aggression; self-confidence; and need for approval) of a Personal Attributes Questionnaire (PAQ). Findings resulting from a two-way multivariate analysis of variance (MANOVA) included: (1) MAE was significantly different from MAFE and FAE in terms of need for approval, aggression, empathy and self-confidence; and (2) no differences in self-perceptions on sex-stereotypic attributes were found between females with high prestige aspirations and expectations and those with low prestige aspirations and expectations. Schilling, Deanna E.
Reward Experience, Socioeconomic Status, and Sex: Exploring Parameters of the Overjustification Effect.

Pub Date—Apr 79

Note—35p. Paper presented at the Annual Meeting of the American Educational Research Association (63rd, San Francisco, California, April 8-12, 1979).

Pub Type—Speeches/Meeting Papers (150)—Reports—Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Grade 1, Hypothesis Testing, Motivation Techniques, Primary Education, *Reinforcement, *Rewards, *Sex Differences, *Socioeconomic Status, Student Motivation

Identifiers—*Overjustification

The overjustification hypothesis predicts decreased intrinsic motivation when persons are paid to perform an interesting task. The factors of reward experience, socioeconomic status (SES), and sex are examined while testing conflicting predictions of the hypothesis and reinforcement theory. Children from grade 1 at two public elementary schools worked on a counting task. Half of the children attended a school which had a 100% minority enrollment (low SES), and half attended a school which had a 95% Caucasian enrollment (middle SES). A Baseline 1, treatment session, Baseline 2 paradigm was used to assess the effects of both reward introduction and withdrawal. Reward experience (group), SES, and sex were manipulated in a 3 x 2 x 2 design. Subjects who earned a reward during the treatment session for maintaining Baseline 1 output levels, significantly outperformed never-rewarded controls during Baseline 2. Control subjects initially highest on motivation measures declined significantly from Baseline 1 to Baseline 2; comparable subjects in the reward groups showed no change. In addition, reward-group subjects that were initially lowest in motivation significantly increased their output and time on task across sessions. (Author/RL)

Descriptors—*Abstract Reasoning, Adults, Cognitive Measurement, Cognitive Processes, Creativity, Educational Theories, *Intelligence, Intelligence Tests, Measurement Techniques, *Novelty (Stimulus Dimension), Performance

Identifiers—*Nonentrenchment

Intelligence can be best understood through the study of nonentrenched, i.e., novel, kinds of tasks. Such tasks require subjects to use concepts or form strategies that differ in kind from those to which they are accustomed. The only partial success of the cognitive-correlates and cognitive-components ap-

proaches to intelligence that are in contemporary favor might be due in part to the use of tasks that are more entrenched (familiar in kind) than would be optimal for the study of intelligence. Two nonentrenched tasks are described, one requiring projection into the future of states of objects, the other requiring complex analogical reasoning where multiple terms of analogies can be replaced by alternative answer options. Research into the first task focused upon performance components of task solution (i.e., components used in the execution of strategy); research into the second task focused upon metacomponents of task solution (i.e., components used in the planning of strategy). Correlations of task and component latencies were generally higher than those obtained in most contemporary information-processing research on the nature of intelligence. Some speculations are made about the implications of these results for educational theory and practice. (Author/RL)

Scarr, Sandra
Heritability and Educational Policy: Genetic and Environmental Effects on IQ, Aptitude and Achievement.

Pub Date—Sep 79

Note—43p. Paper presented at the Annual Meeting of the American Psychological Association (New York City, NY, September 1, 1979).

Pub Type—Speeches/Meeting Papers (150)—Reports—Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Academic Achievement, *Academic Aptitude, *Adolescents, Adopted Children, *Family Characteristics, High Schools, *Intelligence, *Nature Nurture Controversy, Social Class, Testing Problems

Identifiers—Wechsler Adult Intelligence Scale

The effects of family background on adolescents' IQ, aptitude, and school achievement test scores challenge some of the usual beliefs about the fairness of achievement rather than IQ tests, and the role of genetic differences among individuals and social class groups in academic achievements. Subjects included 115 adoptive families with adolescent children, adopted in the first few months of life, and a comparison sample of 120 biological families with their own adolescent offspring. Families ranged from solid working to upper middle class. Regressions of adolescents' IQ, aptitude, and achievement test scores on measures of family background revealed that differences among social class environments have little effect on IQ scores but larger effects on school achievement scores. Working class adolescents are at a greater disadvantage relative to upper-middle class adolescents when the tests sample recently taught material. Genetic differences among individuals and among social class groups were found to be approximately the same for all types of tests. Correlations of related and unrelated siblings reared together suggest that the heritabilities of IQ and school test scores are in the range of .2 to .6 in a white population of working to upper-middle class families. Descriptors—Affective Measures, *College Freshmen, *Educational Environment, Higher Education, *High School Students, Interpersonal Relationship, Longitudinal Studies, Multivariate Analysis, *Self Concept, *Self Concept Measures, Self Esteem, *Student Development

Identifiers—*Erwin Identity Scale

Several environmental constructs which influence identity are measured by the Erwin Identity Scale (EIS) and delineated. The EIS is an objectively scored instrument designed to measure the student development concept of identity based on the conceptualizations of Chickering and Erikson. Three sub-scales (confidence, sexual identity, and conceptions about body and appearance) comprise the EIS. The EIS and environmental referents were administered to a sample of high school students and college freshmen. The college freshmen were randomly di-

vided into two groups and retested at two points during their freshman year. The responses from the environmental referents were content analyzed and placed into various categories. Mean differences on the EIS sub-scales were studied among the various environmental categories using multivariate analysis of variance (MANOVA) designs. The impacts of the academic environment, particularly classroom experiences, and of the interpersonal campus environment were reflected by high or low scores on the EIS. In some instances, students who did not respond to the environmental referents had the highest identity scores. Students who felt most comfortable with their sense of self were the least affected by the college experience. (Author/RL)

Descriptors—*Cognitive Measurement, Context Clues, Higher Education, Learning Processes, Paired Associate Learning, *Recall (Psychology), *Transfer of Training, *Word Frequency, Word Lists, *Word Recognition

Identifiers—*Isolation Effect, *Simultaneous Learning

Six experiments were intended to characterize more completely a phenomenon found when lists were first learned in isolation and then placed together for simultaneous learning. The subjects learned three lists, each list clearly distinguishable from the other. One of the lists was recalled, another was tested for frequency information, and the memory for the third was tested by recognition procedures. Certain variables were manipulated to see if the magnitude of the phenomenon could be changed. One of the experiments, using college students as subjects, dealt with transfer from simultaneous learning to isolated learning, and another showed that associative learning occurred for items presented together for study in simultaneous learning. Degree of level of isolated learning had only a small effect on the negative transfer observed in subsequent simultaneous learning; the higher the degree of learning the less the negative effect. However, this was not consistent in all experiments. Transfer from simultaneous learning to isolated learning resulted in high positive transfer. Recall did not differ for simultaneous and isolated learning whereas recognition and frequency judgments were poorer in simultaneous than in isolated learning. Items from different tasks appearing together in simultaneous learning became strongly associated. (Author/RL)

Descriptors—Essay Tests, *Expectation, *High Schools, Multiple Choice Tests, *Study Skills, *Test Format

Identifiers—*Note Taking, *Pretraining

Two variables directly related to understanding and improving notetaking practices and instructional strategies were investigated. The first variable investigated was the different levels of pretraining: pretraining vs. no pretraining; and the second was the influence of three types of test mode expectations: multiple choice, essay, or non-specified test. A 3 x 2 factorial design was employed. One hundred students in grades 11-12 were randomly assigned to one of the six treatments. Pretraining was most beneficial for those expecting a multiple choice test and hindered those expecting an essay test. Those expecting a non-specified test attempted to record the most information while both multiple choice and non-specific test expectations led to more effi-

cient notes (amount of ideas to number of words) than those expecting an essay test. The indication is that different test expectations lead to different study strategies and organizational schemes. (Author/RL)

Descriptors—*Age Differences, Elementary Secondary Education, Grade 2, Grade 6, Grade 10, *Incidental Learning, Intellectual Development, *Phoneme Grapheme Correspondence, *Recall (Psychology), *Semantic Differential
Identifiers—*Encoding

In an incidental memory task, second, sixth, and tenth-grade students performed three orientating tasks on different subsets of items in a list of common nouns. In one condition (EPA), children judged words on the Evaluative, Potency and Activity dimensions of the semantic differential. In another condition (EEE) children made phonetic judgments. Analysis of recall scores supported the hypothesis that superiority of semantic over phonetic encoding would increase with age. However, results did not support the hypothesis that superiority of the EPA condition over the EEE condition would emerge with age as children's semantic structures become more differentiated. In fact, the two conditions did not differ at any grade. In a second experiment, a shift in recall favoring the EPA over the EEE condition was observed between tenth-graders and adults. It was speculated that in addition to dimensional independence which emerges by age 12, relatively equal weighting of dimensions within semantic structure, which may not appear until adulthood, is a necessary condition for the facilitating effect of multiple dimension encoding to occur. Descriptors—*Academic Achievement, Affective Measures, *Course Evaluation, Course Objectives, Curriculum Development, Data Collection, *Evaluation Methods, *Expectation, Higher Education, *Item Sampling, Pretests Posttests, Rating Scales, Student Attitudes, Teacher Attitudes
Identifiers—Student Evaluation of Achievement

Two different methods for collecting course-specific data on class learning and growth are discussed. The first, Item/Student Sampling, is directly dependent upon assessing class performance both prior to and following instruction. This procedure relies on multiple matrix sampling techniques. The second method, referred to as Self-Report of Course Outcomes, is based upon a combination of student and instructor course expectations regarding learning, perceptions of the degree to which major needs and expectations were met, and attitude changes as a result of instruction. Both approaches focus primarily on group or class learning. Once these global concerns have been addressed, attention can be focused on selective refinement of course segments that are in the greatest need of improvement. The following exhibits are appended: (1) rating scale for use in determining whether or not to include specific items in pre-instruction matrix sampling mini-tests; (2) ministest format; (3) student expectation questionnaire; and (4) student outcome form. Identifiers—*Vermont

The Vermont Basic Competency Program is described, and its assessment results are reported for its second year of implementation. Data were collected on students in Vermont who were born in 1963, who are in the high school class of 1981 (which will be the first class to require mastery of 51 basic competencies for graduation), and who have already achieved mastery in each of the competencies (i.e., reading, 8; writing, 8; speaking, 7; listening, 3; and mathematics, 25). The results are presented and compared for the school years 1977-78 and 1978-79. Bar graphs for both years show the percent of pupils mastering each competency and depict many large gains made between the two assessment periods. The report also includes: (1) a history of the program; (2) types of assistance given the local school districts by the Vermont Department of Education; (3) the 51 competency statements written as behavioral objectives; and (4) the sample Pupil Progress Record Form kept for each student enrolled in a Vermont public school. Descriptors—Analysis of Covariance, *Classification, *Correlation, Criteria, *Discriminant Analysis, Experimental Groups, Mathematical Formulas, *Measurement Techniques, *Multivariate Analysis, Predictive Measurement
Identifiers—*Linear Classification Function, Standard Scores

Linear classification functions (LCFs) arise in a predictive discriminant analysis for the purpose of classifying experimental units into criterion groups. The relative contribution of the response variables to classification accuracy may be based on LCF-variable correlations for each group. It is proved that, if the raw response measures are "standardized," the ordering of the variables can be accomplished by ordering the means of the standardized measures within each group. A computational procedure is presented for obtaining these means as well as for obtaining the LCF-variable within-groups correlations. These correlations may be used for two purposes: (a) to characterize each group with respect to variable scores, and (b) to determine the relative contribution of the variables to separate group classification accuracy. It is proved that the LCF-variable correlations for a group are proportional to standardized variable means for that group. The proof enables a researcher to quite readily accomplish the two interpretation purposes. Two data sets are used to illustrate the interpretation of LCFs. (Author/RL)

Relationships of Elementary and Secondary Achievement Test Scores to Later Academic Success.

Pub Date—Apr 80

Note—16p. Paper presented at the Annual Meeting of the American Educational Research Association (64th, Boston, MA, April 7-11, 1980).

Pub Type—Speeches/Meeting Papers (150)—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Academic Achievement, *Achievement Tests, Basic Skills, *College Freshmen, Correlation, Elementary Secondary Education, *Grade Point Average, Higher Education, *Predictive Validity, *Scores, Sex Differences
Identifiers—*Iowa Tests of Basic Skills, *Iowa Tests of Educational Development

The relationship was investigated between test scores obtained from the Iowa Tests of Basic Skills (ITBS) and the Iowa Tests of Educational Development (ITED), and the grade point average (GPA) at the high school and college level. The data used were unique in providing a longitudinal comparison of college students' performance with the results of their early elementary achievement test performance. Specifically, the predictive validity of the ITBS and the ITED was investigated. Records of 1,997 graduates of Iowa high schools who entered the University of Iowa as freshmen in the fall of 1977 were analyzed. Zero-order correlations were computed between ITBS composite scores (grades 4, 6, and 8) and: (1) four-year high school GPA; (2) high school percentile rank; and (3) first semester freshman college GPA. Similar correlations were computed using ITED composite scores (grades 9-12) in place of ITBS scores. Separate correlations were also computed for males and females. Results supported the contention that proficiency in basic skills at the elementary and high school levels, as measured by ITBS and ITED, does have a significant relationship to high school and college academic success for both males and females. Descriptors—Competency Based Teacher Education, Higher Education, *Models, *National Competency Tests, *Self Evaluation (Individuals), *Standards, Teacher Certification, *Teacher Evaluation, Test Validity

Identifiers—*Distancing Model (Sigel), *National Teacher Examinations

Two approaches to setting standards for the professional performance of teachers are contrasted. One involves a coherent professional belief system in which an internal standard is invoked within a conceptual framework. It is exemplified by Sigel's Distancing Model, and involves a theoretical standard for teacher performance and emphasizes the role of self-assessment in the professional development of teaching knowledge and skill. A teacher observation instrument is developed and designed to provide the teacher's own perception of instruction, curriculum and cognitive/social/affective dimensions of development. The second approach involves the standardized measurement of teacher knowledges and skills deemed essential for entry-level teacher competency. Examples such as the National Teacher Examinations (NTEs) are judged against standards determined by a content review process and a knowledge estimation panel (i.e., a jury approach). Expanded sources of validation for determining baseline teacher competencies are needed to link competence with performance and are discussed in relation to the planned short-term and long-term revision of the NTE Commons. Identifiers—*Adams v Richardson, Alabama, Florida, Georgia, Maryland, North Carolina, Pennsylvania, South Carolina, Tennessee, Texas, Virginia

This study attempted to treat the information gap in baseline data by projecting the total enrollments of six of the original "Adams" states (Georgia, Florida, Maryland, North Carolina, Virginia, and Pennsylvania) and four "non-Adams" states (Tennessee, Texas, South Carolina, and Alabama). The report is divided into six sections. Chapter One, the introduction, establishes the context, objectives, methods employed, significance and limitations of the study. Chapter Two, "Historical Perspectives: Desegregation and Equal Opportunities for Blacks," provides background information regarding desegregation related to blacks generally and the "Adams" litigations particularly. This chapter also contains a summary of the status of desegregation in the "Adams" states. Chapters Three and Four provide a review of literature relating to demographic factors that influence higher education enrollments and determinants of such enrollments. Chapter Five analyzes the findings of two selected states (Georgia and Virginia). Chapter Six outlines conclusions and recommendations for future research. A detailed statement of concepts and methods used in the study is appended. (Author/MK)

This study examined the predictive strength of standardized test scores and selected non-traditional indices of academic success in relation to the academic performance of black students attending historically black colleges. The sample consisted of 364 graduating seniors from eleven historically black colleges. American College Test composite scores (ACT-C) were used as estimates of students' entering ability and were compared to self-reported grade point averages (GPA). Findings indicated that ACT-C scores underpredicted the GPA of black students. Two of seven non-traditional measures were associated with cumulative GPA: highest expected degree and plans after graduation. The results of the study did not lead to any conclusive statements regarding the validity of the ACT-C and non-test variables for predicting the GPA of black students in the selected institutions. This study examines the correlation between standardized college admissions tests and life achievements of students attending historically black colleges. The study sample included 121 people who had graduated from one of eleven historically black colleges in the South in 1971. The students' ACT (American College Testing program) scores were correlated with measures of educational attainment, occupational status, and self-perception of success. Findings showed that despite their low initial scores on standardized tests, study participants were able to achieve considerable educational attainment and career success. Specifically, results indicated that (1) standardized test scores are not valid predictors of the future educational attainment and career success of blacks; (2) undergraduate grade point averages are valid predictors of the future educational success of blacks to the extent that higher grade-point averages may be associated with higher salaries; and (3) the historically black colleges provide an opportunity to obtain a bachelor's degree, and thereby enhance access to further education attainment and career success to students who more than likely would not be admitted to college under traditional admissions criteria. Recommendations for further research, a bibliography, and a copy of the survey questionnaire are included in the report. (Author/BE)

This paper addresses developmental education programs as mechanisms for enhancing the survival rates of disadvantaged populations in higher education. Specifically, the paper identifies and discusses the critical dimensions of effective developmental education programs, including recruitment, admissions, diagnosis and prescription, orientation, special coursework, student financial aid, tutoring, counseling, and evaluation. The recommended guidelines will prove useful to education planners in mapping out the criteria for developing and improving programs designed to assist disadvantaged students not only in adjusting to the college environment, but also in persisting through graduate and postgraduate education. Recommendations for administration, staffing, facilities, and budget planning are included. A selected bibliography is appended. (Author/BE)

tion Distribution, *Population Trends Identifiers—*United States (South)

This report presents tables of data on the population and enrollment in institutions of higher education in ten selected southern states. The provision of population and enrollment projections is aimed at enhancing desegregation planning processes. The population data were obtained from the United States Bureau of the Census and fall into two categories: historical data and population projections. The historical data, which are broken down by race (all persons, black, white and other) and sex, are presented for the years 1950, 1960, and 1970 and include age cohorts ranging from under five through 85 and over. The population projections cover the years 1975 through 2000. Data are presented for blacks in eight age groups (under 5 through 65 and over) and are broken down by sex. Projected enrollment data are presented by type of institution (four year versus two year), race (black and total), sex, attendance status (full time and part time), and control (public versus private). These data are presented in ten year increments from 1950 through 1970 and in five year increments from 1975 through 2000. (Author/MK)

Identifiers—California (Los Angeles), Elementary Secondary Education Act Title I, Hobson v Hansen, Illinois (Chicago), New York (New York)

Research on intra-district inequalities is necessary for determining if changes in state financing formulas have affected inequitable distributions of educational resources within school districts and between classrooms in individual schools. Material inequalities in per pupil expenditures based on race were outlawed by the Hobson vs Hansen court decision. Title I of the Elementary and Secondary Education Act was found to have worsened intra-district inequalities in some school systems either through the withdrawal of local funds from poor schools or through improper use of funds to purchase services for ineligible children. Intra-district inequalities were found by the Office for Civil Rights in New York City, Chicago, and Los Angeles. The inequalities were related to racial, ethnic, and - inferentially - economic factors. Efforts to support litigation for revision of inter-district taxation has led to the omission of emphasis on intra-district inequalities and to the exaggeration of factors beyond district control. A new Federal inquiry into inter-district, intra-district, and within school inequalities may be of pivotal significance in the formulation of future policy and research. Tables of data are included and a bibliography is appended. (Author/MK)

A criterion-based assessment procedure was used to evaluate the success of court-ordered desegregation and educational programs in Detroit, Michigan. A monitoring commission was appointed to effect this assessment. This report begins by describing the commission and assessment procedures. The next portion of the report is devoted to materials which outline the criteria the commission used to assess high schools. The materials are divided into three sections: broad criteria, minimal criteria for the initial assessment, and descriptions of staff action for further assessment of individual schools. This is followed by graphs and tables of data used as examples of high school assessment profiles. Newspaper clippings and court memoranda pertaining to school desegregation are also included. (MK)

Identifiers—Supreme Court

This article discusses inequalities in the distribution of educational resources, with emphasis placed on inequalities within school districts. In the first section, racially-based inequalities within school districts are traced from the post Civil War period to the 1960s. Examples of unequal expenditures for black students given in this section include disparities in the rural South and in Newark, Chicago, and the District of Columbia. The second section is a review of social science research investigating the degree to which educational resource allocations favor upper income children. Studies examining the unequal distribution of adequate school buildings, experienced and well paid staff, and local, State and Federal funds within districts and within individual schools are discussed. The third section traces the changing legal stance on equality of educational resource allocation. Included are discussions of the post Civil War period of mandated equality in some States, the rulings by courts at all levels approving intradistrict inequalities at the turn of the century, the Supreme Court's unrealistic assertion in the 1954 Brown vs. Board of Education decision that inequalities in expenditures were not an issue because inequalities did not exist in the Brown States, and the Supreme Court's declaration of the need for the elimination of intradistrict educational inequalities linked to illegal segregation in the 1977, Milliken decision. A list of court cases cited in the article is appended. (BE)

Identifiers—*Detroit Public Schools MI

This report details plans for future action by the Detroit Public Schools for bilingual education. It begins with an historical overview of national and local bilingual education in the last several years. The next section consists of a statement of goals, both for the program and the students involved. The two following sections address the areas of identification, assessment, and placement of non-English or limited English speaking children in the school system. Six additional sections describe program model options available for implementation in schools, staffing, parent and community involvement, administration and governance of bilingual programs, student and program evaluations, and special education. The final three sections discuss bilingual/multicultural education financing, Federal and State funding, and monitoring of program implementation. A glossary of terms is included. (Author/MK)

In 1975 the City of Detroit Public Schools were ordered by the United States District Court to improve educational services in order to eliminate vestiges of past discrimination. To this end, the school system obtained Emergency School Aid Act and State monies to fund four educational components: reading and communication skills, inservice training

ing, testing, and guidance and counseling. This report presents early findings of evaluations of the four components. Test data from a variety of norm and criterion referenced tests for a cross-section of grade levels indicated gains in reading and communication skills. Survey responses from elementary, middle, and high school staff members indicated improved racial relations among students. Survey responses from middle and secondary school students also indicated that student racial relations had improved. Observations of test administration procedures indicated that improved testing procedures had made a positive impact. Staff and student survey data are appended. (MK)

Identifiers—*Detroit Public Schools MI

The accountability system developed by the Detroit Public Schools is designed to ensure that the letter and the spirit of the educational components of the system's desegregation plan are fully instituted in every school. For each component (bilingual/bicultural education, elementary and middle school reading, career and counseling guidance, vocational education, teacher inservice, community relations, senior high school reading, testing, and the uniform code of student conduct) the responsibilities of each key position are delineated. Acceptable evidence of compliance with court orders is described. The positions responsible for monitoring, correcting, and reporting the level of implementation are designated. Two reporting systems, one guaranteeing accountability by principals and superintendents and one to provide analyses of implementation and impact by component, are described. (Author/MK)

This booklet was written to describe and evaluate the role of magnet schools in desegregation plans. The author presents case studies of two moderately successful magnet schools, the Martin Luther King Middle School in Boston and the Clifton Multi-Age Magnet School in Cincinnati. He then discusses magnet schools in the context of desegregation and illustrates the way in which the courts have been using magnet schools for desegregation purposes. In the third section the author discusses the educational dimension of magnet schools, somewhat apart from their desegregation impact. The author then reviews the roles of State and Federal governments in supporting magnet education. The booklet is concluded with a discussion of the pros and cons of metropolitan magnet schools and recommendations for magnet school programs. (Author/MK)

Descriptors—*Accountability, *Change Strategies, *Delivery Systems, *Educational Change, *Elementary Secondary Education, Parent Role, Student Role, Teacher Role
Identifiers—New York (New York)

The dominant concept of public education at present can be described as a "service delivery" model. The public wants its children educated, delegates

the job to a government agency (the schools), and holds that agency responsible for the delivery of educational services. The problems in public education, however, will not be solved by holding the system accountable. The reason for this is that in any successful educational enterprise, partnership, and not political accountability, must be the dominant relationship. In a partnership approach to education, the student, and not the teacher, is the prime producer of learning, and parents and teachers share in the educational responsibility. The partnership approach would also have the advantage of maximizing resource utilization, increasing accountability of parents and citizen groups, and leaving to the "empowerment" of the client population. From a social and economic standpoint, this is a particularly propitious time for changing to a partnership approach. Current research in the areas of alternative education and integrated human services can provide impetus and guidance for policy makers in order to enable them to reverse the crisis in public education. An examination was made of the effects of the black caucus and the women's caucus on the American Psychological Association (APA). Black psychologists charged the APA with racism and female psychologists charged the organization with sexism. Both groups demanded changes in APA governance structure and policy. The demands of the two groups and responses of the APA to those demands were investigated within the context of a historical review of events. Findings of the examination indicated that the influence of the women's caucus in psychology made a major impact on the APA. The black caucus had less of an impact as a result of its withdrawing from the APA. Both groups sensitized the organization to the issues of racism and sexism within psychology. (Author/MK)

Identifiers—*Florida (Miami)

This report presents findings on the social and demographic factors associated with drug abuse, alcoholism, and major psychological impairment in a population of Cuban American patients presenting at the Spanish Family Guidance Clinic (Miami, Florida) in 1974-75. The analysis indicates a number of factors operating to increase the likelihood of disturbance in the client population. Age is positively associated with subjective distress and negatively associated with drug abuse and impulse control disturbance. Females show higher rates of subjective distress and impulse control disturbance. Married persons show lower rates of impulse control disturbance and drug abuse, but greater subjective distress, than single persons. Persons with a previous history of psychiatric hospitalization show elevated drug abuse, impulse control disturbance, and reality testing disturbance rates, relative to persons without such a history. No social class differences in psychopathology were found. Several

aspects of the relationships between risk related demographic features of this population and patient drug abuse and psychopathology are inconsistent with previous research findings for other populations. This indicates that the family role relationships that influence psychopathology in the general population do not act in the same way among Miami's Cubans. (Author/GC)

Identifiers—Florida (Miami)

Research and clinical practice at the Spanish Family Guidance Clinic (Miami, Florida) has suggested that ecological structural family therapy might be a treatment of choice for Cuban immigrants. Such a treatment approach was found to be consistent with the values of this population and was particularly helpful in addressing special problems arising from the acculturation process. Nevertheless, it was not clear whether both conceptualization and therapeutic intervention needed to be ecological, or whether it was sufficient to conceptualize in ecological terms but to intervene structurally only within the conjoint family context. The present study was conducted to investigate the relative effectiveness of two treatment approaches, labeled "intramural" and "ecological." The subjects were thirty-three Cuban families admitted to the clinic in 1975-76. All of these families had at least one adolescent member and one family member abusing drugs. The families were randomly assigned to different experimental groups and were treated by the clinic's therapists from three to twenty sessions each. The results of the study indicate that both ecological and intramural treatment were highly effective forms of therapy for these families. The number of clients abusing drugs was greatly reduced, and the families improved their functioning in the educational, occupational, peer, judicial, social services, and recreational spheres. Identifiers—Florida (Miami). *Value Orientations Scale

As part of an effort to investigate the cultural characteristics of Cuban Americans and to develop culturally appropriate mental health treatment models for this population, a study of Cuban/Anglo American adolescent value differences was conducted. To study cultural variables, a Value Orientations Scale was developed based on the work of Kluckhohn and Strodtbeck. Four factorially derived subscales were obtained. When Cuban immigrant and Anglo American adolescents were compared, the Cubans tended to prefer lineality, subjugation to

nature, present time, and not to endorse idealized humanistic values. The Americans tended to prefer individuality, mastery over nature, future time, and to endorse idealized humanistic values. The implication of the findings is that a psychosocial treatment model that would be sensitive to the cultural characteristics of Cuban immigrants must validate this population's preference for a lineal style of relationships. Identifiers—*Detroit Public Schools MI. Emergency School Aid Act 1972

In 1979 the United States District Court ordered the Detroit Public Schools to transfer its teachers in such a way that each school in the system would have a faculty comprised of not more than 60% of one race. In order to effect this balance, the district had to involuntarily transfer 472 teachers. This application for Emergency School Aid Act funds introduces the staff desegregation component of the city's desegregation plan, details the concerns of school staff, students, and parents, and presents the activities undertaken to effect desegregation. Interviews and questionnaires were used to determine the existence of problems with respect to involuntary transfers of staff. The concerns articulated by respondents suggested activities that had to be performed to ensure quality in the delivery of educational services to students. Objectives (with completion deadlines) were developed and are presented in chart form with the activities designed to meet each objective and the techniques used to evaluate each activity. (MK)

Identifiers—Florida (Miami)

Four models developed for the treatment of Cuban American adult and adolescent drug and alcohol abusers are discussed in this paper. The study reviewed was aimed at (1) investigating the effectiveness of "Ecological Family Systems Therapy," an approach created by the Spanish Family Guidance Clinic in Miami, Florida, and (2) identifying the relevant variables of treatment intervention contributing to treatment effectiveness. Presented are four case studies of drug and/or alcohol abusers in which four different models were utilized: intramural individual, individual ecological, family intramural, and family ecological. It is suggested, based on preliminary findings, that (1) family ecological models are most effective in attracting, maintaining, and rehabilitating poorly acculturated families; (2) family models are most effective in the treatment of marital dysfunctions and in cases in which the symptomatic behavior is found in a young family member; and (3) individual models are effective in

promoting personal growth and development in the identified patient, but are not very effective in repairing marital dysfunctions. It is also suggested that combined (alcohol, drug, and mental health) treatment centers most effectively address the problems of Cuban immigrants. (Author/GC)

This work contains three papers presented at a conference held in 1976 for the purpose of examining, from a national perspective, the status of health and human services among Hispanic Americans. The first chapter, by A. Anthony Arce, concerns mental health policy in relation to the Hispanic American community. The author delineates some of the factors that account for the underutilization of mental health services by Hispanic Americans, including: an inadequate data base on this population, cultural heterogeneity, institutional policies and practices, manpower needs, inadequate research and evaluation, and insufficient community organization. The second chapter, by David Santisteban, approaches the problem of drug abuse among Hispanic Americans as a symptom of dysfunctional family structure, a problem created by pressures to adapt within the American social context. Recommendations are offered for drug abuse prevention, Hispanic American training, and an integrated strategy that includes legislation, research, training, and treatment. In the third chapter, author Fidelia A. Masi outlines the development of alcoholism treatment services in the work setting as a highly effective model of service delivery which, unfortunately, has rarely been applied to Hispanic Americans. The author recommends that occupational alcoholism programs be established for Hispanic Americans, and that Hispanic American counselors be trained to staff such programs. (Author/GC)

An approach to the treatment of Hispanic (particularly Cuban) American families with drug abusing members is presented in this paper. The approach, developed by the Spanish Family Guidance Center in Miami, Florida, views dysfunctionality and drug abuse as emerging from a family's internal disorganization and ecological imbalance. In order to treat such a family, it is theorized, interactional patterns and structural relationships existing between its members, as well as other systems in the family's operational context, must be considered. The treatment plan described involves restructuring and reorganizing these interactions and relationships into patterns that will enhance the

lives of the individual family members and of the family group as a whole. (Author/GC)

Identifiers—*Florida (Miami)

As part of an effort in Dade County, Florida, to develop bicultural alternatives for secondary education, an Hispanic counseling model was developed to promote adjustment in Hispanic American youths by enhancing their bicultural survival skills. The study reported in this paper researched the premise that, in a bicultural setting, biculturalism leads to adjustment while monoculturalism causes maladjustment. A Bicultural Involvement Questionnaire and a scale relating cultural involvement to behavioral adjustment in the classroom were developed and administered to Hispanic American (Cuban and non Cuban) high school students. Both scales were found to be reliable and valid for Cuban Americans, but less so for non Cuban Hispanic Americans. Bicultural subjects were found to be better adjusted than monocultural subjects. It is recommended on the basis of the study that school counselors confronted with immigrant youngsters living in a bicultural community be able to facilitate an effective bicultural adjustment. This paper discusses individual and interfamily processes affecting Cuban immigrant families with adolescent children. Data utilized include the results of various studies on psychological and behavioral changes related to acculturation. It is held that rate of acculturation is a function of many variables, including age, sex, and length of exposure to the host culture. Clinical variables, such as intergenerational conflict in Cuban families, are also discussed as they affect the acculturation of adolescent children. It is speculated that in families in which adolescent males exhibit an accelerated rate of acculturation, the adolescents may be presenting an acting out psychological profile. (Author/GC)

State education in Great Britain is monolingual. With increases in immigration and the proliferation of bilingual non-state schools, the desire of minority groups to be educated bilingually is growing apparent. The author of this article begins with a discussion of the relative merits of bilingualism by reviewing the research that has endorsed arguments on both sides of the issue. He then reviews bilingual education programs in other countries with an emphasis on the political and attitudinal contexts of different programs. In the final section, the author encourages British schools to set a long-term goal of full bilingual education (students become both bilinguist and bilingual and are taught all subjects in both languages) and establishes six criteria by which changes in the schools can be assessed. This guide was written for use in conjunction with the videotape "Moving On," a studio discussion and documentary film. The film attempts to create an awareness of the adjustment problems experienced by high school students who have frequently moved within or between countries. The guide provides a springboard for thinking about and discussing the problems adolescents face when adjusting to a new environment. After a brief overview of the film, the guide presents a series of discussion topics and questions focussing on fear of change, environmental adjustment, the strains that relocation places on the family, school transition, language differences, racial discrimination, academic assessment problems, and assistance that can be provided to adolescents by teachers, parents, and peers. An annotated bibliography of relevant materials is included in the guide. (MK)

Descriptors—*Administrative Policy. *Change Strategies. *Governance, Grants. *Grantsmanship. *Lobbying. *Public Agencies, Public Policy

In addition to the three traditionally defined branches of Federal and State government (executive, legislative, and judicial) there exists a fourth, powerful branch—administrative or regulatory agencies. To the naive eye, passage of a legislative act will lead to resolution of the problems that initiated the need for the act. However, legislation undergoes a process of further refinement that makes it implementable. This process occurs at the administrative agency level. It is important for educators to develop lobbying organizations to effectively communicate their concerns to administrative agencies and to have an impact on decision making. When educational advocacy groups are familiar with decision making processes within the different branches of government, they know what kinds of strategies to apply when endeavoring to work in policy and grantmaking areas. When trying to effect changes in policy or when applying for grants, advocacy organizations need to present their problems and issues to regulatory agencies in an organized, well documented, and well argued manner. Note—12p.

Pub Type—Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Aesthetic Education. *Affective Behavior. *African Culture. *Blacks. *Cultural Education. Multicultural Education. *School Counseling. *Self Concept

In this paper, observations made by the authors while attending the Second World Festival of Black and African Art and Culture (FESTAC '77) are discussed in terms of their implications for black mental health. The presence and effects of the "Black Aesthetic" are described as they were manifested by the Festival participants. Particularly emphasized is the affective aspect of the Aesthetic, which is defined as having five dimensions: depth of feeling, naturalistic attitudes, style, communicative proclivities, and physical responsiveness to affective stimuli. It is held that the principal role that guidance and counseling must play is to project positive black African cultural images on the psychic screen of black people's minds, so as to effect healthy self concept and identity. Suggestions are offered for presenting positive African cultural images in educational settings in order to contribute to the intellectual and affective developments of black Americans. (GC)

Identifiers—*Kentucky

Recent trends related to the racial desegregation of public housing in Kentucky are described in this report. The following findings are highlighted: (1) In 1979, no Kentucky cities operated totally segregated public housing; (2) the Murray Housing Authority operated the State's most segregated public housing as of July 1979, with Hazard, Owensboro, Mayfield, Madisonville, Lexington, Elizabethtown, Hickman, Louisville, and Pineville following close behind; (3) four cities that were on the "ten most segregated" lists in 1976 (Russellville, Hopkinsville,

Newport, and Henderson) sufficiently reduced their segregation to be removed from the 1979 list; (4) the voluntary adoption of Affirmative Action Tenant Placement Plans has resulted in dramatic progress toward public housing desegregation in several Kentucky cities, most notably Hopkinsville; and (5) in 1979, there were still thirteen public housing sites in Kentucky where all tenants were of one race, though both blacks and whites were readily available for housing. Also included in this report are a model voluntary affirmative action housing program and numerical tables describing segregation levels and the racial breakdown of multi-site public housing authorities. Descriptors—*Cultural Background. Cultural Differences. Cultural Interrelationships. *Ethnicity. Ethnic Relations. *Instructional Materials. *Multicultural Education. Secondary Education

Tracing Individual Ethnic Sources (Project TIES) offers students a chance to explore the area of ethnicity by first examining their own family and cultural heritage and then comparing their history to that of others in the hope of reinforcing the universality of culture, promoting the acceptance of ethnic diversity, and restraining cultural chauvinism. This guide contains an activity and skill-oriented curriculum designed to provide students in grades 10-12 with the tools for carrying out their investigations. The first group of activities ("My Ethnic Heritage") highlights the student's own ethnic and family background. The second group ("Where Do I Fit?") compares the students' experiences to classroom, local, and national patterns. Finally, the curriculum attempts to bridge the gap between the ethnocentrism of studying one's own past and the abstractness of learning about the wider society by focusing on cultural interactions in the third group of activities ("Intergroup Relations"). Descriptors—Eligibility. Family Characteristics. Family Financial Resources. *Family Income. Low Income Groups. *Poverty. Public Policy. Welfare Agencies. *Welfare Recipients. *Welfare Services

Identifiers—*Aid to Families with Dependent Children. Michigan

In an effort to analyze the patterns of income and benefit receipt among Michigan Aid to Families with Dependent Children (AFDC) recipients, this study examined a sample of cases for 21 different types of welfare and non-welfare income sources. The results showed an interaction among the various income sources and showed they can have an effect upon the income status of AFDC recipients. Major findings of the study included (1) the typical AFDC case was a single-parent, female-headed family averaging 3.4 members with an annual income of \$6,012 derived from AFDC payments and a variety of other earned and non-earned sources, (2) most typically, the families received AFDC alone or in combination with Medicaid and/or Food Stamps, (3) alternative definitions of income yielded alternative estimates of the degree of poverty of the recipients, (4) in-kind benefits (such as Medicaid, Food Stamps, and day care) were found to be less efficient means of assistance than cash payments, and (5) there is a dramatic need for consolidation or coordination of existing welfare programs. This report provides a program description and evaluation findings of a bilingual program for gifted and talented children conducted at C.S. 211, an elementary school serving black and Hispanic children in an economically deprived area of the Bronx, New York. The program's goals, which included above grade level reading and mathematics performance in the children's native language and acquisition of the second language, are reviewed. Instructional practices, curriculum and materials development, and staff development designed to accomplish these goals are described. Program activities for the 1978-79 academic year, including classroom and performing arts activities, are reviewed. The Bilingual Gifted and Talented Program is positively evaluated, with particular praise given to the teaching staff of C.S. 211. Based on observations, on comparisons of achievement test data with the District average, and on results from a student questionnaire, it is recommended that funding for the program be continued. Problem areas relating to the program's scope, administration, selection and testing procedures, and staff utilization are also identified and discussed. (GC)

Identifiers—Bilingual Education Act 1968

The results of an evaluation of a Title VII bilingual education program conducted in four Central Harlem (New York City) elementary and junior high schools are presented in this report. The program, which consisted of bilingual (Spanish and English) instruction in language and reading skills, mathematics, science, and social studies, is briefly described. Objectives in the areas of instruction, staff training, materials and curriculum development, and parent and community involvement are outlined, and evaluation findings are discussed separately for each area. Extensive pre and post test student achievement data are presented. Also focused on in the report are administrative procedures and the relationship obtained between project staff members and their administrative assignments. Recommendations are offered in the areas of future evaluation procedures, achievement measures, language usage, individual school decision making, inter-school cooperation, and the participation of a broader range of students. This packet contains the materials necessary for presentation of the tenth of ten modules that comprise a portion of the National Training and Development Service Urban Management Curriculum Development Project. This module focuses on policy/program implementation which is concerned with clarification of goals, task delineation, organizing, planning, scheduling, delegation of responsibilities, and follow-up. This packet consists of a combined instructor's and student/participant's manual providing background information on program implementation and case studies which are the vehicles for introduction and application of implementation concepts. This overview serves as an introduction to a series of ten curriculum modules that comprise a portion of the National Training and Development Service Urban Management Curriculum Development Project. The overview was designed to provide a generalized discussion of the field of government policy/program analysis and evaluation. The training program for municipal managers is based on a conception of public management that combines and expands the traditional approaches of public administration, policy analysis, comprehensive planning, public budgeting, and fiscal/economic analysis into a coordinated process capable of yielding rational public policies and decisions. The overview discusses policy analysis within the context of public administration, presents a systems theory perspective and its effects on policy analysis, and introduces the ten curriculum modules which comprise the program. This student/participant handbook is part of the first of ten modules which comprise a portion of the National Training and Development Service Urban Management Curriculum Development Project. The strategic planning module introduces a decision making process for reducing the uncertainty under which systems operate. Its primary objective is to broaden the base for making public decisions that have long range implications. The student/participant handbook contains two sections: lecture outlines for use during presentation of the course and a supplement to be used for clarification and later reference. (Author/MK)

The Education of Nonmetro Blacks. Rural Development Research Report No. 21.

Economics, Statistics, and Cooperatives Service (DOA), Washington, D.C.

Pub Date—Jul 80

Note—25p.

Pub Type—Reports - Research (143) — Numerical/Quantitative Data (110)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Academic Achievement, *Blacks, *Demography, Economically Disadvantaged,

Educational Improvement, Outcomes of Education, Rural Areas, *Rural Development, Rural Economics, *Rural Education, *Rural Population, Rural Urban Differences, Suburbs, Urban Areas

Nonmetro (rural) blacks continue to lag behind metro (urban and suburban) blacks and whites of all residence categories on rates of graduation from high school and college, functional literacy, preprimary and college enrollment, and adult education. Nonmetro blacks are also less likely to be in the labor force, hold white collar jobs, or have incomes above the poverty level, probably as a result of obtaining less education. Economic development of nonmetro areas, improvement of educational services, career/vocational training programs, and employment training programs are policy directions to be examined to improve the educational status of nonmetro groups. Descriptors—Elementary Education, Males, Native Language Instruction, *Sex Bias, *Sex Role, *Sex Stereotypes, *Social Studies, Spanish, Surveys, *Teacher Attitudes, *Textbook Bias, Textbook Content

Identifiers—*Machismo

This book is the result of a study that investigated the influence of "machismo" (a set of attitudes, beliefs, and behavior that perpetuates the myth of male superiority) in elementary education. The study included (1) a content analysis of textbooks used in Spanish and social studies classes in public and private schools in Puerto Rico and in bilingual programs in the mainland U.S., and (2) a survey of the attitudes and classroom practices of 128 elementary school teachers. The book is divided into five parts. First, the sexist and stereotype content of the basic reading series "Por el mundo del cuento y de la aventura" is reviewed. Second, social studies texts for grades 1-6 are analyzed with respect to their portrayal of sex roles and sex stereotypes at the family, community, and national levels. Third, evidence is presented as to the omission of women in the elementary school history curriculum and a new vision of history, which recognizes the contributions of women, is proposed. Fourth, the results of the survey on teachers' attitudes about, expectations of, and teaching behavior toward boys and girls are discussed. Included in this discussion is information regarding the socioeconomic profile of the teachers surveyed. Finally, strategies are proposed for countering the projection of male superiority in curriculum materials and promoting educational equality for women. Appended to the book are questionnaires and observation instruments used in the study and a bibliography on sex roles and sexism in education. (Author/GC)

Asian-Indians in Search of Equality: Some Mundane Concerns in Complaining About Employment Discrimination in American Academia by Asian Indians.

Old Dominion Univ., Norfolk, Va. Dept. of Political Science.

Pub Date—May 80

Note—17p.; A working paper prepared for the Conference on Asian Indians in North America (Session 4, May 24-26, 1980).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Change Strategies, Court Litigation, Due Process, *Equal Opportunities (Jobs), *Ethnic Discrimination, *Faculty, *Faculty College Relationship, Faculty Integration, Higher Education, *Indians, Interviews, Racial Discrimination Identifiers—Equal Employment Opportunity Commission

An analysis of court cases and Equal Opportunity Employment Commission decisions was undertaken to highlight problems of Asian Indian academics who are involved in filing discrimination complaints. These data were supplemented by informal interviews with faculty members who have filed complaints. The analysis indicates that the academics must carefully consider the consequences of filing formal charges against their institutions. The administrative agencies designed to receive discrimination complaints rarely indicate that they are unable to effectively protect minority group members against repercussions from their universities. Private law suits can be filed against institutions but local courts rarely label their local university as a discriminatory institution and the judicial process is extremely slow. Asian Indian academics can, if they feel they are being discriminated against, seek another position, utilize on-campus political processes, or, as a last resort, seek assistance from outside administrative agencies. A Longitudinal Study on the Academic Development of Selected Participants in a Midwestern Upward Bound Project.

Pub Date—Aug 80

Note—94p.; Ed.S. Thesis, University of Iowa.

Pub Type—Dissertations/Theses - Undetermined (040) — Reports - Research (143)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—*Academic Achievement, Achievement Gains, *Compensatory Education, Developmental Studies Programs, *Educationally Disadvantaged, Educational Practices, Educational Quality, *Program Effectiveness, Program Evaluation, *School Role, Secondary Education, Student Characteristics, Student Improvement Identifiers—Iowa, *Upward Bound

Using a developmental research model, this longitudinal study focused on the academic development throughout secondary education of participants in a Midwestern Upward Bound project. The study attempted to determine whether the participants collectively demonstrated significant gains in achievement as a direct result of involvement in Upward Bound and assessed whether the school input factors (facilities, quality of the educational process, individualized instruction, and expenditures for compensatory education programs) were significant determinants of program success and the academic development of the students. Findings indicated that the Upward Bound program has been successful in meeting its goals and objectives. Most participants made academic gains, persisted in secondary education, and graduated. Many participants aspired to and gained admission to postsecondary institutions. (Author/MK)

UD 020 952

Speaking

Identifiers—*Bilingual Education Act 1968, Elementary Secondary Education Act Title VII, *New York (Bronx)

The South Bronx High School Bilingual Basic Skills Program offered instruction in English as a Second Language, English reading, native language arts, and content areas (in Spanish) to 360 ninth and tenth graders. The primary goal of the program (in its first year of operation) was to mainstream bilingual students with their English speaking peers. Additional program components included curriculum development, staff development, parent and community participation, and supportive services. The program was evaluated using norm and criterion referenced test data, school records, and evaluator observations. Findings indicated that the program was implemented as proposed: (1) ten students were judged to have achieved a level of English competence so they no longer needed special services, (2) ninth and tenth graders made significant gains in English reading, (3) an average of 5 to 6 objectives were mastered per month in English as a Second Language classes, (4) most students passed tests in Spanish language arts and in the content areas, (5) students exhibited gains in math when tested with norm-referenced instruments, but most failed teacher-made tests, and (6) program participants surpassed the school attendance rates. Recommendations for future program implementations are included. (MK)

John Jay High School Bilingual Program ESEA Title VII. Final Evaluation Report, 1978-1979.

New York City Board of Education, Brooklyn, N.Y. Office of Educational Evaluation.

Pub Date—79

Note—30p.; Appendix deleted because of reproducibility problems.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Academic Achievement, *Bilingual Education, Criterion Referenced Tests, *English (Second Language), Non English Speaking, Program Descriptions, *Program Effectiveness, Program Evaluation, Secondary Education, Second Language Instruction

Identifiers—*Bilingual Education Act 1968, Elementary Secondary Education Act Title VII, *New York (Brooklyn)

The John Jay High School Bilingual Program served 206 New York City Spanish, French, and Italian dominant students and 98 English dominant students in grades 9-12. Non English dominant students received instruction in English as a Second Language or remedial English. English dominant students participated in the program through Hispanic Art classes. Emphasis in the bilingual program was placed on mainstreaming students to prepare them for full integration with their English dominant peers. Supportive services, home visits, parental involvement activities, and community relations programs formed additional program components. Criterion referenced tests were used to evaluate the effects of the program on student achievement. Evaluative findings indicated that (1) students mastered an average of 6 instructional objectives per month in the area of English as a Second Language, (2) Hispanic students showed significant gains in Spanish reading achievement, and (3) 40-71% of ninth, tenth, and eleventh graders achieved passing grades in mathematics. Bilingual students had average attendance rates of 76-92%. (MK)

Perspectives on Ethnicity in New Orleans.

Committee on Ethnicity in New Orleans, La.

Pub Date—79

Note—63p.; Photographs may not reproduce clearly. Sponsored by the Louisiana Committee for the Humanities.

Pub Type—Collected Works - General (020)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Asian Americans, Blacks, Cubans, *Cultural Influences, *Cultural Pluralism, *Ethnic Groups, *Ethnicity, Filipino Americans, Language Patterns, Spanish Americans, Vietnamese People

Identifiers—Greek Americans, *Louisiana (New Orleans)

This pamphlet contains several essays on the culture and ethnic groups of New Orleans, Louisiana. Included are: (1) a discussion by Joseph Logsdon on

the uniqueness of New Orleans culture, marked by its cuisine, interethnic mixtures, and its politics; (2) an article on theories of ethnicity and neo ethnicity, by Joseph V. Guillotte, III; (3) a paper by Ethelyn Orso that explores the concept of nativism, using data from a study of the revitalization of the New Orleans Greek community; (4) a description of the life of Greek Merchant Marine sailors in New Orleans, and suggestions as to how the established Greek community can help the newcomers, by Andrew Horton; (5) an account of a Filipino family that has lived in Louisiana for seven generations, by Marina E. Espina; (6) a report by Martha C. Ward and Zachary Gussow on recent Vietnamese immigrants to New Orleans; (7) a discussion of linguistic similarities and differences between Cubans and Canary Islanders ("Islenos") in the New Orleans area, by Beatriz Varela; (8) a description of the Afro American celebration of St. Joseph's Day in Central City, by Andrew J. Kaslow; and (9) an article by Margery Freeman describing the Ethnic Heritage Studies Project sponsored by St. Mark's Community Center in New Orleans' predominantly black Seventh Ward. (GC)

Teaching Strategies for Integrating the Secondary Classroom.

Sequoia Union High School District, Redwood City, Calif.
Pub Date—[80]

Note—22p. Prepared by the Department of Human Relations. Photographs may not reproduce clearly.

Pub Type—Reports - General (140)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Classroom Techniques, *Desegregation Effects, *Desegregation Methods, High Schools, *Multicultural Education, School Resegregation, Student Teacher Relationship, Teacher Characteristics, *Teacher Role, Teaching Methods

Identifiers—California (Redwood City)

Nearly 500 teachers in the Sequoia Union High School District (Redwood City, California) were surveyed in order to explore: (1) strategies they used to bring about integration in secondary schools; (2) techniques that discourage resegregation in desegregated high schools; (3) ways that the district's teachers draw out the best in students new to a multicultural setting. Some highlights of the survey are presented in this booklet. Examples are given of those teachers who have found particularly innovative and effective ways to encourage classroom integration and multicultural education. (GC)

Identifiers—New York (New York)

The main objective of this study was to review the literature and synthesize data on the mental health of Puerto Rican children in the New York City area to show that they are at higher risk of developing mental health problems than other children. Chapter 1 of this monograph reviews the development of the concept of stress and its linkage with physical and psychological disorders. A demographic profile of Puerto Ricans in the United States is presented in Chapter 2 to demonstrate the socioeconomic characteristics that make this population more susceptible to disproportionate degrees of stress. The relationship of central nervous system dysfunction, stress, and environmental factors is discussed in Chapter 3, showing that Puerto Rican children are at greater risk for central nervous system impairments. Chapter 4 presents a summary of research

comparing the mental health of New York Puerto Ricans to other groups. A mental health profile of Puerto Rican children is developed in this chapter. Conclusions of the study are presented in Chapter 5. The data indicates that Puerto Rican children are, in fact, subjected to extensive socioenvironmental stress and are, therefore, at high risk of having mental health disorders. Research and policy implications are discussed. (MK)

Descriptors—*Bilingual Education, Compliance (Legal), Demonstration Programs, Elementary Secondary Education, *Federal Legislation, Financial Support, Multicultural Education, Non English Speaking, *Political Issues, *Program Evaluation, Social Influences

Identifiers—Bilingual Education Act 1968, *Lau v Nichols

Focusing on the time period since the 1974 Supreme Court Lau v. Nichols decision, this paper reviews Federal policy regarding bilingual education, discusses the current sociopolitical context of bilingual education, discusses evaluations of bilingual programming done to date, and examines the implications of these factors for schools and classrooms at the local level. Some of the features that distinguish present bilingual education policy from policies adopted in regard to earlier immigrant populations are outlined. Political problems faced by bilingual education since "Lau" are identified as (1) loss of local autonomy, (2) conflict between the legislative and executive branches of government (3) inconsistencies in the guidelines for legal compliance between 1970 and 1974, (4) funding, and (5) reliance on Title VII funds, which perpetuates a deficit (rather than a cultural difference) model of bilingual education. Several recent evaluation studies of bilingual education programs are reviewed and critical issues common to these evaluations are discussed in terms of their implications for future programs. Finally, a composite model for an exemplary bilingual program is described, based upon what has been learned from previous evaluations. (Author/GC)

Descriptors—*Adolescents, *Child Advocacy, *Delinquency, Minority Group Children, *Pregnant Students, Resource Materials, *Youth Problems

Identifiers—*Youth Tutoring Sheets

This document contains fact sheets on four contemporary issues related to young people: (1) teenage pregnancy, (2) juvenile delinquency, (3) youth tutoring of youth, and (4) youth advocacy. The sheet on teenage pregnancy presents statistics on the teenage birth rate, discusses financial and educational problems faced by teenage parents, and describes three programs (in Atlanta, Albuquerque, and New York) that address these problems. Also listed are sources for information on teenage preg-

nancy. The fact sheet on juvenile delinquency focuses on educational and social service for delinquent youth and describes four programs that provide such services. The sheet on Youth Tutoring Youth (YTY) programs discusses the effectiveness of different types of YTY programs and the adaptation of YTY programs to varied school populations (non English speaking and special education students). A list of resources is also provided. Finally, the fact sheet on youth advocacy describes nine national organizations that provide information and services to individuals concerned with the problems of urban and minority youth. (GC)

Descriptors—*Child Development, *Children, Elementary Secondary Education, *Environmental Influences, *Family Role, *Neighborhoods, School Community Relationship, School Role, Socialization, Urban Areas, *Urban Environment, Urban Schools

Identifiers—*Bronfenbrenner (Urie)

This paper focuses on the distinctive characteristics of urban environments, the ways these environmental features affect city children, and the roles that schools can play in modifying these effects. Bronfenbrenner's multilevel framework for studying the ecology of human development is described. Recognizing the central role that families play in the lives of children, neighborhoods are examined as important environments for both families and their children. Unique characteristics of urban environments and the special ways in which their multiple levels and interacting systems pose risks and opportunities for child development are then discussed. New York, NY 10027 Data from a study on people's perceptions of "high risk" versus "low risk" urban neighborhoods are reviewed, showing that despite demographic similarities, the high and low risk neighborhoods varied significantly in terms of social stresses and supports, adequacy of child care, and residents' attitudes toward the neighborhood. Finally, the school is hailed as an institution that, with proper moral, political, and economic resources can protect environmentally-at-risk children, increase their opportunities, compensate for weaknesses in families and neighborhoods, and influence public policy related to children. Descriptors—*Acculturation, *Asian Americans, *Ethnic Stereotypes, Literature Reviews, Minority Groups, Occupational Mobility, Social Science Research, *Socioeconomic Status, *Success

There is a widely shared belief that Asian Americans have overcome the bondage of racial discrimi-

nation to become a successful model minority. In this essay, the empirical basis of this success contention is examined against its historical background and the ramifications of the belief are explored. First, the ascendancy of the Asian American success theme in the late 1960s is traced. The portrayal of Asian Americans as a hardworking, successful group is contrasted to popular racist beliefs held about blacks. Second, recent research on Asian Americans is examined. It is argued that available evidence does not warrant the image of this group's success because typical indicators of success, such as education and income, have not been properly adjusted for extraneous factors. Finally, several consequences of the success myth are identified. It is held that: (1) Asian Americans, particularly the young people, resent the success contention as a device of political exploitation; (2) a pattern of occupational segregation for Asian Americans limits occupational aspiration and choices of Asian American youth; and (3) Asian Americans experience a sense of lost identity and attribute this feeling to the pressures of assimilation and to their ancestors' concern for survival. (Author/GC)

Subject Index

This index lists titles of documents under the major subject terms that have been assigned to characterize their contents. The subjects, which conform to those presented in the *Thesaurus of ERIC Descriptors*, are in alphabetical order.

As shown in the example below, the accession number is displayed below and to the right of the document title. Additional information about the document can be found under that number in the resume section.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

Author Index

This index lists documents under the name(s) of their author(s). The index is arranged in alphabetical order by the person's last name.

As shown in the example below, the accession number is displayed below and to the right of the title. Additional information about the document can be found under that number in the resume section.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

Author ——— **Norberg, Kenneth D.**

Title ——— **Iconic Signs and Symbols in Audiovisual Communication, An Analytical Survey of Selected Writing and Research Findings, Final Report.**

ED 013 371 ——— **Accession Number**

Institution Index

This index lists the titles of documents under the institution responsible for them and/or the agency sponsoring them. The index is arranged in alphabetical sequence by the name of the university, agency, association, etc. Names beginning with the word "University" have generally been inverted in order to provide a more distinctive entry, e.g. Wisconsin University (for the University of Wisconsin).

As shown in the example below, the accession number is displayed below and to the right of the title. Additional information about the document can be found under that number in the resume section.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

Institution ————— **Sacramento State College, Calif.**

Title ————— **Iconic Signs and Symbols in Audiovisual Communication, An Analytical Survey of Selected Writings and Research Findings, Final Report.**

ED 013 371 ————— **Accession Number**

Publication Type Index

This index lists documents under the Publication Type that has been assigned to them to characterize their form or organization, as contrasted to their subject matter.

As shown in the example below, the accession number is displayed below and to the right of the document title. Additional information about the document can be found under that number in the resume section. The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

The Publication Types are displayed in a classified index arrangement, according to the outline below.

Category Code	Category Name
(040)	Dissertations/Theses
Title	Accession Number
Iconic Signs and Symbols in Audiovisual Communication, an Analytical Survey of Selected Writings and Research Findings.	ED 013 371

Home Task Book for Parents and Kids.

ED 192 990

Clearinghouse Number/ED Number Cross-Reference Index

This index cross-references the temporary ERIC Clearinghouse accession number to the permanent ERIC Document (ED) accession numbers by which resumes are arranged in *Resources in Education* (RIE). Readers who have only Clearinghouse numbers for a given document may use this index to trace the item to its ED number and hence to its location in RIE.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

The following Clearinghouse prefixes are used in this index:

AA —ERIC Processing and Reference Facility	JC —Junior Colleges
CE —Adult, Career, and Vocational Education	PS —Elementary and Early Childhood Education
CG —Counseling and Personnel Services	RC —Rural Education and Small Schools
CS —Reading and Communication Skills	SE —Science, Mathematics, and Environmental Education
EA —Educational Management	SO —Social Studies/Social Science Education
EC —Handicapped and Gifted Children	SP —Teacher Education
FL —Languages and Linguistics	TM —Tests, Measurement, and Evaluation
HE —Higher Education	UD —Urban Education
IR —Information Resources

NEW THESAURUS TERMS

ERIC has recently issued a completely revised *Thesaurus of ERIC Descriptors*, upon which ERIC's subject indexing is now based.

Nearly 500 new terms not previously listed in this "New Thesaurus Terms" section are included in the revised *Thesaurus*. Additionally, over 1,000 terms listed in earlier editions have been deleted. Postings of most of the deleted terms have been transferred to other terms. These deleted terms are, therefore, carried as UFs in the revised *Thesaurus*. Also, approximately 1,400 new or modified Scope Notes to older terms have been added.

An annotated list of the new terms and other changes to the revised *Thesaurus* would fill many pages, and cannot be included here. They can be consulted in the front matter and various displays of the revised *Thesaurus*.

ORDERING INFORMATION FOR THE ERIC THESAURUS

Title: *Thesaurus of ERIC Descriptors*
(Completely Revised 1980)

Order from: Oryx Press
2214 North Central Avenue at Encanto
Phoenix, Arizona 85004

Price: \$13.20 (U.S.)
\$14.40 (Foreign)

The completely revised 1980 *Thesaurus* reflects all changes and additions through Spring 1980. All new terms and other changes to the *Thesaurus* subsequent to the 1980 edition will continue to be listed in this "New Thesaurus Terms" section.

NEW THESAURUS TERMS

409

The following terms have been added to the ERIC System's Controlled Vocabulary since June 1980 and are not included in the eighth edition of the *Thesaurus of ERIC Descriptors* (Completely Revised 1980).

Absence (Students)

USE ATTENDANCE

Absence (Teachers)

USE TEACHER ATTENDANCE

ACCELERATION

SN (Scope Note Changed) The process of progressing through an educational program at a rate faster than that of the average student [note: for the time rate of change of velocity, use the Identifier "Acceleration (Physics)"] *Jul. 1966*

ACCESSIBILITY (FOR DISABLED)

SN (Scope Note Changed) Characteristics of facilities, programs, and services that allow them to be entered or used by individuals despite visual, hearing, mobility, or other impairments [note: for physical access, coordinate with "Physical Mobility" or "Visually Handicapped Mobility"—prior to Jun80, see also "Architectural Barriers"] *Mar. 1980*

Admission Tests (Higher Education)

USE COLLEGE ENTRANCE EXAMINATIONS

Admission Tests (Occupational)

USE OCCUPATIONAL TESTS

ADULT LITERACY

(Reinstated June 1980) *Jun. 1970*

Advocates (Law)

USE LAWYERS

AGING (INDIVIDUALS)

SN The physiological and psychological process of growing old *Jul. 1980*

AIR TRANSPORTATION

Oct. 1980

ALLIED HEALTH PERSONNEL

SN (Scope Note Added) [note: prior to Jun80, see also "Clinic Personnel (School)"] *Mar. 1980*

AMERICAN INDIANS

SN (Scope Note Added) Both North and South American Indians *Jul. 1966*

AMERICAN INDIAN STUDIES

SN (Scope Note Changed) Curriculum or subject area encompassing the culture, history, achievements, and contemporary concerns of American Indians *Oct. 1979*

American Literature (1966 1980) (Latin America)

USE LATIN AMERICAN LITERATURE

American Literature (1966 1980) (United States)

USE UNITED STATES LITERATURE

Ancillary Services (1967 1980)

SN Invalid Descriptor—see more precise Descriptors such as "Ancillary School Services," "Community Services," "Social Services," etc. *Jun. 1980*

Animal Biology

USE ZOOLOGY

ANIMALS

SN (note: use a more specific term if possible—prior to Aug80, the instruction "Animal Life, use Zoology" was carried in the Thesaurus) *Aug. 1980*
UF Animal Life

Animal Science (1967 1980)

USE ANIMAL HUSBANDRY

Architectural Barriers (1970 1980)

SN Invalid Descriptor—coordinate other architecture/facility terms with "Physical Mobility" or "Visually Handicapped Mobility"—also use "Accessibility (for Disabled)" if appropriate *Jun. 1980*

ASSISTANTSHIPS

SN Financial aid in which college students, usually at the graduate level, are awarded assistant staff positions carrying stipends and, frequently, exemptions from fees *Oct. 1980*

Assistant Superintendent Role (1966 1980)

SN Invalid Descriptor—use "Superintendents" (note: occasionally used indiscriminately in the past for "Assistant Principal Role"—see "Assistant Principals" for that concept) *Jun. 1980*

Assistant Superintendents

USE SUPERINTENDENTS

Barrier Free Environment (for Disabled)

USE ACCESSIBILITY (FOR DISABLED)

BIAS

SN (Scope Note Changed) An inclination, or a lack of balance (note: use a more specific term if possible) *Dec. 1969*

Career Maturity

USE VOCATIONAL MATURITY

CATALOGS

(Reinstated June 1980) *Jul. 1966*
SN (note: use a more specific term if possible—see also "Reference Materials" hierarchy for more precise terminology)

Child Centered Curriculum

USE STUDENT CENTERED CURRICULUM

Clinic Personnel (School) (1966 1980)

SN Invalid Descriptor—see preferred Descriptors "Allied Health Personnel" and "School Health Services" (note: postings will be transferred to the preferred terms in a forthcoming computer tape update) *Jun. 1980*

COLLEGE SECOND LANGUAGE PROGRAMS

SN (Scope Note Added) (note: prior to Mar80, this concept was indexed under "College Language Programs") *Mar. 1980*

COMMUNICATION RESEARCH

SN Investigation into the nature and function of human communication, both verbal and nonverbal, in one-to-one or group settings (note: do not confuse with "Language Research") *Sep. 1980*

Compulsory Attendance

USE COMPULSORY EDUCATION

Congresswomen

USE LEGISLATORS

Continuation Education (1968 1980)

SN Invalid Descriptor—scoped to refer to instruction for potential learners who have rejected conventional schooling, but used indiscriminately for "Continuing Education"—see "Continuation Students" *Jun. 1980*

CONTINUATION STUDENTS

SN (Scope Note Changed) Students enrolled in special continuation education programs—continuation education enables youth and adults who have previously dropped out of or otherwise rejected conventional schooling to complete their formal education (note: prior to Jun80, "Continuation Education" was also used to index this concept) *Jul. 1966*

CONTROVERSIAL ISSUES (COURSE CONTENT)

SN Matters of public concern and controversy that are taught, often through discussion, in social studies, current events, science, and other classes (note: for the issues themselves, as opposed to teaching about them, use more precise terms) *Oct. 1980*

Counting

USE COMPUTATION

Course Withdrawal

USE WITHDRAWAL (EDUCATION)

COURT JUDGES

SN Public officials authorized to hear and decide cases in courts of law *Aug. 1980*
UF Magistrates

COURT REPORTERS

(Reinstated June 1980) *Jul. 1966*
SN Workers involved in the recording (by stenotype) and transcription of legal proceedings

CRITICAL PATH METHOD

SN (Scope Note Changed) Technique used to coordinate and schedule the sequential activities of a project to complete it as efficiently and quickly as possible (note: see also the Identifier "Program Evaluation and Review Technique"—prior to Mar80, the instruction "Path Analysis, use Critical Path Method" was carried in the Thesaurus) *Jul. 1966*

DAY CARE CENTERS

SN (Scope Note Changed) Professionally run facilities that care for groups of children on a partial or full day basis (note: prior to Mar80, the instruction "Day Care Centers, use Day Care Services" was carried in the Thesaurus) *Mar. 1980*

Debate Judges

USE JUDGES

DEINSTITUTIONALIZATION (OF DISABLED)

SN Processes and services that enable disabled persons to live outside of the confines of asylums, nursing homes, and other residential institutions *Aug. 1980*

DESIGN REQUIREMENTS

SN (Scope Note Changed) Specifications that must be met for the designs of facilities or objects in order to satisfy the physical or psychological needs of users *Mar. 1980*

DIFFUSION

SN (Scope Note Changed) Process by which an idea gets from its source or origin to its place of ultimate use [note: prior to Mar80, the use of this term was not restricted by a Scope Note—for the diffusion of humans, use "Population Distribution"—for chemical, molecular, etc. diffusion, use the Identifier "Diffusion (Natural Sciences)"] *Jul. 1966*

Drill Press Operators

USE MACHINE TOOL OPERATORS

EDUCATIONAL FACILITIES PLANNING

SN (Scope Note Changed) Planning the facilities and grounds of educational institutions (note: prior to Mar80, this concept was indexed under "School Planning") *Mar. 1980*

Educational Departments (School)

USE SCHOOLS OF EDUCATION

EDUCATIONAL MALPRACTICE

SN Wrongful or negligent acts on the part of teachers or schools that result (or may result) in student detriments, especially including the failure of students to learn *Oct. 1980*
UF Academic Malpractice

Educational Quality Assessment

USE EDUCATIONAL ASSESSMENT; EDUCATIONAL QUALITY

Energy Education (Conservation)

USE CONSERVATION EDUCATION; ENERGY CONSERVATION

Enunciation Improvement (1966 1980)

USE ARTICULATION (SPEECH); SPEECH IMPROVEMENT

EPISTEMOLOGY

SN The study of how knowledge is acquired
 UF Cognitive Theory *Oct. 1980*

ETHNIC DISCRIMINATION

SN (Scope Note Added) Restriction or denial of rights, privileges, and choice because of ethnic origins (note: do not confuse with "Ethnic Bias") *Mar. 1980*

EXPERIMENTAL SCHOOLS

SN (Scope Note Added) Schools in which new teaching methods, new organizations of subject matter, personnel practices, and advanced educational theories and hypotheses are tested *Jul. 1966*

FACULTY MOBILITY

SN (Scope Note Added) (note: if possible, use the more precise term "Teacher Transfer") *Jul. 1966*

FINANCIAL AID APPLICANTS

SN (Scope Note Changed) Individuals requesting financial support *Mar. 1980*

Financial Management

USE MONEY MANAGEMENT

Fles Guides (1967 1980)

SN Invalid Descriptor—coordinate preferred Descriptors "Curriculum Guides" and "Fles" (note: postings will be transferred to the preferred terms in a forthcoming computer tape update) *Jun. 1980*

Flexible Schedules (1967 1980)

SN Invalid Descriptor—used inconsistently in indexing for both school and job schedules—see "Flexible Scheduling" and "Flexible Working Hours" respectively for those concepts *Jun. 1980*

FREE EDUCATION

SN Education that does not require the payment of tuition (note: do not confuse with "Free Schools") *Oct. 1980*

FREE SCHOOLS

SN (Scope Note Changed) Alternative schools offering a completely voluntaristic framework, including an unstructured curriculum and a spontaneous learning environment—students are free to select what to learn, with whom, when, and how—grades, competition, and comparisons between individuals are discarded (note: do not confuse with "Free Education" or "Freedom Schools") *Mar. 1980*

Freshmen (1967 1980) (First Year College Students)

USE COLLEGE FRESHMEN

Freshmen (1967 1980) (Grade 9)

USE HIGH SCHOOL FRESHMEN

FTE

USE FULL TIME EQUIVALENCY

Geographic Mobility (Del Jun80)

USE MIGRATION

GERIATRICS

SN (Scope Note Changed) Branch of medicine dealing with the physiology and pathology of old age *Aug. 1968*

Grant Proposals

USE GRANTS; PROGRAM PROPOSALS

GREEK AMERICANS

Oct. 1980

GROUP HOMES

SN Nonconfining residential facilities providing professional supervision in a group living arrangement for either adults or juveniles, usually those who are unable to function independently—intended to reproduce as closely as possible the circumstances of family life, and at minimum providing access to community activities and resources (note: do not confuse with "Personal Care Homes") *Aug. 1980*

HAITIANS

SN Peoples of Haiti or Haitian descent *Oct. 1980*

Halfway Houses

USE GROUP HOMES; REHABILITATION CENTERS

HANDICRAFTS

SN (Scope Note Added) Creative activities of making articles by hand, often with the aid of simple tools or machines—also, the handiworks resulting from such activities *Jul. 1966*

HIGH INTEREST LOW VOCABULARY BOOKS

SN (Scope Note Added) Books designed to interest learners whose reading abilities are below age or grade level *Jul. 1966*

HOSPITAL SCHOOLS

SN (Scope Note Changed) Schools in hospitals for formal instruction of hospitalized children (note: do not confuse with "Teaching Hospitals" or "Patient Education"—prior to Oct79, this term was not scoped) *Jul. 1966*

Illiterate Adults (1966 1980)

USE ADULT LITERACY; ILLITERACY

INDIVIDUALIZED EDUCATION PROGRAMS

SN Educational programs for handicapped children, each geared to the needs of an individual child and conducted in accordance with a written plan agreed on between school officials and the child's parents—required by Federal law (i.e., the "Education for All Handicapped Children Act") to provide all school-age handicapped children with a free and appropriate education *Oct. 1980*

Inequalities (1970 1980)

SN Invalid Descriptor—used inconsistently in indexing—for mathematical inequalities, use "Inequality (Mathematics)"—for educational inequalities, use "Equal Education"—for social and economic inequalities, see "Disadvantaged" or Descriptors relating to social, race, sex, or ethnic bias or discrimination *Jun. 1980*

INEQUALITY (MATHEMATICS)

SN (Scope Note Changed) Mathematical expression or proposition concerning the difference in size between two quantities [note: for educational or socio-economic inequality, refer to Scope Note of "Inequalities (1970 1980)"] *Mar. 1980*

Information and Referral Services

USE INFORMATION SERVICES; REFERRAL

Interest Centers (Classroom)

USE LEARNING CENTERS (CLASSROOM)

INTERLANGUAGE

SN A learner's systematic, internally structured, and autonomous version of a target language—this system evolves, is governed by rules, and defines the developing linguistic competence of the learner *Jul. 1980*
 UF Approximative Systems (Language Learning)

Job Conditions

USE WORK ENVIRONMENT

Job Restructuring

USE JOB DEVELOPMENT

JUDGES

SN (Scope Note Changed) Persons selected or appointed to decide in competitions or contests (note: if possible, use the more specific term "Court Judges") *Mar. 1980*

LABORATORY ANIMALS

Aug. 1980

Laboratory Techniques (1967 1980)

SN Invalid Descriptor—used inconsistently in indexing—use "Laboratory Training" for human relations laboratory techniques—otherwise, use "Laboratory Procedures" *Jun. 1980*

LANGUAGE ACQUISITION

SN (Scope Note Changed) Development in the individual of his/her native language (note: do not use for "Second Language Learning"—prior to Mar80, the Thesaurus carried the instruction "Language Acquisition, use Language Development"—"Language Development" did not carry a Scope Note) *Mar. 1980*

Language Aids (1966 1980)

SN Invalid Descriptor—used for both "Native Language Instruction" and "Second Language Instruction"—see those Descriptors as well as "Educational Media" *Jun. 1980*

Language Guides (1966 1980)

SN Invalid Descriptor—used for both "Native Language Instruction" and "Second Language Instruction"—see those Descriptors as well as "Curriculum Guides," "Dictionaries," etc. *Jun. 1980*

LANGUAGE RESEARCH

SN (Scope Note Added) Research in linguistics (note: do not confuse with "Communication Research") *Jul. 1966*

LATE REGISTRATION

SN Enrolling after the school semester, quarter, etc. has begun (note: for the age of students when they enter school, see "School Entrance Age") *Aug. 1980*

Late School Entrance (Del Jun80)

USE LATE REGISTRATION

Learning Stations (Classroom)

USE LEARNING CENTERS (CLASSROOM)

LEAST SQUARES STATISTICS

SN Statistics that are designed to provide estimates that minimize the probability of large errors by minimizing the sum of squared errors (the "least squares method" fits a curve to a given set of data such that the sum of the squares of the distances from each point of the data to the fitted curve is a minimum) *Oct. 1980*

Library Orientation

USE LIBRARY INSTRUCTION

Life Span Education

USE LIFELONG LEARNING

LINKING AGENTS

SN Individuals or groups who attempt change by connecting knowledge and related resources to practitioners—the linker's role often includes providing necessary support for adoption/adaptation of new ideas or developments *Oct. 1980*

LITERACY

SN (Scope Note Added) Ability to read and write—also, communication with written or printed symbols (i.e., reading and writing) *Jul. 1966*

Literature Surveys

USE LITERATURE REVIEWS

Local Education Authorities

USE SCHOOL DISTRICTS

LONELINESS

SN Unhappiness caused by a lack of friends or companions *Aug. 1980*

Machinery Maintenance Workers

USE MACHINE REPAIRERS

MALPRACTICE

SN Wrongful or negligent treatment of clients by professional personnel that results (or may result) in damage, injury, or loss (note: coordinate with such Descriptors as "Medical Services," "Psychological Services," etc. as appropriate, or use the more specific Descriptor "Educational Malpractice"—for malpractice of lawyers, court judges, etc., use the Identifier "Legal Malpractice") *Oct. 1980*

Managers

USE ADMINISTRATORS

Maximum Likelihood Factor Analysis

USE FACTOR ANALYSIS; MAXIMUM LIKELIHOOD STATISTICS

MAXIMUM LIKELIHOOD STATISTICS

SN Statistics that are designed to provide estimates that maximize the probability of zero, or negligible, error (that is, estimates most likely to be correct) *Oct. 1980*

MEDICAL RECORD ADMINISTRATORS

Mar. 1980

SN (Scope Note Changed) Individuals who plan, develop, and administer medical record systems for hospitals, clinics, health centers, etc. (note: for librarians in medical libraries, coordinate "Librarians" and "Medical Libraries"—for librarians who are directly involved in patient care, use the Identifier "Clinical Medical Librarians")

Medical Record Librarians (1969 1980)

USE MEDICAL RECORD ADMINISTRATORS

METACOGNITION

SN Knowledge or beliefs about factors affecting one's own cognitive activities—also, reflection on or monitoring of one's own cognitive processes, such as memory or comprehension *Oct. 1980*
 UF Meta Knowledge
 Metamemory

MIGRATION *Jul. 1966*
SN (Scope Note Changed) Demographic movements of individuals or groups

MINICOURSES *Mar. 1980*
SN (Scope Note Changed) Courses at any educational level that are of relatively short duration (e.g., shorter than a school's regular academic term or session) and intended to achieve certain limited objectives

MONOLOGS *Oct. 1980*
UF Interior Monologues
Soliloquies

Monologues (Del Jun80)
USE MONOLOGS

Multiple Discriminant Analysis
USE DISCRIMINANT ANALYSIS

NONGRADED INSTRUCTIONAL GROUPING *Mar. 1980*
SN (Scope Note Changed) Grouping students according to such characteristics as academic achievement, mental and physical ability, or emotional development rather than by age or grade level (note: some of the former "nongraded/ungraded" Descriptors merged with this term were occasionally used to index "Nongraded Student Evaluation")

NONGRADED STUDENT EVALUATION *Mar. 1980*
SN (Scope Note Changed) Evaluation of student progress or achievement without the use of letter grades or other summary ratings—provides feedback about a student's specific strengths and weaknesses rather than summarizing his/her overall performance (note: some of the former "nongraded/ungraded" Descriptors merged with "Nongraded Instructional Grouping" were occasionally used to index this concept)

Nonresident Students (1967 1980) (Foreign)
USE FOREIGN STUDENTS

Nonresident Students (1967 1980) (Out of District)
USE RESIDENCE REQUIREMENTS

Nonresident Students (1967 1980) (Out of State)
USE OUT OF STATE STUDENTS

NOTIONAL FUNCTIONAL SYLLABI *Oct. 1980*
SN Foreign language course curricula based upon the learner's communicative needs and organized according to the content of what is to be communicated rather than the grammatical form of the language or specific situational requirements
UF Functional Notional Syllabi

NUCLEAR ENERGY *Oct. 1980*
SN Power derived from the fission (splitting) of the nuclei of heavy elements such as uranium, or the fusion of light elements such as the hydrogen isotopes deuterium and tritium
UF Atomic Energy

OBESITY *Oct. 1980*
SN Body condition characterized by a disfiguring excess of weight or fat
UF Overweight (Excessive Body Fat)

OBJECT PERMANENCE *Oct. 1980*
SN The knowledge that objects continue to exist even when one is not perceiving them
UF Object Concept

Occupational Adjustment
USE VOCATIONAL ADJUSTMENT

OCCUPATIONAL TESTS *Jul. 1966*
SN (Scope Note Changed) Tests designed to predict job performance by recording specific abilities and interests that correspond with those of persons successfully engaging in the particular field of work (note: for occupational interest inventories, use "Interest Inventories")

ORAL READING *Jul. 1966*
SN (Scope Note Added) The act of reading aloud, often used to develop or test reading skills (note: use "Reading Aloud to Others" when the purpose of oral reading is to inform or entertain a listener or group of listeners)

Painting (1966 1980) (Artistic)
USE PAINTING (VISUAL ARTS)

Painting (1966 1980) (Industrial)
USE PAINTING (INDUSTRIAL ARTS)

PERCEPTION *Jul. 1966*
SN (Scope Note Changed) The process of becoming aware of objects, qualities, or relations via the sense organs—involves the reception, processing, and interpretation of sensory impressions (note: use a more specific term if possible—do not confuse with "Attitudes" or "Opinions")

Performance Criteria (1968 1980) *Jun. 1980*
SN Invalid Descriptor—used inconsistently in indexing—see "Evaluation Criteria" and "Specifications"

Performance Specifications (1969 1980) *Jun. 1980*
SN Invalid Descriptor—used inconsistently in indexing—see such Descriptors as "Equipment Standards," "Facility Requirements," and "Performance Factors"

PHARMACOLOGY *Sep. 1980*
SI The science of the nature and properties of drugs, particularly their actions or effects (note: see also "Pharmacy")

PHONICS *Jul. 1966*
SN (Scope Note Added) The study of sound-letter relationships in reading and spelling, and the use of this knowledge in recognizing and pronouncing words

PHYSICAL MOBILITY *Mar. 1980*
SN (Scope Note Changed) Individual's ability to move within his/her immediate environment (note: for demographic or geographic mobility, use "Migration"—prior to Mar80, "Architectural Barriers" was frequently used to index this concept)

PICTURE BOOKS *Sep. 1980*
SN Books (usually but not necessarily for children) in which illustrations are essential to the presentation, either coordinated closely with the text or used alone without text

Plant Biology
USE BOTANY

PREREADING EXPERIENCE *Jul. 1966*
SN (Scope Note Added) Preschool incidental learning that prepares children for reading (note: use "Reading Readiness" for formal prereading training—prior to Sep80, the use of this term was not restricted by a Scope Note)

Pressure (1970 1980) *Jun. 1980*
SN Invalid Descriptor—originally intended as a physical science term but used inconsistently for social pressure, psychological stress, etc., as well as physical pressure—see such Descriptors as "Pressure (Physics)," "Political Influences," "Social Influences," and "Stress Variables"

Prior Knowledge
USE PRIOR LEARNING

PRIVATE FINANCIAL SUPPORT *Jul. 1966*
SN (Scope Note Added) Financial aid received from private sources (note: do not confuse with "Private School Aid")

PRIVATE SCHOOL AID *Mar. 1980*
SN (Scope Note Changed) Public or private financial support given to private, religious, or other nonpublic schools, colleges, or universities (note: do not confuse with "Private Financial Support")

Project Applications (1967 1980) *Jun. 1980*
SN Invalid Descriptor—used inconsistently in indexing—see "Program Proposals" and "Program Descriptions"

Provincial Aid
USE STATE AID

Psychiatric Technicians
USE PSYCHIATRIC AIDES

Punch Press Operators
USE MACHINE TOOL OPERATORS

RACIAL DISCRIMINATION *Jul. 1966*
SN (Scope Note Added) Restriction or denial of rights, privileges, and choice because of race (note: do not confuse with "Racial Bias")

RADIATION EFFECTS *Aug. 1968*
(Reinstated June 1980)
SN Changes in the properties of liquids, gases, and solids caused by radiation (e.g., gamma rays, x-rays, neutrons)
UF Radiation Damage

Radiobiology
USE RADIATION BIOLOGY

READABILITY *Jul. 1966*
SN (Scope Note Changed) The quality of reading matter that makes it interesting and understandable to those for whom it is written (note: prior to Jun80, "Reading Difficulty" and "Reading Level" were occasionally used to index this concept)

READING ACHIEVEMENT *Jul. 1966*
SN (Scope Note Changed) Level of attainment in any or all reading skills, usually estimated by performance on a test (note: prior to Jun80, "Reading Level" was occasionally used to index this concept)

READING ALOUD TO OTHERS *Sep. 1980*
SN Reading aloud for the sake of the listener's well-being (e.g., to inform or entertain the listener or audience, to develop his/her appreciation of literature or reading readiness, etc.) (note: use "Oral Reading" when the purpose of reading aloud is to develop or diagnose the reader's language skills)

READING DIFFICULTIES *Mar. 1980*
SN (Scope Note Changed) Problems in reading, caused either by disabilities associated with psychological processes or by such factors as physical or sensory handicaps, cultural background, low ability, etc. (note: do not use for "Readability"—the previous term "Reading Difficulty" was not scoped and was often confused with "Readability")

Reading Difficulty (1966 1980) *Jun. 1980*
SN Invalid Descriptor—used for both the reading problems of students and the reading level of materials—see "Reading Difficulties" and "Readability" respectively for these concepts

READING FAILURE *Jul. 1966*
SN (Scope Note Added) Lack of achievement or accomplishment in reading

Reading Level (1966 1980) *Jun. 1980*
SN Invalid Descriptor—used for both the reading level of people and the readability level of materials—see "Reading Achievement" and "Readability" respectively for these concepts

READING READINESS *Jul. 1966*
SN (Scope Note Added) Act of preparing, or degree of preparedness, for formal reading instruction or any other reading activity or task

Referral Services (Community)
USE COMMUNITY INFORMATION SERVICES; REFERRAL

RELEASED TIME *Jul. 1966*
SN (Scope Note Changed) Time granted to students, employees, or institutionalized persons to pursue special activities

RELIGIOUS EDUCATION *Jul. 1966*
SN (Scope Note Changed) Instruction in religion at any level not leading to a degree in theology (note: prior to Mar80, this term was not restricted by a Scope Note—for formal education for careers in religion, including the clergy, use "Theological Education")

Research Apprenticeships (Del Jan81)
USE RESEARCH ASSISTANTS

RESEARCH ASSISTANTS *Oct. 1980*

RESEARCH DESIGN *Jul. 1966*
SN (Scope Note Changed) The underlying plan or organization of a research project or study that determines its scope and approach—also, the process of planning and organizing research activities (note: for documents/articles dealing with research methods or experimental procedures, use "Research Methodology")

RESEARCH METHODOLOGY

Jul. 1966

SN (Scope Note Changed) Procedures used in making systematic observations or otherwise obtaining data, evidence, or information as part of a research project or study (note: do not confuse with "Research Design," which refers to the planning and organization of such procedures)

RESEARCH NEEDS

Jul. 1966

SN (Scope Note Changed) Questions or problems that require research (note: prior to Mar80, the use of this term was not restricted by a Scope Note—see also "Research Methodology," "Research Opportunities," and "Research Problems")

Resident Students (1967 1980) (In District)

USE RESIDENCE REQUIREMENTS

Resident Students (1967 1980) (In State)

USE IN STATE STUDENTS

Retention (of Employees)

USE LABOR TURNOVER

RETENTION (PSYCHOLOGY)

Mar. 1980

SN (Scope Note Changed) That aspect of memory that involves either short- or long-term holding of information (note: prior to Jun80, "Retention Studies" was also used to index this concept—for the concept of "retention of personnel, teachers, students, etc.," see such Descriptors as "Employment Practices," "Teacher Persistence," and "School Holding Power")

Retention Studies (1966 1980)

Jun. 1980

SN Invalid Descriptor—see preferred Descriptor "Retention (Psychology)" (note: postings will be transferred to the preferred term in a forthcoming computer tape update)

Satellite Laboratories (1966 1980)

USE SATELLITES (AEROSPACE)

SATELLITES (AEROSPACE)

Mar. 1980

SN (Scope Note Added) (note: if applicable, use the more specific term "Communications Satellites")

SCHOOL HEALTH SERVICES

Jul. 1966

SN (Scope Note Added) [note: prior to Jun80, see also "Clinic Personnel (School)"]

School Planning (1966 1980)

Jun. 1980

SN Invalid Descriptor—use "Educational Facilities Planning" or, if appropriate, the broader term "Educational Planning"

School Renovation

USE EDUCATIONAL FACILITIES IMPROVEMENT

SCOPE OF BARGAINING

Oct. 1980

SN The topics and issues accepted or contested as appropriate for consideration in collective bargaining

Security (1967 1978)

Mar. 1978

SN Invalid Descriptor—use a more precise Descriptor such as "Security (Psychology)" or "School Security," or use an Identifier such as "Building Security"

Self Bias

USE EGOCENTRISM

Self Directed Classrooms (1966 1980)

Jun. 1980

SN Invalid Descriptor—used inconsistently in indexing—see the more precise Descriptors "Open Education," "Independent Study," "Individualized Instruction," and "Student Projects"

Seniors (1966 1980) (Grade 12)

USE HIGH SCHOOL SENIORS

Seniors (1966 1980) (Last Year Undergraduates)

USE COLLEGE SENIORS

Skimming (Reading)

USE SPEED READING

SOCIAL COGNITION

Oct. 1980

SN Conceptions about interpersonal and social phenomena (e.g., persons, the self, motives, feelings, relations, social roles, societal institutions)—also, cognitive processes and skills used in social interaction (e.g., communication skills, perspective taking, empathy)

SOCIAL DISCRIMINATION

Jul. 1966

SN (Scope Note Added) Unfavorable treatment of individuals or groups on arbitrary grounds (note: do not confuse with various "bias" terms, which refer to prejudicial attitudes that may lead to such treatment)

Solicitors (Law)

USE LAWYERS

SPECIFICATIONS

Sep. 1968

SN (Scope Note Changed) Detailed written statements of characteristics or requirements (note: use a more specific term if possible)

Spectators

USE AUDIENCES

Spectrograms (1967 1980)

USE SOUND SPECTROGRAPHS

Speech Communication Curriculum

USE SPEECH COMMUNICATION; SPEECH CURRICULUM

Speech Communication Research

USE COMMUNICATION RESEARCH; SPEECH COMMUNICATION

SPEECH HANDICAPS

Jul. 1966

SN (Scope Note Changed) Defects and disturbances that interfere with oral communication

STATISTICAL DISTRIBUTIONS

Oct. 1980

SN Tables or graphs of observed, predicted, or theoretical data indicating either the probability or the number of instances to be found along successive intervals of an ordered scale—also, the mathematical functions of distributions

UF Distributions (Statistics)

Frequency Distributions

Structural Analysis (1966 1980)

Mar. 1980

SN (Scope Note Changed) Invalid Descriptor—originally intended as a linguistics term but used indiscriminately—see "Structural Analysis (Linguistics)" and "Structural Analysis (Science)"—see also such Descriptors as "Chemical Analysis," "Literary Criticism," and "Group Structure," or such Identifiers as "Cognitive Structures," "Musical Analysis," "Structure of Knowledge," and "Structural Learning"

Student Distribution (1966 1980)

Jun. 1980

SN Invalid Descriptor—used indiscriminately in indexing—see such Descriptors as "School Demography," "Geographic Distribution," and "Test Norms"

Study Release Programs

USE RELEASED TIME

SUMMATIVE EVALUATION

Jun. 1971

SN (Scope Note Changed) Evaluation at the conclusion of an activity or plan to determine its effectiveness

TEACHER MADE TESTS

Oct. 1980

SN Tests and other measures that are planned, assembled, written, or otherwise prepared by teachers for use with particular groups of students (note: for specificity, coordinate with other terms in the "Tests" and "Measures (Individuals)" hierarchies)

TEACHER PERSISTENCE

Jul. 1966

SN (Scope Note Changed) One's active continuance as a teacher by reason of personal choice

TEACHER RESPONSE

Jul. 1966

SN (Scope Note Changed) Teacher reaction to instructional and/or classroom situations (note: prior to Mar80, the instruction "Teacher Reaction, use Teacher Attitudes" was carried in the Thesaurus)

TEACHERS

Jul. 1966

SN (Scope Note Added) (note: see "Faculty" for other specific terminology related to "Teachers")

TEACHING ASSISTANTS

Jul. 1966

SN (Scope Note Changed) Persons, usually graduate students, who assist as instructors at the college level (note: for K-12 assistants, use "Teacher Aides")

TEACHING HOSPITALS

Oct. 1979

SN (Scope Note Changed) Hospitals where formal medical training takes place, usually affiliated with nursing or medical schools (note: do not confuse with "Hospital Schools" or "Patient Education")

Teaching (1966 1980)

Jun. 1980

SN Invalid Descriptor—used inconsistently in indexing—see "Instruction," "Teaching (Occupation)," and "Teaching Methods"

TELECOURSES

Jul. 1966

SN (Scope Note Changed) Sequences of lessons offered over television for credit or auditing purposes (note: for courses on the subject of television, use "Television Curriculum"—prior to Mar80, this term did not carry a Scope Note)

Textbook Publications (1966 1980)

Jun. 1980

SN Invalid Descriptor—see the more precise Descriptors "Textbooks" and "Textbook Publication"

THEOLOGICAL EDUCATION

Jul. 1966

SN (Scope Note Changed) Formal education in a higher education institution in preparation for careers in religion, including the clergy (note: prior to Mar80, this term was not restricted by a Scope Note)

THRESHOLD LEVEL (LANGUAGES)

Oct. 1980

SN The minimum level of foreign language proficiency needed for learners to communicate in most everyday situations, including situations for which they have not been specifically trained—emphasis is on oral skills and listening comprehension—objectives for reading and writing skills are narrowly restricted

Tracking (1968 1980)

Jun. 1980

SN Invalid Descriptor—used indiscriminately in indexing—see more precise Descriptors "Track System (Education)," "Perceptual Motor Coordination," and "Psychomotor Skills," as well as the Identifier "Tracking (Science)"

Trainable Mentally Handicapped (1967 1980)

Jun. 1980

SN Invalid Descriptor—see preferred Descriptor "Moderate Mental Retardation" (note: postings will be transferred to the preferred term in a forthcoming computer tape update)

TRANSFORMATIONS (MATHEMATICS)

Feb. 1970

SN (Scope Note Changed) Substitution of one mathematical configuration or expression by another in accord with a mathematical rule

Unified Studies Programs (1966 1980)

USE UNIFIED STUDIES CURRICULUM

UNITED STATES HISTORY

Jul. 1966

SN (Scope Note Added) (note: prior to Mar80, "American History" was occasionally used for this concept)

VERBAL DEVELOPMENT

Jul. 1966

SN (Scope Note Added) Growth in ability to use and comprehend words in either oral or written form

Village Extension Agents

USE EXTENSION AGENTS

WEIGHT (MASS)

Oct. 1980

SN (note: for living organisms, use "Body Weight")

Weight (1968 1980)

Jun. 1980

SN Invalid Descriptor—used inconsistently in indexing—for inorganic physical objects, use "Weight (Mass)"—for living organisms, use "Body Weight"—for scores, use "Weighted Scores"—for data other than scores, use the Identifier "Weighted Data"

WILDLIFE

Aug. 1980

SN Animals and/or plants living in a natural (undomesticated or uncultivated) state

WOMEN FACULTY

Sep. 1980

SN Female academic staff members engaged in instruction, research, administration, or related educational activities

UF Women Professors

Women Teachers (Del Jun80)

USE WOMEN FACULTY

WRITING PROCESSES

Oct. 1980

SN Series of thoughts and behaviors involved in planning, writing, and/or revising written compositions

UF Composition Processes (Literary)

WRITING RESEARCH

Oct. 1980

GENERAL INFORMATION

1. PRICE LIST

The prices set forth herein may be changed without notice; however, any price change will be subject to the approval of the National Institute of Education Contracting Officer.

2. PAYMENT

The prices set forth herein do not include any sales, use, excise, or similar taxes which may apply to the sale of microfiche or hard copy to the Customer. The cost of such taxes, if any, shall be borne by the Customer.

Payment shall be made net thirty (30) days from date of invoice. Payment shall be without expense to CMIC.

3. REPRODUCTION

Express permission to reproduce a copyrighted document provided hereunder must be obtained in writing from the copyright holder noted on the title page of such copyrighted document.

4. CONTINGENCIES

CMIC shall not be liable to Customer or any other person for any failure or delay in the performance of any obligation if such failure or delay (a) is due to events beyond the control of CMIC including, but not limited to, fire, storm, flood, earthquake, explosion, accident, acts of the public enemy, strikes, lockouts, labor disputes, labor shortages, work stoppages, transportation embargoes or delays, failure or shortage of materials, supplies or machinery, acts of God, or acts or regulations or priorities of the federal, state, or local governments; (b) is due to failures of performance of subcontractors beyond CMIC's control and without negligence on the part of CMIC; or (c) is due to erroneous or incomplete information furnished by Customer.

5. LIABILITY

CMIC's liability, if any, arising hereunder shall not exceed restitution of charges.

In no event shall CMIC be liable for special, consequential, or liquidated damages arising from the provision of services hereunder.

6. WARRANTY

CMIC MAKES NO WARRANTY, EXPRESS OR IMPLIED, AS TO ANY MATTER WHATSOEVER, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE.

7. QUALITY

CMIC will replace products returned because of reproduction defects or incompleteness. The quality of the input document is not the responsibility of CMIC. Best available copy will be supplied.

8. CHANGES

No waiver, alteration, or modification of any of the provisions hereof shall be binding unless in writing and signed by an officer of CMIC.

9. DEFAULT AND WAIVER

- a. If Customer fails with respect to this or any other agreement with CMIC to pay any invoice when due or to accept any shipment as ordered, CMIC may without prejudice to other remedies defer any further shipments until the default is corrected, or cancel this Purchase Order.
- b. No course of conduct nor any delay of CMIC in exercising any right hereunder shall waive any rights of CMIC or modify this Agreement.

10. GOVERNING LAW

This Agreement shall be construed to be between merchants. Any question concerning its validity, construction, or performance shall be governed by the laws of the State of New York.

11. DEPOSIT ACCOUNTS

Customers who have a continuing need for ERIC documents may open a Deposit account by depositing a minimum of \$200.00. Once a deposit account is opened, ERIC documents will be sent upon request, and the account charged for the actual cost and postage. A monthly statement of the account will be furnished.

12. STANDING ORDER ACCOUNTS

Customers who desire to receive microfiche copies of all ERIC reports announced in each issue of Resources in Education may do so by depositing \$200.00 or submitting an executed purchase order. The cost of each issue and postage will be charged against the account. A monthly statement of the account will be furnished.

13. PAPER COPY (PC)

A paper copy (PC) is xerographic reproduction, on paper, of the original document. Each paper copy has a Vellum Bristol cover to identify and protect the document.

14. FOREIGN POSTAGE

Postage for all countries other than the United States is based on the international Postal Rates in effect at the time the order is shipped. To determine postage allow 75 microfiche or 75 (PC) pages per pound. Customers must specify the exact classification of mail desired, and include the postage for that classification with their order. Payment must be in United States funds.

OTHER ERIC COLLECTIONS AVAILABLE FROM EDRS

STANDING ORDERS

Subscription orders of microfiche copies of all ERIC reports announced in each issue of Resources in Education average \$160.00 per month.

ANNOUNCES . . .

A MINI-FILE COLLECTION of the most recent INFORMATION ANALYSIS PRODUCTS 1975-1977 on MICROFICHE . . .

The MINI-FILE contains all of the DOCUMENTS available from EDRS in MICROFICHE FORMAT . . . together with a paper copy of the BIBLIOGRAPHY that lists DOCUMENTS in accession number order, with ED accessions (from RIE). Three indexes are provided: SUBJECT, PERSONAL AUTHOR, and INSTITUTION.

The MINI-FILE covers 574 INFORMATION ANALYSIS PRODUCTS (IAPs) developed by the sixteen (16) ERIC CLEARINGHOUSES. The information is synthesized into research reviews, bibliographies, state of the art studies, interpretive studies on topics of high current interest, and similar documents designed to meet the information needs of users.

INCLUDED ARE TYPICAL TITLES OF CURRENT INTEREST:

- Recent Trends in Bilingual Education
- Cheating: An Annotated Bibliography
- Women's Athletics
- Teaching Local History
- Assertiveness Training
- Children and Television
- Translation as a Career Option for Foreign Language Majors
- Intercultural Communication
- Energy Investigation for the Classroom
- Alternative Tuition Systems
- Strengthening the Small Rural School
- Adult Learning: Issues and Innovation
- Alternatives to Suspension

“ORDER ERIC”

NOW AVAILABLE ON THE ORBIT SYSTEM “ORDER ERIC”

Order your needed ERIC documents “at the terminal” (ORBIT users only). They will be stored during the work day and electronically transmitted to and received by EDRS at the end of the day. Each order is computer processed and quickly filled to meet your timely requirements.

Expedite your demand orders for microfiche or papercopy! This service permits ORBIT users to order “at the terminal” documents from the *Resources in Education* (RIE) portion of the ERIC Data Base that are available* from the ERIC Document Reproduction Service.

*Note: EDRS prices for microfiche and hardcopy must be quoted, otherwise the document is not available through this service. Documents that are available can be identified by their ED (not EJ) accession number, and from the PR field.

RUSH SERVICE

An order placed through the ORBIT system today will be rushed on its way to you within 48 hours.

LOW COST

A service charge of only 50¢ per document ordered will be added to the current list price, plus applicable shipping charges.

TIMELY INFORMATION

Demand order requests from EDRS often times are valuable only if the information is received quickly. Now you can count on fast electronic input of your order. Save on lengthy mailing time—your order is speedily transmitted to EDRS, and your requested information is sent rapidly to you.

HERE ARE SOME IMPORTANT DETAILS CONCERNING “ORDER ERIC”. . . .

- | | |
|--------------------------|--|
| Supplier: | ERIC Document Reproduction Service (EDRS)
P.O. Box 190
Arlington, VA 22210 |
| Document Forms: | Microfiche (MF) Papercopy (PC) |
| Deposit Accounts: | Deposit accounts are not required, but preferred—you should establish one with a minimum of \$200. Contact EDRS directly to set up your account. |
| Rates: | A service charge of 50¢ per document ordered will be added to the current price of the document plus expedited shipping charges. |

EDRS requires that users carefully follow the instructions given below to ensure correct interpretation and processing of terminal orders:

- Be sure a microfiche (MF) or papercopy (PC) price is quoted in the document resume. Resumes without a quoted EDRS price means that the document is not available from EDRS and cannot be ordered through “ORDER ERIC”.
- EDRS does not supply documents with EJ numbers. These are citations from Current Index to Journals in Education (CIJE).
- Enter your name or company name on one line after BILL TO. Enter your address on separate lines just as it should appear on the shipping label. You may enter up to 5 lines. Make sure you enter your city, state, and zip code on the last line.
- If you want your order shipped to a different address than given in the BILL TO section, enter that address in SHIP TO. Be sure to include the city, state, and zip code.
- Documents ordered in microfiche (MF) will automatically be shipped via airmail, unless otherwise specified. Documents ordered in papercopy (PC) will be shipped via United Parcel Service, unless otherwise specified. If you have special shipping instructions, enter SHIP VIA: and the information on one line. For example, SHIP VIA: UPS BLUE LABEL. All documents included on one invoice will be shipped the same way.
- If you have a deposit account, enter CHARGE DEPOSIT ACCOUNT: and the number.
- If you want a purchase order number to appear on the invoice and shipping label, enter MY P.O. NUMBER IS: and the number(s) for each purchase order you wish to include.
- For each item you wish to order, enter on one line: the ED number, the document form (MF or PC) number of copies you are ordering (a number and the word COPY or COPIES). Each line must begin with the letters ED and there must not be any blanks or commas in the ED number.

ERICTAPES ERICTOOLS

HAVE A COMPUTER?

LOOK AT ERICTAPES!

The Educational Resources Information Center (ERIC) data base is available on magnetic tape in a variety of options from ORI, Inc. Under special authorization from the National Institute of Education, U.S. Department of Education, these tapes are offered at unusually low cost to encourage the widest possible dissemination.

The ERIC data base provides coverage of the significant literature in the field of educational resources. Report literature (announced in *Resources in Education*) is covered from 1966 to date, and journal article literature (announced in *Current Index to Journals in Education*) is covered from 1969. Monthly, quarterly, and annual updates are available for both *RIE* and *CJIE*, so that the files may be kept current.

The basic files are available in the ERIC (IBM 360 OS) Format. These files include the complete resume, (document description, indexing, and abstract or annotation) of each document announced in the respective journal, in accession number order. A variety of peripheral files, including

Postings Files (inverted subject and source indexes) and the Thesaurus (controlled indexing vocabulary) are also available on magnetic tape, and almost any segment of the master files is obtainable on Special Order.

The files may be purchased individually or as a collection, and substantial discounts are available on annual subscriptions for updates. The files are written on new, high-quality, 9-track tapes (600-1200, or 2400-ft., as appropriate) at either 1600 or 800 BPI and are guaranteed. Prices per tape reel start as low as \$50.

NO COMPUTER?

LOOK AT ERICTOOLS!

For organizations without access to a computer.* ERICTOOLS provide manual multi-viewpoint access to the ERIC document collection. ERICTOOLS are a series of printed indexes, directories, and cross-reference lists, distributed internally to components of the ERIC network. The *Title Index* provides access by document title. The *Source Directory* provides access to all organizational names used in the system, i.e., corporate authors and sponsoring agencies. Cross-reference lists lead the inquirer to the accession number (ED number) from: Report Number; Contract Number; and Clearinghouse Accession Number.

The documents are available individually and on annual subscription at a discounted price. Prices start from as low as \$10 for some individual documents.

*Many of these documents are also valuable tools for computer searchers.

II. REPRODUCTION RELEASE

In order to disseminate as widely as possible timely and significant materials of interest to the educational community, documents announced in the monthly abstract journal of the ERIC system, *Resources in Education* (RIE), are usually made available to users in microfiche and paper copy (or microfiche only) and sold through the ERIC Document Reproduction Service (EDRS). Credit is given to the source of each document, and, if reproduction release is granted, one of the following notices is affixed to the document.

If permission is granted to reproduce the identified document, please CHECK ONE of the options and sign the release below.

III. DOCUMENT AVAILABILITY INFORMATION (Non-ERIC Source)

If permission to reproduce is not granted to ERIC, or, if you wish ERIC to cite the availability of the document from another source, please provide the following information regarding the availability of the document. (ERIC will not announce a document unless it is publicly available, and a dependable source can be specified. Contributors should also be aware that ERIC selection criteria are significantly more stringent for documents which cannot be made available through EDRS.)

Publisher/Distributor: _____
Address: _____
Price Per Copy: _____ Quantity Price: _____

IV. REFERRAL TO COPYRIGHT/REPRODUCTION RIGHTS HOLDER

If the right to grant reproduction release is held by someone other than the addressee, please provide the appropriate name and address:

ERIC Network Components

There are currently sixteen (16) ERIC Clearinghouses, each responsible for a major area of the field of education. Clearinghouses acquire, select, catalog, abstract, and index the documents announced in *Resources in Education (RIE)*. They also prepare interpretive summaries and annotated bibliographies dealing with high interest topics and based on the documents analyzed for *RIE*; these information analysis products are also announced in *Resources in Education*.

ERIC Clearinghouses:
